## ABOUT THE WEBPRO USER MANUAL

Throughout the WebPro manuals there are graphical representations of screens. Please be advised that, due to client application customization, the names of some of the fields in those graphics may not match the names you use within your application.

### ✓ TIPS

This symbol indicates a tip or best practices suggestion for WebPro users.

## ADDITIONAL RESOURCES

Return to the [PMAPS Portal](#) for additional resources including our Administrator Manual, Quick Start Guides, Videos, Known Issues List and access to other support services.

## LOGIN INSTRUCTIONS

1. Open Internet Explorer and go to the assigned website URL provided by your administrator.

The screenshot shows a login interface for PMAPS WebPro. It includes a text box for 'User Name', a text box for 'Password', a checkbox labeled 'Remember Me', a blue button with the text 'LOGIN TO PMAPS WEBPRO', a link that says 'Forgot your password?', and the 'pmaps WebPro' logo at the bottom.

2. Enter the user name and password provided by your administrator.

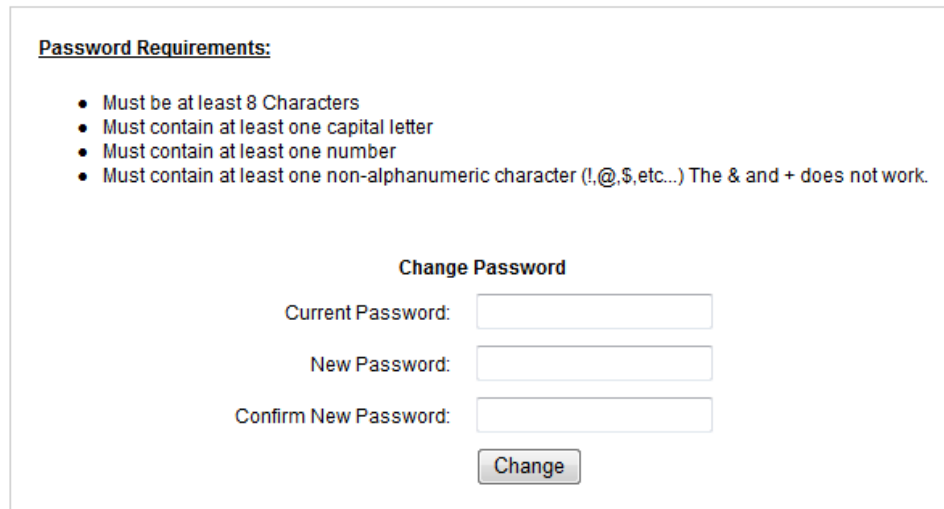

### ✓ TIPS

- ❖ Clicking the [Remember Me](#) button upon logging in keeps you logged in during the entire Internet Explorer session. It is not a means of saving your user name and password.

3. Click [Login](#).

## First Time Login Change Password

1. Upon first login, you may be brought to the [Password](#) area in the Administration module to change your password.

The screenshot shows a web form titled "Password Requirements:" with a bulleted list of rules: "Must be at least 8 Characters", "Must contain at least one capital letter", "Must contain at least one number", and "Must contain at least one non-alphanumeric character (!,@,\$,etc...) The & and + does not work." Below this is a section titled "Change Password" containing three input fields: "Current Password:", "New Password:", and "Confirm New Password:". A "Change" button is located at the bottom right of the form.

2. Enter the password provided to you in the [Current Password](#) field.
3. Enter a new password of your choice in the [New Password](#) field. Passwords must be at least 8 characters in length using any combination of letters and numbers, but must contain at least one symbol. Any of the following symbols may be used [!@#\\$%^\\*\(\)](#). Do not use the [&](#) or [+](#) symbols as those are used in code and may cause the password change to not be accepted. We can change this rule on our end if you have specific requirements.
4. Enter the same password again in the [Confirm New Password](#) field.

### ✓ TIPS

- ❖ You may change your password at any time by clicking on the [Administration](#) link

5. Make a note of your password and save it in a secure place.

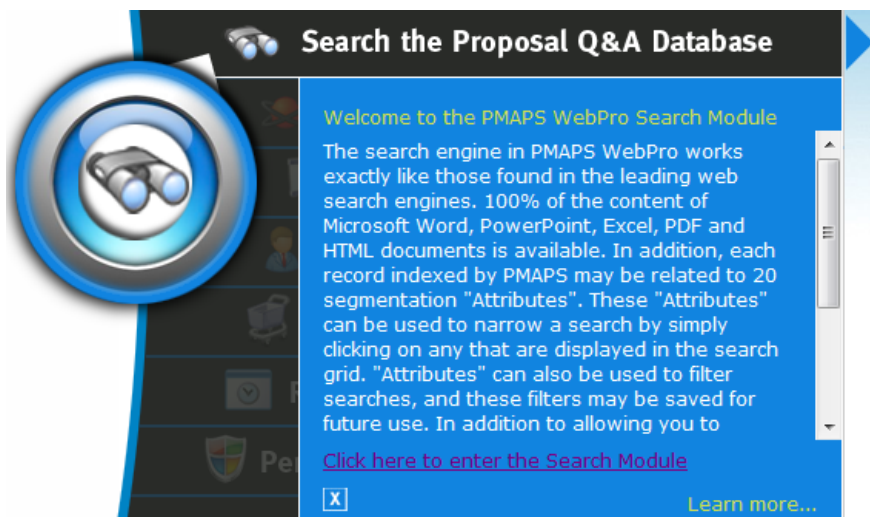

## NAVIGATION CENTRAL

PMAPS Navigation Central is an interactive navigation screen accessible to users upon login. From this screen, users can learn more click to access specific PMAPS modules or their associated training videos.

1. Clicking on the [Stopwatch](#) in the center of the screen takes the user to a brief description of the module. Click to go to that module in the application or click [Learn More](#) to access the associated training video.

2. You can choose to see [Navigation Central](#) upon login, or un-check the box to go directly to your Dashboard upon login.

3. Click to access your [Dashboard](#) from the bottom of the screen as well.

## DASHBOARD MODULE

### Adding a New Proposal

The first step in proposal production is logging in the prospect, client, consultant, or internal request—for tracking and reporting purposes. This request could be a formal Request for Proposal (RFP), a client or consultant Request for Information (RFI), or any type of project you want to keep track of; e.g., Due Diligence, Consultant Database, etc. For simplicity, when we are discussing tasks related to the [Dashboard](#) or Tracking module, we refer to these entries as proposals.

Your WebPro administrator has the option to customize many field label names within the application. This manual covers the functionality of the fields and instructions on how to use them. However, questions regarding how or why information should be captured needs to be addressed by your administrator.

#### ✓ TIPS

- ❖ If this is your first time logging in a proposal, you may want to review instructions on the functionality of PMAPS fields under [WebPro Fields and Functionality Overview](#).

To log in a new proposal:

1. Click the [New Proposal](#)  icon.

2. Click [OK](#) to confirm that you want to add a new proposal.

3. You have two options for [How would you like to begin?](#)
  - a. Click the radio button to [Start with an uploaded document](#), then browse and select the file Word or Excel file you wish to start with, or

- b. Click the radio button to [Start with a blank Word document](#), in which case a blank Word document is opened on your desktop within your local Word application.
- c. Click the radio button to [Start with a blank Excel document](#), in which case a blank Excel document is opened on your desktop within your local Excel application.

#### ✓ TIPS

- ❖ Even though you may begin with a blank document, in order for PMAPS to be fully functional in tracking and using [Word Replacement Codes](#), you must work with a document that is uploaded to the cloud.
- ❖ If your current process is to reformat the client's questionnaire into your company's style and have a template document that you use, you may do that before you complete the questionnaire using WebPro, or after you finish completing the questionnaire.

In the following example, we have browsed and selected the Acme Proposal, so the path to that file is displayed in the field.

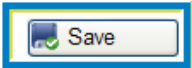

4. On the new, blank proposal's [Summary](#) tab, select the first field that your admin has instructed you to fill out. Mandatory fields will be highlighted yellow. Select the [Client Name](#) field.

#### ✓ TIPS

- ❖ To add a name to the list, click the  next to the Client Name field, then click [Edit Values](#).
5. Tab to the [Proposal Name](#) field, and enter the name.
  6. Continue tabbing through or clicking on the fields that you need to complete on the [Summary](#) tab.

7. Continue on to the remainder of the tabs and fill out all fields as directed by your admin.

8. Click on the [Dashboard](#)  tab.

9. Click the [Save](#)  icon to save your changes. If you attempt to exit the proposal before saving your changes, the following prompt is displayed:

Now that you have logged in your proposal, you are ready search for database content and insert it into your questionnaire or document. Make sure the document you want to complete is open on your desktop by doing one of the following:

From the proposal dashboard, select the proposal you want to work on and click the [Edit](#) button  to open it.

Or

Open the document on your desktop.

#### ✓ TIPS

- ❖ If you are ready to work on the proposal that you just logged in, you may skip to the [Search Module](#).

## Responding to Proposals

You may edit a proposal that has been uploaded to the “cloud” as long as another user has not checked the proposal out. If someone has the proposal checked out, it will alert you to that fact. To edit a proposal:

1. Select the proposal on the Dashboard by clicking on it. The proposal is highlighted.

	Date Entered	Date Due	Proposal Name	Region	Mandate	Asset Class	Last Edited	Vehicle/Product
	2/28/2008	1/29/2010	Acme RFP	Sydney	Core Fixed Income	Equity - Domestic	12/3/2009	

2. Click the Edit icon either from the Dashboard view on the proposal grid or above the grid.

	Date Entered	Date Due	Proposal Name	Region	Mandate	Asset Class	Last Edited	Vehicle/Product
	2/28/2008	1/29/2010	Acme RFP	Sydney	Core Fixed Income	Equity - Domestic	12/3/2009	

3. Edit the proposal.

4. Click the [Save to PMAPS](#) icon.

## Other Proposal Editing/Saving Options

### Cancel Changes

If you make edits to a proposal, but then decide not to save the changes to the “cloud,” click the

[Discard Changes](#)

icon.

### Save Local (Check Out)

If you are working on a proposal and you want to save it to your local computer, click the [Save](#)

[Local \(check out\) icon](#)

. You can save an offline copy of the proposal and also check it out to lock it from changes by other users. When you are ready to replace it with an edited document, you will use the Overwrite PMAPS Document with Local Document function as shown below.

### TIPS

- ❖ Unlocking proposals which have been checked out by another user is generally an Admin function. Admins can permit other users to have rights to unlock as necessary.

### Overwrite PMAPS Document with Local Document

Use the [Overwrite](#) feature when you are ready to replace a blank document with your formatted questionnaire or when you want to replace the document saved on PMAPS with a document that was edited offline.

1. Choose to the proposal you'd like to overwrite from the [Dashboard](#).
2. Click the [Edit Proposal](#) icon. This opens the linked proposal. If you chose ‘start with a blank document’ when you logged in your proposal, the linked proposal is a blank Word document.

3. Click the [Overwrite](#) proposal icon

. The following prompt appears.

4. Click [Yes](#) to confirm. Your Windows browser icon opens. Navigate to and select the document you want to replace the blank or current document with.
5. Click [Open](#). The new document replaces the old one.

6. Click [Save to Pmaps](#) to save your changes.

## Re-link Document

This Re-link icon automatically re-inserts ALL documents you inserted from PMAPS into your open proposal. **USE WITH EXTREME CAUTION!!!** This is an excellent tool for repopulating a proposal you have done in the past with current information in PMAPS.

## Dashboard Options

You can dramatically decrease the time it takes you to locate proposals in PMAPS by selecting various options and saving those preferences.

A screenshot of the "Dashboard Options" form. It includes a search bar with "Search", "Clear Search", and "Hide Options" buttons. Below are three checkboxes: "My Line of Business Only", "In Process", and "My Proposals Only". There is also a "Due Date:" field with a date picker and a "Save Preferences" button.

You can access the Dashboard options by selecting the [Show Options](#) toggle next to the Search bar. After making your selections, you can hide the [Dashboard Options](#) by clicking the [Hide Options](#).

A button labeled "Show Options" next to a "Clear Search" button.

Enter the proposal name into the [Search](#) bar to locate a specific proposal. This field searches specifically on the [Proposal Name](#) field in the Summary tab.

A search bar with the text "Acme" entered and a "Search" button.

The [My Line of Business Only](#) checkbox controls the region of line of business shown in your Dashboard results. If you are using PMAPS to track multiple regions or lines of business, this shows only those proposals in your region (assigned by the PMAPS Admin). If you are unsure if you are using multiple regions, checking this option ensures that all proposals

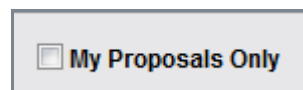

A checkbox labeled "My Line of Business Only".

will show in the view.

You can check [In-Process](#) to display only those proposals that have not yet been shipped. This is quick method of reviewing what is in your queue for the selected date range.

If you only want to see proposals where you name has been chosen as a contributor, click the [My Proposals Only](#) checkbox:

Use [Due Date](#) to narrow your results to view only proposals only within a specific date range, enter a date range. To view all proposals in the system, do not enter a date.

[Save Preferences](#) to save your selected options. WebPro will default your [Dashboard](#) view to your saved preferences when upon login.

The number of proposals displayed in the current search is always indicated above the proposal icons on the left-hand side of the screen. In this example, we have [201 Proposals Found](#) as a result of the current search or filters that have been applied.

You may also choose the number of proposals you want displayed on the screen. Your options are 5, 10, 15, 25, 50, or ALL.

You may click on the page numbers to scroll through the pages.

The proposal you have selected on the dashboard displays as the proposal you are working on.

## TIPS:

- ❖ If you have entered a proposal name in the proposal [Search](#) field and you then change the date range, PMAPS automatically searches for that name within the new date range.
- ❖ The [Clear Search](#)  button removes all existing text from the Search field. Be sure to [Clear Search](#) before clicking [Save Preferences](#) so that no search text is saved as part of your default settings.

- ❖ If you are displaying a large number of results, select the number of items to view as 50 or less to increase the speed of your screen refreshing.

## Proposal Log Reporting

You may export your proposal log by just clicking on the Export icon.

1. Choose desired filter options from the [Dashboard](#). Click on this link to [Modifying Dashboard Columns](#) for instructions on how to modify your columns.

2. Click the [Export](#) icon.

3. Select the format you want your report exported in. You have three options:

- a. Excel
- b. XML
- c. Delimited Text.

4. A confirmation message appears confirming which option you chose.

5. Click [OK](#) to produce the report.

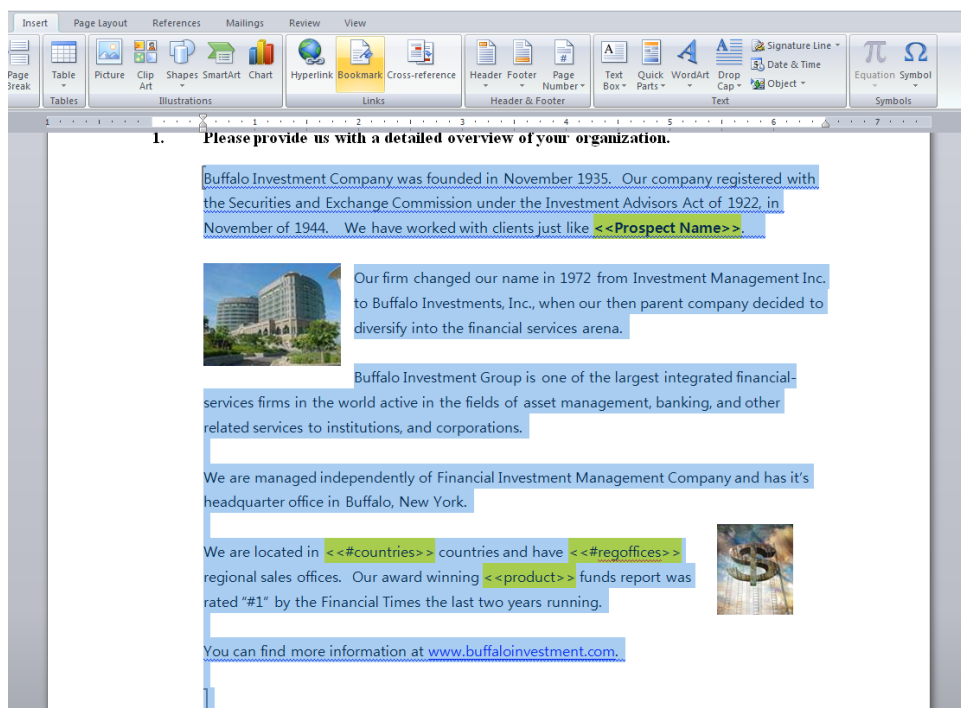

## Update Q&A Document from Proposal Document

This process allows you to update your PMAPS library from a Word document where the response has been modified and you wish to update the PMAPS library with the modified response. You must have used the Insert Full option to insert a response into your proposal document, where a unique bookmark is associated to that Q&A, allowing you to quickly search PMAPS and update the contents of a Q&A from the proposal Word document. Bookmarks are only available in Word so this activity is limited to Word documents. Also, the bookmarks must not have been removed as the link between the Q&A and Word document will not exist and you will have to manually search for that Q&A using a regular text search.

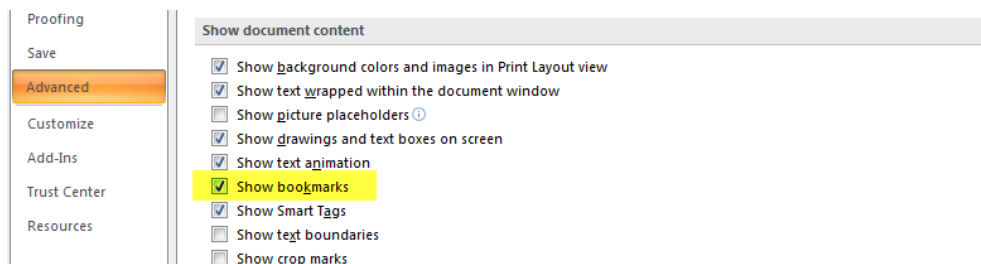

When you insert a Q&A from the PMAPS Search library into your proposal document (Word) it adds the unique GUI (graphical user interface) ID (identification) as a bookmark uniquely associated to that text in your Word document. You can look up the Q&A document in the PMAPS Search library using the GUI ID so that you can quickly update the Q&A from the Word document. To perform this reverse look it up, use the first 8 characters after the “qa\_” and perform a search in PMAPS. This process is outlined in detail below, with screen shots.

1. Open the proposal Word document that contains the updated responses.
2. With your cursor, select the entire area included between the two bookmarks.

## TIPS

- ❖ If you do not see the bookmark icons, you may need to “Show bookmarks” in Word. To do this, open any Word document not in the cloud (from your computer). Then, go to either the **File** menu/tab or **Microsoft** icon and select **Word Options**. Click on the **Advanced** tab and locate the **Show document content** section. Check the **Show bookmarks** option and click OK.

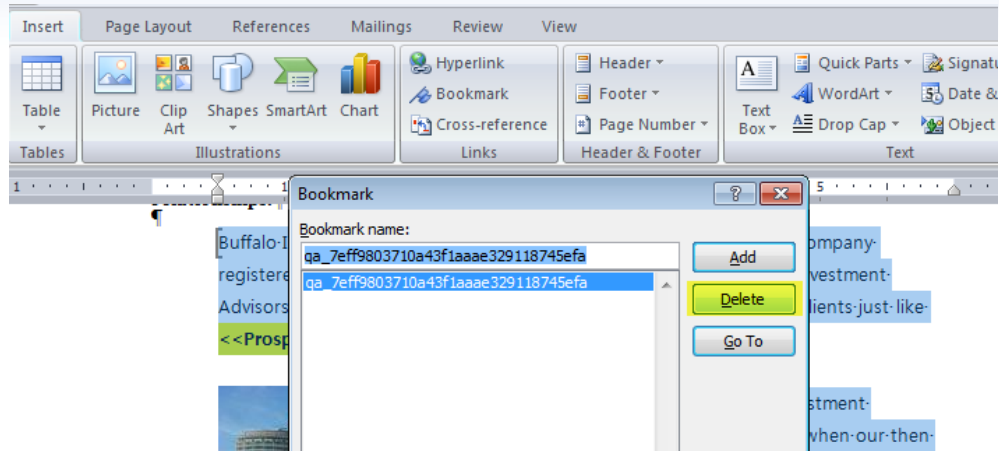

- ❖ Be sure to replace any custom content and replace it with placeholders or codes for word replacement. You can use the Insert Word Replacements  tool to quickly replace this content with the appropriate code.
3. Click on the **Insert** menu/tab and select **Bookmarks**. The **Bookmarks** menu will display a list of all bookmarks in the document and the bookmark related to the selected text will be in the **Bookmark name** field. This is the GUI ID for this Q&A.

3. With your cursor, select the first 8 characters after the qa\_ and copy to your clipboard. Then, click **Cancel**.
4. Go to your **Viewer** toolbar and paste into the text field followed by an asterisk \*, then click the binoculars icon or hit the Enter button on your keyboard.
5. Copy the response you are updating to PMAPS to your clipboard.
6. Return to the **Viewer** toolbar and click the binoculars icon. You may have to click twice as the first click may only activate the **Viewer** as your current application in Windows.

7. You will arrive on the **Search** page where this record automatically is selected.
8. Click **Edit Document** icon. This will open the record for editing.
9. With your cursor, select the entire area included between the two bookmarks. Remove the bookmark in the Q&A document by clicking on the **Insert** menu/tab and selecting **Bookmarks**; click the Delete button and then the Close button. There should be no PMAPS bookmarks in the Q&A documents.

10. Click the Save Document icon and close the Q&A document.

Repeat these steps to update additional Q&A documents from the Word document.

## Delete Proposals

1. Select the proposal you wish to delete from the [Dashboard](#).

Date Due	Proposal Name	Region	Strategy	Asset Class	Products/Services	Proposal Writer
4/5/2012	Acme test		Small Cap Equity			Manning, Betty
9/7/2012	Acme Proposal 2012	USA	Small Cap Value	Blend - FI & Equity		Smith, Cindy
9/30/2011	Acme Technology	USA	Small Cap Growth	Equity		Manning, Betty

2. Click the [Delete Proposal](#) icon.

3. You will be prompted to confirm the deletion.

## TIPS

- ❖ Your Admin will determine which users have permission to delete proposals from the Dashboard. If you do not have permission to delete, the icon will not be visible.

## WEBPRO FILTERS

Auto filters may be applied to any column displaying a filter icon . Each column represents an attribute located on one of the [Dashboard](#) or [Search](#) tabs. You can modify the columns shown in your results view by clicking the [Modify Columns](#) icon, available in both the [Dashboard](#) and [Search](#) results screens.

Click here to jump to [Dashboard View](#)

Click here to jump to [Search Results View](#)

Filters are also available in the [SmartCart](#). While you cannot modify the columns shown, these columns were selected by your Admin and are customizable.

### Single Selection Filter

When you only need to select a single value in a column you may use a single-selection auto filter.

1. Select a column you wish to filter on, for example, [Region](#). The filter icon  in the column heading signifies that you may use an auto filter on the column.
2. Right-mouse click on the value you wish to filter by displayed in your dashboard view to filter for only that item in that specific column. All other attribute options are automatically removed from the results screen.
3. Repeat Steps 1 and 2 to apply one filter to each of the columns you choose.

#### ✓TIPS

- ❖ When you right-mouse click, if you see the following Web menu, you are attempting to right-click in the wrong place. This functionality only works within the [Dashboard](#) or the [Search Results](#) grid.

### Quick Filters

The [Quick Filter](#) allows you to apply one or more filters to your [Dashboard](#), [Search](#) or [SmartCart](#) results grids, one column at a time. You may apply auto filters using the Modify Filters icon

 [Modify Filters](#) or by clicking the filter icon  that appears next to the column heading on applicable columns. .

1. Click on the [Modify Filters](#) icon. The WebPro Filters dialog box appears with no results.
2. From the [Add new filter](#) drop-down list, select the field to filter.
3. The display shows all available values in that field, along with the number of records in each.
4. Check the boxes for one or more items to filter.
5. If desired, add another filter by selecting an additional field from the [Add new filter](#) drop-down list. This list will display only the records that are under the filter established previously (in step 4). Check one or more items to filter.
6. Repeat step 5 as desired until PMAPS displays the desired results.
7. Click [Apply](#).

In the example below, we selected USA as the region, which displayed the available Departments, and we selected Marketing and Sales/Marketing.

The screenshot shows the 'WebPro Filters' dialog box. On the left, there are two tabs: 'Department' and 'Region'. The 'Region' tab is selected. The main area displays a list of departments with checkboxes and counts. The 'Marketing' and 'Sales/Marketing' checkboxes are checked.

Department	Count
Investment Team	1
Legal	1
<input checked="" type="checkbox"/> Marketing	20
Mutual Fund Reporting	1
Performance Reporting	3
Proposal Group	2
Sales	7
<input checked="" type="checkbox"/> Sales/Marketing	1
Securities Operations	1
Trading	5

#### TIPS:

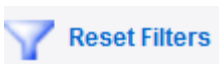

- ❖ Filters are tabbed and multiple filters can be viewed from the Modify Filters screen for easy navigation. Just select the appropriate tab and you can see the results for that filter.
- ❖ Specify a single date or a range of dates to filter on date fields such as Due Date in the Dashboard.
- ❖ Numerical fields show counts by value.
- ❖ In multi-select pick lists, choose one or more values. Counts are not show as more than one value may appear on any given record.

## Reset Filters

### Reset Individual Filters

1. Click on the filter icon  in the column heading for the filter you want to reset. The WebPro Filters dialog box appears. The boxes for the items you are currently filtering on are checked.
2. Click [Show All Options](#).
3. Uncheck the box(es) for the items you no longer want to filter. Note the option to [Uncheck All](#).
4. Check the box(es) for the items you want to filter. Note the option to [Check All](#).
5. Click [Apply](#).
6. Or, select [Remove This Filter](#) to delete the filter while maintaining other filters in place.

### Reset All Filters

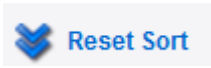

1. Click  to remove all filters.

## Sort

You can sort any column in your [Dashboard](#), [Search Results](#) or [SmartCart Grid](#).

1. Choose the column you want to sort by mouse clicking in the column heading. Before you click on the column, the column header contains a filter icon  and the name of the field only. 
2. Once you click on the column, a sort icon is displayed. Click the up arrows to sort A-Z (ascending). 
3. Click the down arrows to sort Z-A (descending). 
4. The column heading that includes the sorting icon designates which column and which direction the current dashboard is sorted by.

### Reset Sort

1. Click  to remove all sorts.

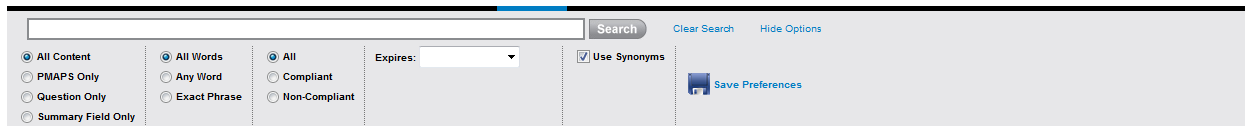

## SEARCH MODULE

The Search module allows you to access content you have stored or indexed in PMAPS for purposes of completing client proposals, consultant database updates, internal requests for information, etc.

If this is your first time searching, you may want to take a few minutes to familiarize yourself with your search options. Remember, filtering works the same in the Search Module as it does in the Dashboard. To review, click to the [WebPro Filters](#) section.

If you are familiar with search options and filtering, and you are ready to work on your proposal, you may skip to the [Searching and Inserting](#) section.

### Search Options

1. Decide which areas of content you want to search through. You have 4 options:
  - **All Content** includes all indexed content. Your admin can index any files on your network, intranet, or internet. This option automatically includes all indexed content along with PMAPS content; e.g., Word, PowerPoint presentations, PDFs, etc.).
  - **PMAPS Only** restricts the search to PMAPS content.
  - **Question Only** restricts the search to only the PMAPS question.
  - **Summary Field Only** restricts the search to text located in the Summary field on the Attributes tab.
2. Choose the method for how PMAPS matches what you enter in the Search field to the content. You have four options:
  - **All Words** retrieves documents that contain all words in the search criteria field. This means that every word in the Search field must be somewhere in each document you are searching in order for them to meet your criteria.
  - **Any Words** retrieves documents that contain any of the words in the search criteria field. This means that if you are searching for three words, your criteria will be met if one, two, or three of the words exists in a document.
  - **Exact Phrase** retrieves documents that contain the exact phrase in the search field. (Note: there are issues with this option. It is recommended that you do not use until further notice.)
  - ☒ **Use Synonyms** includes any synonyms associated with the current text you have entered into the Search field.

## ✓ TIPS

- ❖ Your synonyms library is created by your admin so it is not only industry specific but client specific. If you think of synonyms that would help you locate your content more easily, send them to your Admin for adding to your synonym library. An example of a most frequently used synonym grouping is firm, company, corporation, and organization.

3. Choose what level of compliance needs to be met. You have 3 options:

- [All Documents](#) retrieves both Compliant and Non Compliant Documents.
- [Compliant Documents](#) retrieves only the documents that have been designated as Compliant.
- [Non Compliant Documents](#) retrieves only the documents that have been designated as Non Compliant.

## ✓ TIPS

- ❖ The compliance status of each record is displayed in the [Search Results](#) grid as a designated color.

4. Decide if you want to narrow down your search by a time period when the documents expire. Your options are:

5. [Save Preferences](#) saves all of your selections in this area. You may change your Search Options at any time and re-save to update your preferences. Be sure to [Clear Search](#) before saving preferences to ensure you do not save any specific words as part of your default preferences.

6. You can hide the [Search Options](#) by clicking the [Hide Options](#) and can toggle back to show them again by clicking [Show Options](#) link.

## Searching and Inserting

There are several ways to search for text:

- Searching with the [Viewer](#) by highlighting a word or phrase and clicking the binoculars
- Searching with the [Viewer](#) by entering text into the [Viewer Search text box](#).

- Entering text directly into the [Search](#) field
- Pasting copied text into the [Search](#) field.
- Searching for nothing (search field is empty) brings back all documents according to any options selected.
- Search using the asterisk (\*) as a wild card. For example, searching invest\* returns all documents with any form of the word to include invest, investing, investment, investments, etc.

### ✓ TIPS

- ❖ Remember to select your [Search Options](#) before searching.

## Insert Full or Insert Selected

### *Searching with the Viewer*

The Viewer is a floating toolbar that allows you to select text from any application that is open on your desktop. To search with the Viewer:

1. From the proposal [Dashboard](#), choose the proposal you want to respond to.
2. Click [Edit Proposal](#) to open the Word document.
3. From your open Word document, highlight the text you wish to search for.
4. Click the [Binoculars](#) icon on the [PMAPS Viewer](#).

If you have already logged in and checked the [Remember Me](#) box, it automatically performs the highlighted search. Otherwise, it brings you to the logon screen and once you have logged in, it will perform the highlighted search.

5. Select the answer you want to use.

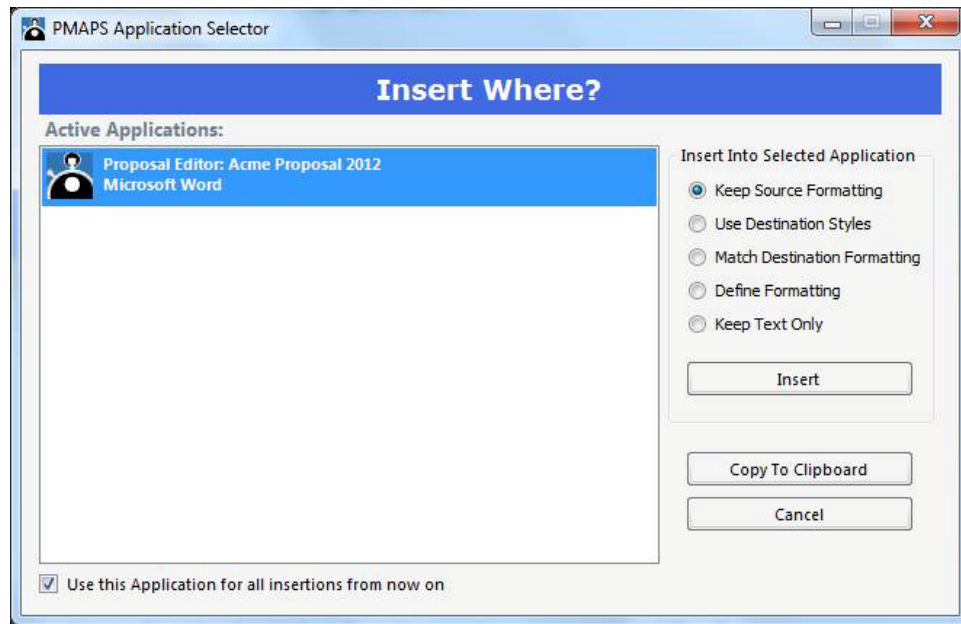

6. Choose [Insert Document](#)  to insert the complete answer from the database record.

OR

7. Highlight text and choose [Insert Selected Text](#)  to insert only the highlighted portion of the answer. .

## Application Selector

The first time you select an insert option, the Application Selector is automatically launched. The [Application Selector](#) opens and lists all currently open documents from your local computer.

8. Choose the proposal you are working on.
9. Check the box to [Use this Application for all insertions from now on](#) if you plan to continue working on the selected document. This will allow you to skip past the application selector step until you have saved and closed the proposal you are working on and moved on to another document.
10. Under [Insert Into Selected Application](#), select an insertion option. All of these options depend upon Word to format as selected. This is outside the control of PMAPS. The following are the descriptions of each option, as defined in Word.

- [Keep Source Formatting](#)

This option retains the look of the copied text by assigning the Normal style to the pasted text and applying direct formatting. Direct formatting includes characteristics such as font size, italics, or other formatting to mimic the style definition of the copied text.

- [Use Destination Styles](#)

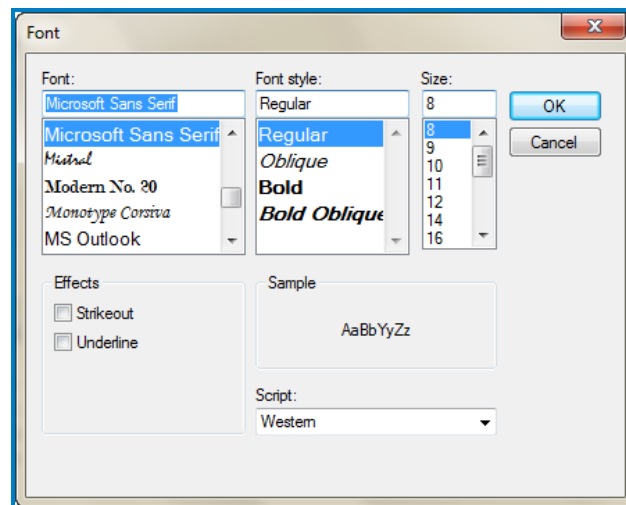

This option retains the style name that is associated with the copied text, but it uses the style definition of the document where the text is being pasted. For example, you copy Heading 1 text from one document to another. In one document, Heading 1 is defined as Arial bold, 14-point, and in the document where you are pasting the text, Heading 1 is defined as Cambria bold, 16-point. When you use the Use Destination Styles option, the pasted text uses Heading 1 style, Cambria bold, 16-point.

- **Match Destination Formatting**

This option discards the style definition and most formatting that was applied directly to the copied text, but it retains formatting that is considered emphasis, such as bold and italic, when it is applied to only a portion of the selection. The text takes on the style definition in the document where the text is being pasted.

- **Define Formatting**

Brings up a window which allows the user to define the font, size, color and other formatting option including establishing indentation for that insert. However, this screen is displayed for each insertion.

- **Kept Text Only**

This option discards all formatting and non-text elements such as pictures or tables. The text takes on the style characteristics of the paragraph where it is pasted and takes on any direct formatting or character style properties of text that immediately precedes the cursor when the text is pasted. Graphical elements are discarded, and tables are converted to a series of paragraphs.

11. Click **Insert**. The answer is inserted into the chosen document on the first blank line below the question you were searching in. It also inserts an extra blank line for spacing between the question and the answer. You are returned to the selected document to continue searching.
12. Repeat Steps 1 through 6 to complete your document.

As long as the [PMAPS Viewer](#) and [IE](#) remain open, the [Application Selector](#) is not launched for subsequent inserts. The application selector automatically inserts into the document you selected until you close Internet Explorer or the PMAPS Viewer. After you close IE or the PMAPS Viewer, the very next time you click on one of the insert buttons or the preview button, the Application Selector is launched again for you to select the document you are working on to insert answers into.

## ✓ PMAPS VIEWER TIPS

- ❖ The first time you launch the Viewer after any installation or after any Viewer update installation, if the applications prompts you to, launch it from the Start Menu > All Programs > PMAPS Viewer. Otherwise, launch normally.
- ❖ Create a shortcut on your desktop by right-clicking on the PMAPS Viewer and selecting Send To>Desktop (create shortcut).
- ❖ If you find that a new Internet Explorer tab or window is being opened which each new search, go to your Internet Explorer>Tools>Internet Options>Tab Settings to change settings.
- ❖ When using the Viewer to search when working in an Excel document, you cannot highlight a word and click the binoculars as you would in Word. Beginning in version 8.3, the PMAPS Viewer includes a Search Text Box. Just type in or copy/paste the word or phrase you wish to search for, then click the binoculars to launch the Search.
- ❖ For Web or online forms, they will not appear in the Application Selector screen. You may highlight text from the form, paste it into PMAPS' Search field, locate your record, copy text from preview, and paste it into the form.
- ❖ Any time you want to work on a different document or application, save your proposal and close it. Or save your proposal and close the Viewer.
- ❖ If you prefer to hide the Search bar in the Viewer toolbar just right-click on the PMAPS icon and select Hide Search Text box from the options.

## Inserting from Preview

If you need to preview a document to decide whether or not it's the one you want to use or if you want to insert selected text that retains your formatting, you can preview it and then insert while you are in [Preview](#) mode. You can preview Word, PowerPoint, or PDF files. There are two ways to launch [Preview](#).

1. The [Preview](#) icon is the very first icon on each row of the [Search Results](#) grid.

- The [Preview](#) icon is also available on the [Search](#) tools menu bar above the [Hypertext](#) field.

## Preview Options

The first group of icons is for insertion:

You may highlight text in the preview mode and insert that text into your proposal by clicking the [Insert Selected Text](#)  icon.

You may also use the [Insert Document](#)  icon to insert the entire answer into your proposal. The second group of icons is for the Pitch Book. To learn what those icons are for, click on the [Pitch Book](#) link.

The third group of icons is for the Compliance module. To learn what those icons are for, click on the [Compliance](#) link.

### ✓ TIPS

- ❖ If you are working on a Word questionnaire, check the Use this Application for all insertions from now on box.

You may also launch the [PMAPS Viewer](#) through the [Start Menu](#). Go to your Start Menu > All Programs > PMAPS Viewer.

- ❖ [Copy to Clipboard](#) allows you to copy text selected from within the hypertext field to your document clipboard for future pasting. If you are working in Clipboard mode, each time you insert PMAPS will bring up the Application Selector.

## Search & Insert Manually – Outside of the 'Cloud'

- Open a Word document.
- Copy a word or phrase out of the question or identify what you want to manually type into the [Search](#) field.
- Select the location where you want the answer inserted by clicking in that area.
- Click on the Web icon  in your systems tray. It probably displays at least part of the words Proposal Software. The entire name won't be displayed, unless that is the only application open on your desktop.

5. Paste or enter the word or phrase into the [Search](#) text field.
6. Press [Enter](#) on your keyboard or click the [Search](#) button.
7. Once you identify the response you would like to use for your document, click the [Insert Full](#)  icon. The [Insert Full](#) option inserts all contents of the record file, excluding the question area which is from the top of the document to the first occurrence of two hard returns. The text is inserted with all applied Word styles.

Or

8. If you only need part of the answer, highlight the text you need, and click the [Insert Selected](#)  icon.

#### ✓ TIPS

- ❖ The [Insert Selected](#) option from the Hypertext field does not insert any graphics or styles applied to the text. The text is inserted according to the text of the paragraph at the point of insertion. So, even though your documents is formatted using Times New Roman, if the insertion point is using Arial, your text is formatted in Arial. It may be quicker for you to use Insert Full, and then delete the text you do not want to include.
  - ❖ If you [Insert Selected from Preview](#), it does bring the graphics and keeps the record's formatting.
9. Before the answer is inserted, you must choose the application/document you want the answer inserted into using the [Application Selector](#).

## Other Search Features

### *Inserting in Excel*

After performing the Search and locating the response you need:

1. Open the selected record by clicking the [View Document](#) icon.
2. In your Excel Document, click into the cell where you wish to have the text inserted
3. In the PMAPS record, select text you want.
4. Click the [Insert Selected](#) icon. The [Application Selector](#) will open. Select your Excel document and click [Insert](#).

If this does not produce the desired results, you can copy text from preview and paste it into the formula bar or directly into the cell.

## ✓ TIPS

- ❖ It is recommended that you use the [Insert from Preview / Insert Selected](#) steps outlined above for best results. [Full Insert](#) can be used, but be aware of Excel character limits which may cause your answer to be truncated upon insert.
- ❖ If you have stored Excel responses on the [Forms](#) tab, shorten the label for the checkbox as in the example below. Then, in your results view, [Modify Columns](#) to include the attribute. If a short answer exists it will for a given result a value of [True](#) will be shown on the results screen.

## Word Replacements

The [Word Replacements](#) (Codes) feature works with any Word document inserted full or selected text into the RFP. This will only work if the RFP is in the “cloud.” Word replacements occur automatically during the insertion into the RFP.

The codes are created in the [Admin](#) module under [Word Replacements](#). See [Admin](#) manual for instructions on creating codes.

Add New			
Keyword	Replacement		
<<AUM>>	\$500,523	Edit	Delete
<<AO Date>>	12/22/2010	Edit	Delete
<<lead sales>>	Proposal Tracking Field: Sales Manager	Edit	Delete
<<Sales Rep>>	Proposal Tracking Field: Sales Manager	Edit	Delete
<<FI-accountbalanceLOW>>	\$5	Edit	Delete
<<EQ-accountbalanceHIGH>>	\$37	Edit	Delete
<<number-municipal-accounts-equity>>	28	Edit	Delete
<<number-municipal-accounts-fixed>>	20	Edit	Delete

1. Add the code **PSI** in one of your search documents. This must exactly match the entry in the Word Replacements table in the [Admin](#) menu. Check with your DBA to find out which code you should be testing.
2. Choose an RFP from the Dashboard by clicking on it.
3. Click the Edit icon  to open the proposal.

	Date Entered	Date Due	Proposal Name	Region	Strategy	Asset Class	Last Edited	Vehicle/Product
	11/16/2009	12/4/2009	some proposal	Retail	Enhanced Core	Blend - FI & Equity	11/16/2009	
	11/24/2009	12/31/2009	Acme - RFP Phase 1	USA	Large Cap Growth	Equity - Domestic	11/25/2009	
	11/16/2009	12/4/2009	Acme Co RFP	Institutional	Core Fixed Income	Blend - FI & Equity	11/16/2009	

4. Place your cursor in the RFP where you want the answered.

5. Verify that the dashboard reflects the name of the proposal you are working on.

6. Click on the [Search](#) module icon  [Search](#).
7. Select the record with the [PSI](#) or other code in it.
8. Click [View](#).
9. Select the paragraph containing the code and click [Insert Selected](#).

Our Company, Buffalo Health, continues to work with its provider partners in developing systems that serve to enhance the delivery of quality clinical care. Our firm's efforts are again marked by the collaborative establishment of well-defined, measurable outcomes. Our goal is not to impose rigid or prescriptive clinical protocols on providers but we offer great respect to <<prospect-name>> who treat members from multiple plans; but rather, to establish "best practice" guidelines, coupled with measurement of standardized indicators and reporting of clinical outcomes. We have designed Our Company's Provider Profile, Quality Index, and disease management programs to accomplish just that.

10. When you are automatically taken back to your open RFP, verify that the code has been replaced with the Prospect's Name.

Our Company, Buffalo Health, continues to work with its provider partners in developing systems that serve to enhance the delivery of quality clinical care. Our firm's efforts are again marked by the collaborative establishment of well-defined, measurable outcomes. Our goal is not to impose rigid or prescriptive clinical protocols on providers but we offer great respect to **Acme** who treat members from multiple plans; but rather, to establish "best practice" guidelines, coupled with measurement of standardized indicators and reporting of clinical outcomes. We have designed Our Company's Provider Profile, Quality Index, and disease management programs to accomplish just that.

## Save Search

[Save Search](#) allows you to apply as many filters as you like and then save the search to be used whenever you need it. This is particularly useful if you are responsible for answering proposal questions for a line of business or region, specific product, vehicle, strategy, etc. To use this tool:

1. Use [WebPro Filters](#) to apply your desired filters.

2. Click the [Save Search](#)  icon.

3. When prompted, enter a name for your filter.
4. Click **OK**.

## Open Saved Search

When it's time to use one of the searches you saved, **Open Saved Search**  allows you to choose a saved search from a pick list.

1. Click the Open Saved Search  icon
2. Select your **Saved Search** from the list.

## ✓ TIPS

- ❖ Hovering over any of the search buttons displays a help balloon describing the function of that button.
- ❖ Your search term(s) will be highlighted in the preview text on the results screen. Additional words that contain your search term may also be highlighted. For example if you search the word “implement”, your search results will only show records that contain the word “implement”, however if the word “implementing” is also in the record, you will see it highlighted in the preview text as well.

## Delete Saved Search

Users may delete their own Saved Searches. When a user clicks on **Open Search**, it displays only that user's list of saved searches. The user also receives a warning prompt them that it will delete the auto-Verification if one exists based on the filter they are deleting.

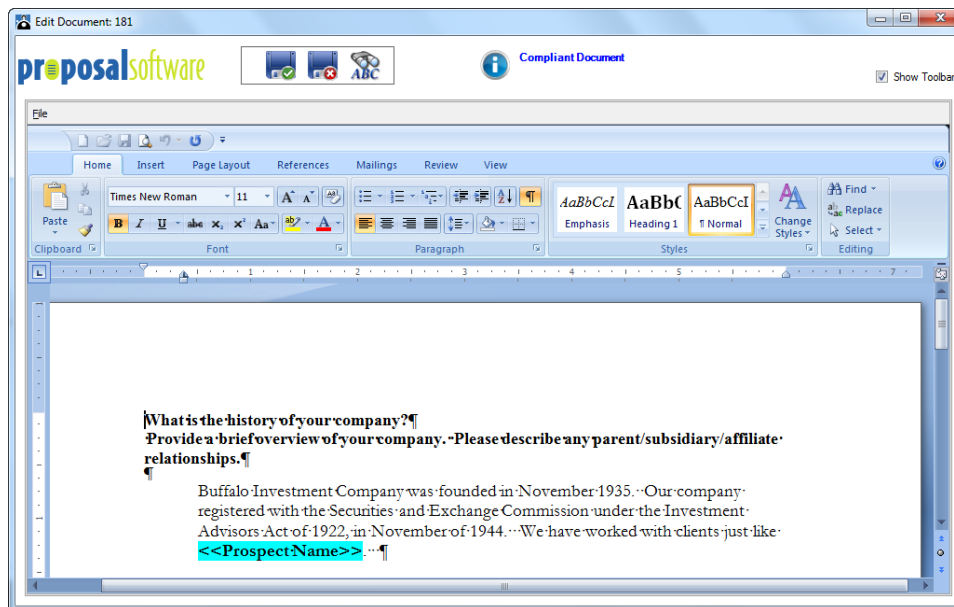

## Edit Documents

1. Select the record you want to edit. The record text appears in the [Hypertext](#) field, and the attributes are highlighted in the [Search Results](#) grid.

2. Click the [Edit](#) icon.

The edit screen is displayed:

3. Make changes to the document.
4. Click [Save](#) . If you decide not to save the changes, click [Cancel](#) .
5. Click on the [Attributes](#) tab and make any edits to the attributes.

For example, if you have updated or verified the record's accuracy, update the Date Last Verified. If you have not verified the record but corrected grammar or a typographical error, the date the Word document was last edited is automatically captured on the History tab.

6. [Save](#) your changes to the Attributes tab, if necessary.

## Delete Documents

To remove a Q&A Document from your database:

1. Select the document by clicking on it in the [Search Results Grid](#). The record's text is displayed in the hypertext field.

2. Click the [Delete Document](#) icon.

## Add New Documents

PMAPS WebPro offers multiple ways to add content. Users can add new Q&A records from an open Dashboard document, as described in SmartAdd. Users can also add new Q&A records from the Search module, with options to use a specific Word template. Additionally, at your Administrators discretions WebPro users can also add PowerPoint, Excel and Adobe PDF files to the Search module through the Add New Record function.

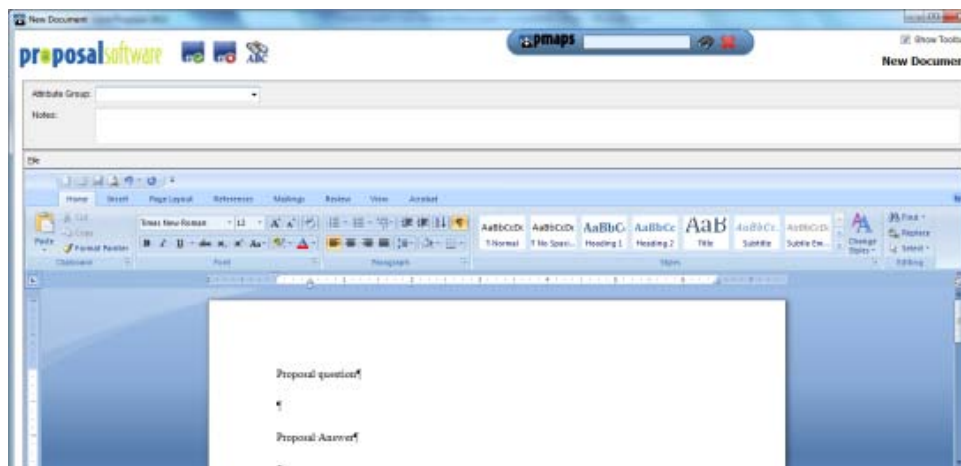

## SmartAdd

Working within an RFP in the cloud, users can now highlight a question and answer pair and add it to the Search database using the [Smart Add](#) feature with just a few clicks.

1. In the [Proposal Editor](#) window, highlight the question and answer you wish to add.

2. Click [Add Q&A](#). WebPro will open a new database document and automatically paste your selected text into it being sure to add two hard returns after the question text as shown. You may also format the records as needed during this step.

3. Select an [Attribute Group](#).

4. Enter any notes you like, which will be inserted into the [Notes](#) tab of the record.

5. Click [Save](#) .

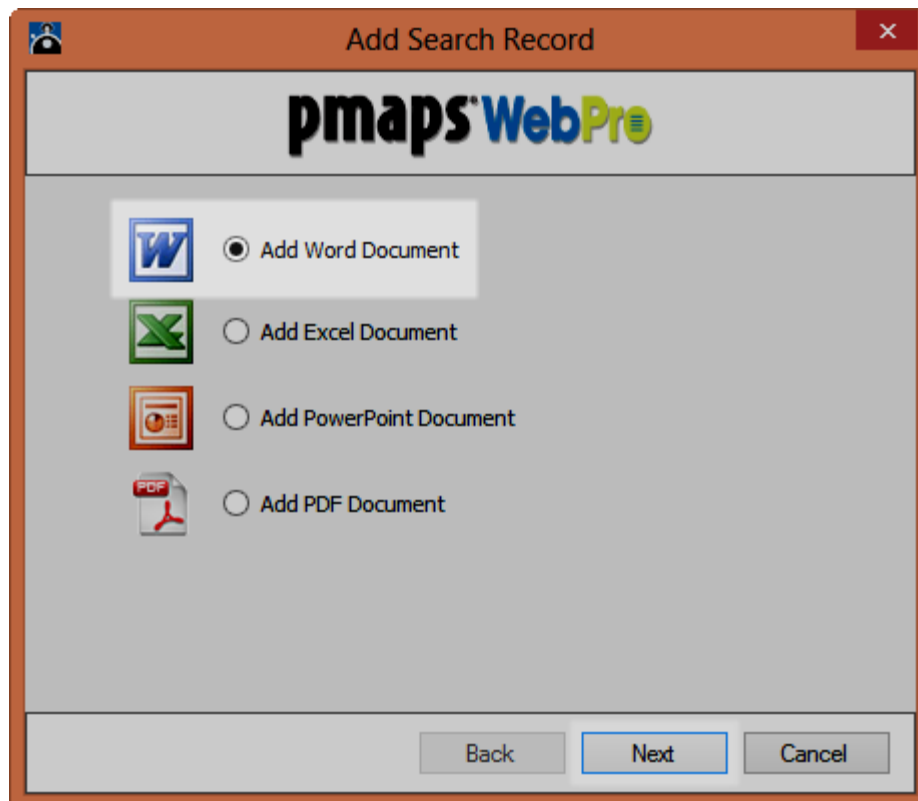

## Add New Record

To add new content from the Search Module:

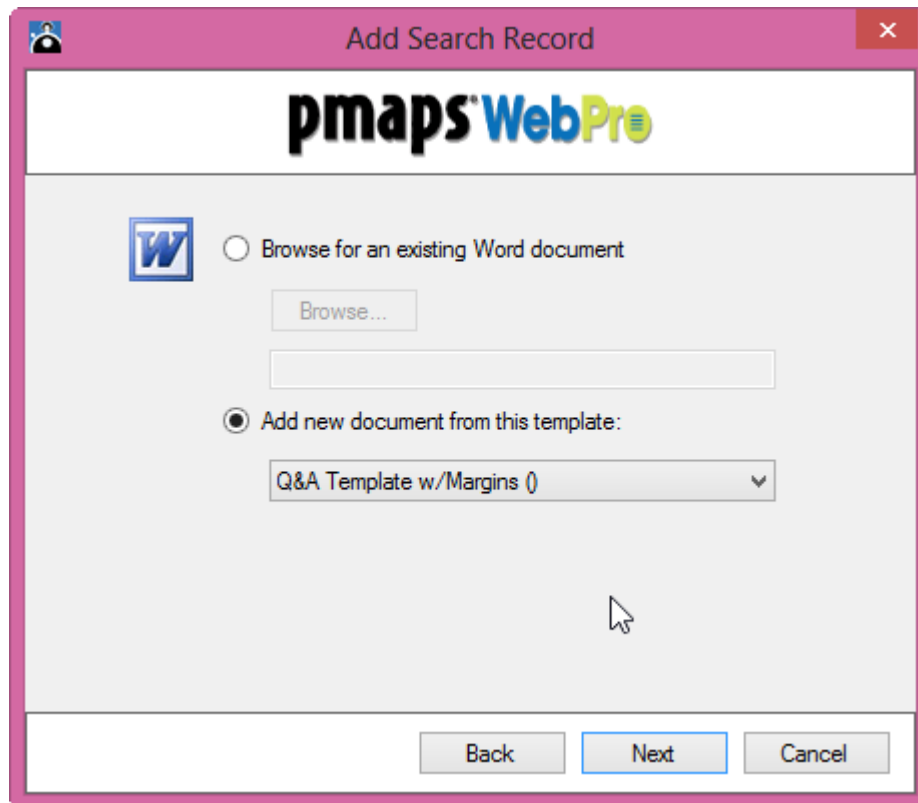

1. Click the [Add New Record](#) icon.

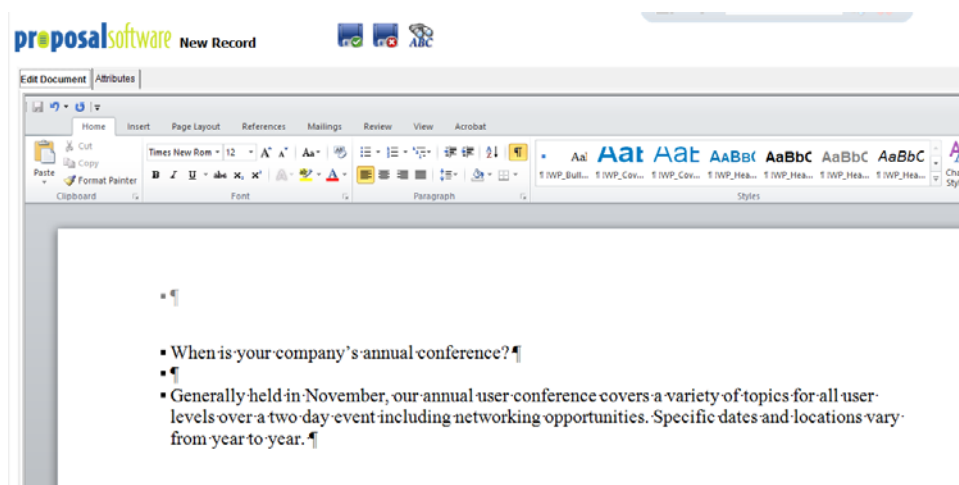

2. You will first need to select the document type you wish to add. In this example we are adding a typical proposal Q&A type of document using Word. Then click [Next](#).

3. Choose whether you want to upload an existing document from your computer by selecting the Browse button or choose from a Template to open a blank document in PMAPS. In this example, we have chosen a Template from the drop-down list. For more on Templates please see our Administrator Manual.

4. WebPro will open a new PMAPS document with two tabs. In the [Edit Document](#) tab, you will type or paste your new Q&A content, making sure to place two hard returns after the question.

- Then, click the [Attributes](#) tab (or use the arrows to navigate).
- Select an [Attribute Group](#) from the drop down list. See [Creating Attribute Groups](#) for more information.

WebPro Attributes

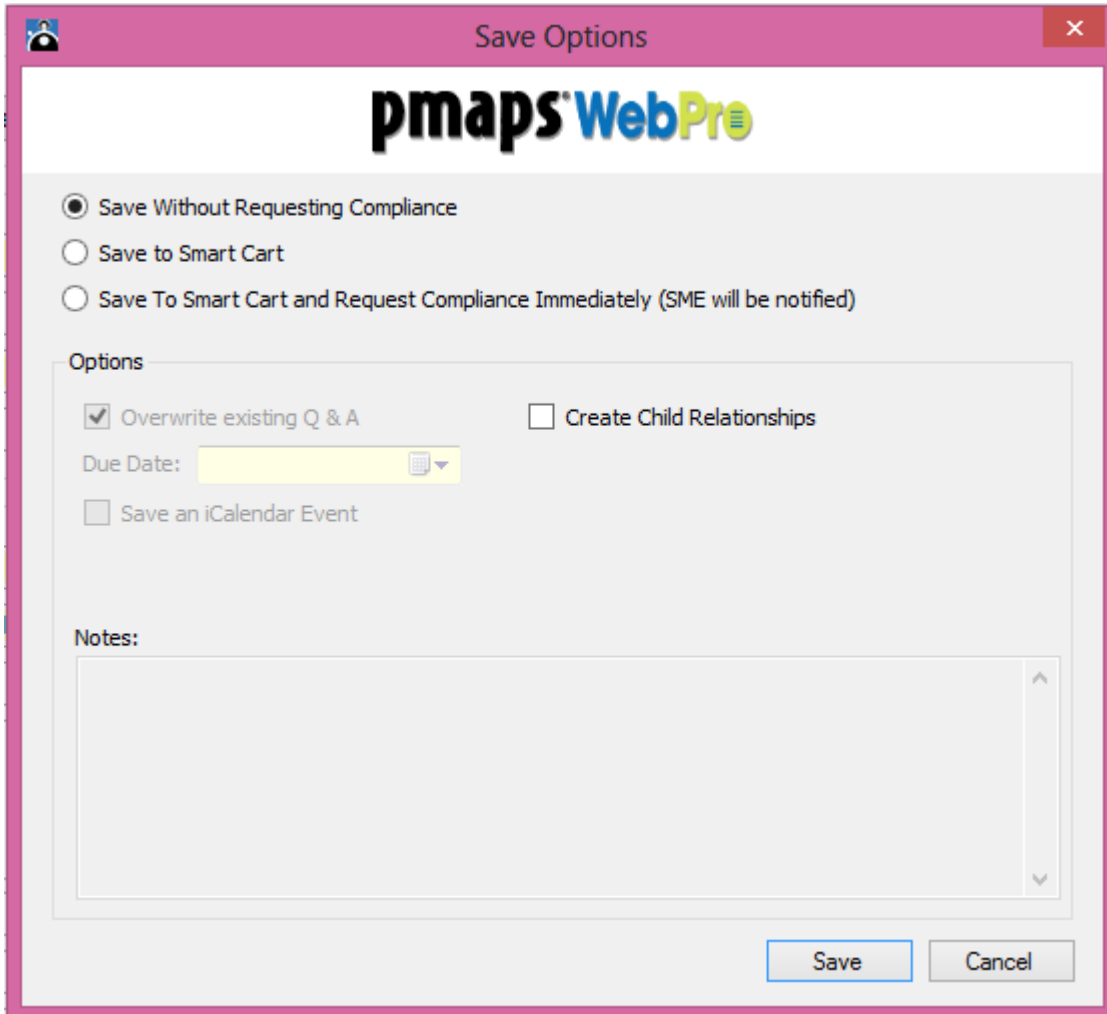

Q\_A: ☒

Be sure to check the box for Q&A at the bottom of the Attributes tab. This ensures PMAPS will insert only the Answer portion of your record into an proposal or other active document.

WebPro Attributes

Q\_A: ☒

7. Click **Save**. The Save Options Window will be displayed. The radio button **Save Without Requesting Compliance** will be the default selection and if you are simply adding a new piece of content which has already been approved for use, just click the Save button to complete adding the record.

The image shows a 'Save Options' dialog box for 'pmaps WebPro'. The dialog has a pink title bar with a close button. Inside, the 'pmaps WebPro' logo is at the top. Below the logo are three radio buttons: 'Save Without Requesting Compliance' (selected), 'Save to Smart Cart', and 'Save To Smart Cart and Request Compliance Immediately (SME will be notified)'. Under the 'Options' section, there are checkboxes for 'Overwrite existing Q & A' (checked), 'Create Child Relationships' (unchecked), 'Due Date:' (with a date picker), and 'Save an iCalendar Event' (unchecked). A large text area for 'Notes' is at the bottom. At the very bottom are 'Save' and 'Cancel' buttons.

#### TIPS:

- ❖ You can also add Excel, PowerPoint and PDF files directly to your WebPro database now through the Add New Record function. Just select the file type you wish you add in step 2 above.
- ❖ When adding PowerPoint files, you will be given the option to add the entire file as one record to add each slide as an individual record with the same attributes.

## Download/Checkout and Upload Documents

### Download/Checkout Documents

In Version 9, we created new functionality to allow users to use their Viewer to download documents directly from the Search results page to bypass both the Smart Cart and the Indexer. To download or checkout documents:

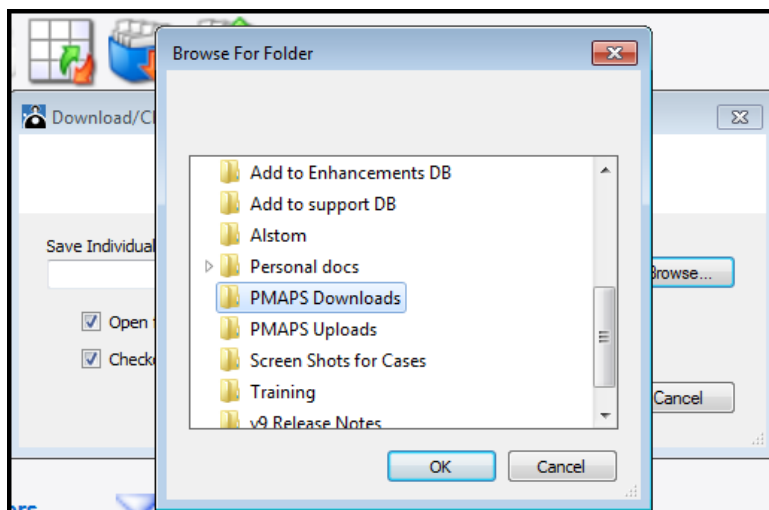

1. From the Search module, identify the records you wish to download, and then click the [Download/Checkout](#) icon.

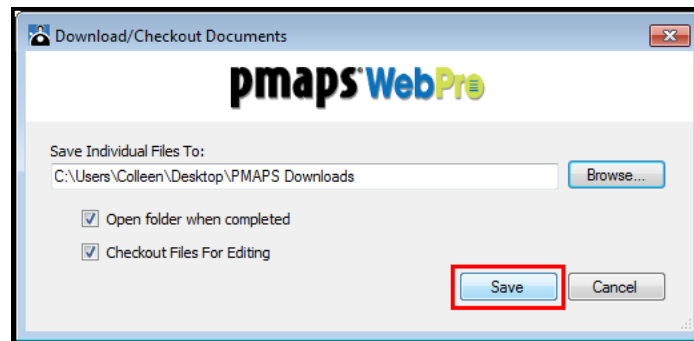

2. When prompted to confirm the number of documents for download, click [OK](#) to proceed or [Cancel](#) to modify your selection of records.

3. At the prompt, click the [Browse...](#) button to select the folder where you would like to download the documents. By default, the option to [Open folder when completed](#) is checked. If you would like to upload changes to these documents, check the [Checkout Files For Editing](#) option, then click [OK](#).

- Click the [Save](#) button to download/checkout the documents.

- Each document's file name will be the [Document ID](#) number plus the text in the [Summary](#) field.

Name	Date modified	Type	Size
148858 PSI - Why Choose PMAPS.ppt	8/12/2013 4:51 PM	Microsoft Office P...	648 KB
148859 Profit and Loss.doc	8/12/2013 4:51 PM	Microsoft Office ...	32 KB
148881 History of the firm.doc	8/12/2013 4:51 PM	Microsoft Office ...	37 KB

Note that using this option will not activate Track Changes in the downloaded documents and these documents cannot be processed through the Smart Cart. These documents must not be renamed if planning to use the Upload Documents feature to make changes.

### *Upload Documents*

Only documents that have been extracted from PMAPS using the [Download/Checkout](#) option may be uploaded using the [Upload Documents](#) option. If the document name has been changed, the upload will be unsuccessful.

To update documents that were updated offline after downloaded/checked out:

- Place only the documents you wish to upload into a folder designated for this purpose.
- From the [Search Results](#), click the [Upload Documents](#) icon.

- By default, the [Upload checked out documents](#) option is selected. Click [Browse...](#) to locate the folder containing the documents to upload.

4. Open the folder containing the documents to upload, then, select those to be uploaded and click [Open](#). You may upload multiple documents at once.
5. Once the window refreshes to display the files selected for upload, click the [Upload](#) button.

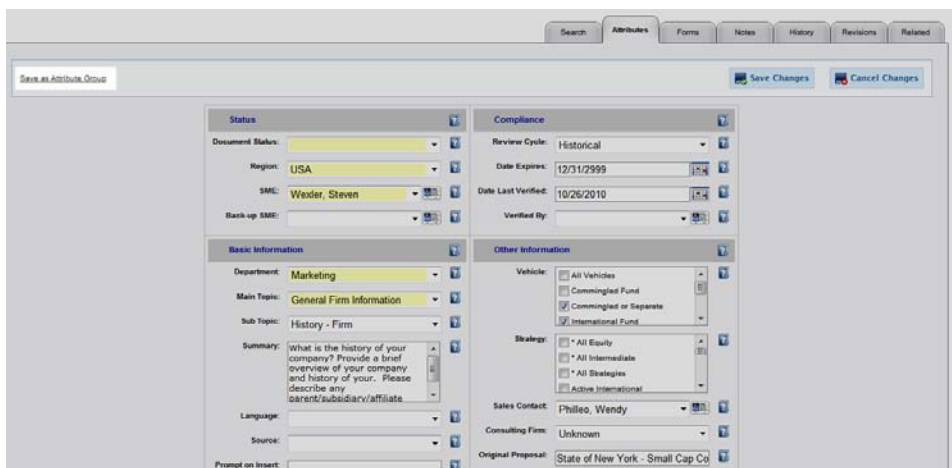

6. Each document is uploaded, replacing the original with the revisions or updates.

Note that revisions are tracked automatically on the [Revisions](#) tab.

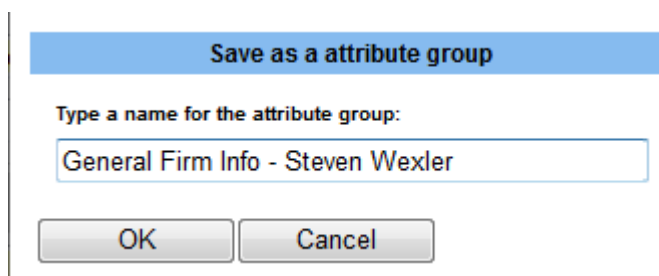

## Create an Attribute Group

Attribute Groups allow you to save commonly used sets of attribute data as groups to shorten the time it takes to add a new record to the database. To add an attribute group to the library:

1. Locate a record in your database that has a set of attributes that you'd like to save.
2. Click [Save as Attribute Group](#).

3. Enter the name for your [Attribute Group](#).

A message that your Attribute Group has been successfully saved appears.

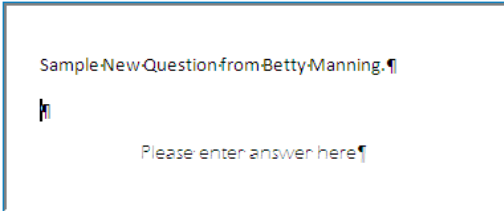

### ✓ TIPS

- ❖ All Attributes created by all users appear on one list.
- ❖ If you have different business units creating Attribute Groups, consider beginning each attribute group with a business unit code to keep items listed for each business unit grouped together in alphabetical order.
- ❖ For Attribute Groups that everyone uses, e.g., General Firm Information, consider beginning those with an \* to sort them to the top of the list.

## Add a New Document to the library with a placeholder in your questionnaire

When you encounter a new question that is not in the database and for which you need to gather an answer you will

1. Click [Edit](#) Proposal to open it.
2. Highlight the sample question.
4. Copy the question.
5. Click on the [Search](#)  module icon in the Navigation bar at the top of the screen.
6. Click [New Document](#). .
7. Paste the question into the new blank Q&A record.
8. Press your Enter key (on your keyboard) twice to properly format the question and answer areas.
9. Enter [Please enter answer here](#) as a placeholder for the answer. Apply any other formatting you choose at this time.

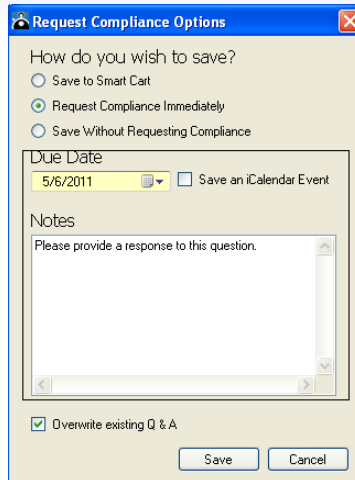

Sample New Question from Betty Manning. ¶

¶

Please enter answer here ¶

10. Click on the [Attributes](#) tab or use the arrows to navigate.
11. Fill out the Attributes—one field at a time – by selecting from the drop-down lists or entering/selecting dates. Or select an [Attribute Group Template](#). All mandatory (yellow) fields must be completed.
12. Click [Save](#).
13. Click the radio button [Request Compliance Immediately](#).

14. Enter the [Due Date](#). This field is mandatory.
15. Enter a note for the recipient.
16. The [Overwrite Existing Q&A](#) box is checked. Do not uncheck this box.
17. Click [Save](#). This processes the record through the SmartCart. The compliance email template is generated, the record is attached to that email as a Word document and the email is sent to the SME you assigned in the Attributes.
18. Go back to the open proposal by clicking on the [Proposal Editor](#)  icon in your task tray.
19. Locate the question you just added to the database. We are going to link this question to the record to automate insertion once we get the response back.
20. Go to the end of the question and press your keyboard Enter key twice to create a line to insert the answer placeholder into.
21. Highlight the question you just added to the database.
22. Click the search [binoculars](#)  on the [PMAPS Viewer](#) applet
23. Select the question you just added to the database by clicking on it.

24. Click [Insert Full](#).
25. Choose [Use Destination Styles](#).

27. Click [Insert](#).

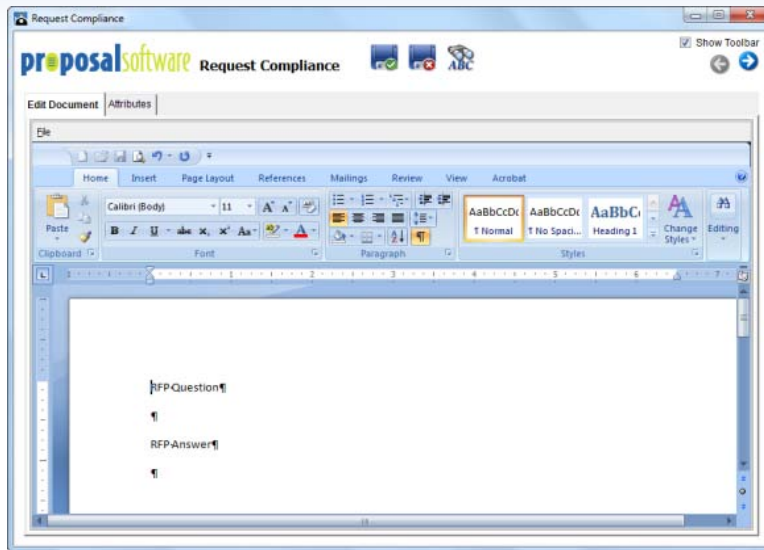

26. Click [Save Proposal](#) .

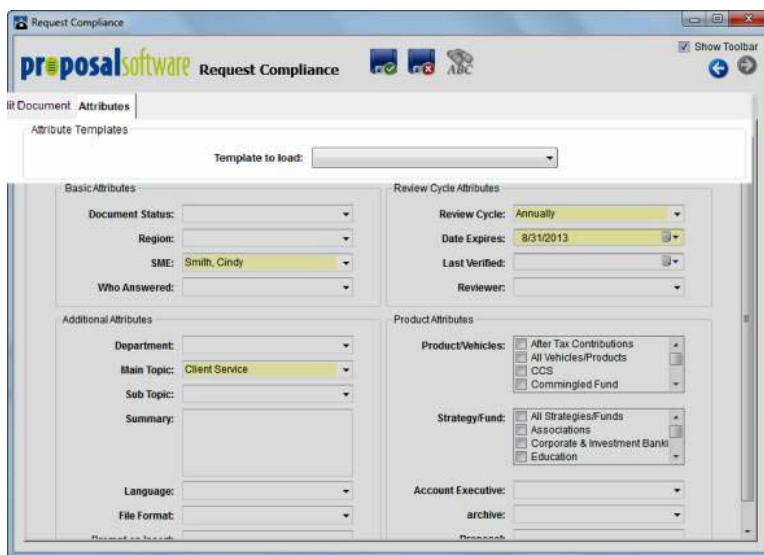

27. Close [Edit Proposal](#)  screen.

## Add a New Document (Need Answer)/Requesting Compliance

1. In the [Search](#) module, click the [New Document](#)  icon. A new, blank Word document is displayed.
2. Either type or copy and paste the question into the blank Word document. Press Enter twice to place two hard returns, then enter an answer placeholder.

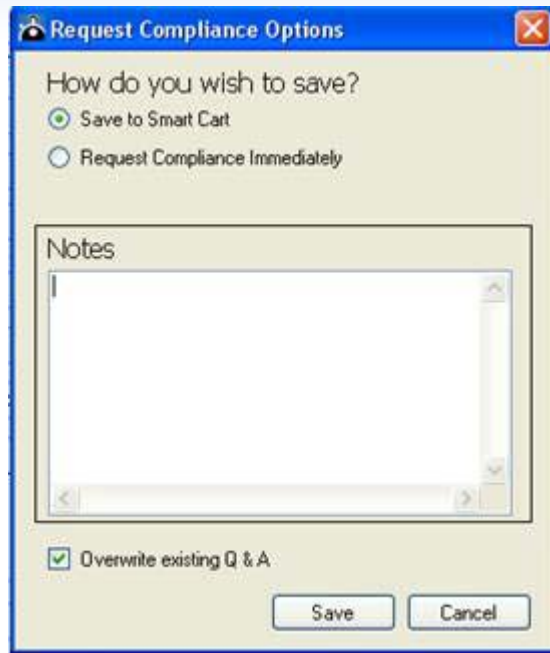

3. Click the [Attributes](#) tab or use the arrows in the upper right. Apply attributes individually, or select an [Attribute Template](#).

5. Click [Save](#).
6. Click the radio button to [Save to SmartCart](#).
7. Enter a note, if applicable, to be included in the email to the SME.
8. The [Overwrite existing Q&A](#) box is automatically checked.
9. Click [Save](#).

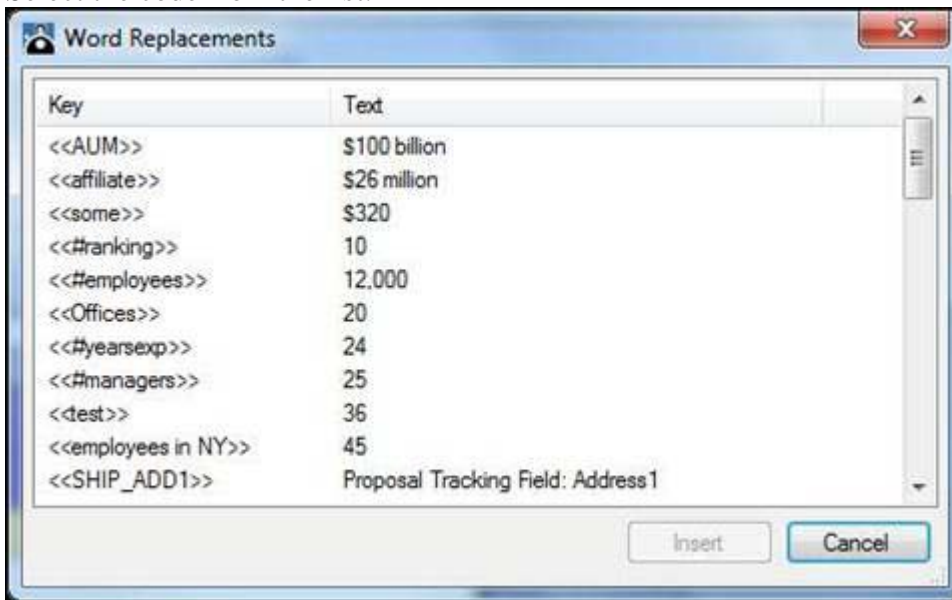

## Add a New Document with Word Replacement Codes

If you are using Word Replacement Codes, you may select a code in the New Document screen to insert into a new Q&A that you want to add to PMAPS.

1. Click the [New Document](#)  icon. The new, blank Word document is displayed.
2. Paste your Q&A.
3. Click on the [Word Replacement Codes](#)  icon.

4. Select the code from the list.

5. Click [Insert](#).
6. Click Next.
7. Choose an [Attribute Group](#) or select individual attributes. .
8. Save.
9. Choose [Save without Requesting Compliance](#).

## Sending Documents to SMEs for New Answers or Updates

### *Requesting Compliance Immediately*

Instead of storing items in the [SmartCart](#) to send all at once, you can request compliance instantly using the same method as [SmartCart](#).

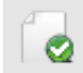

1. Locate the document you want to request compliance on.
2. Click [Preview](#) mode. The following toolbar is displayed:

The third toolbar offers Compliance/SmartCart activities. Hover over each icon with your mouse to display the function of the icon.

3. Choose the [Request Compliance](#) option you want to use for this particular document.

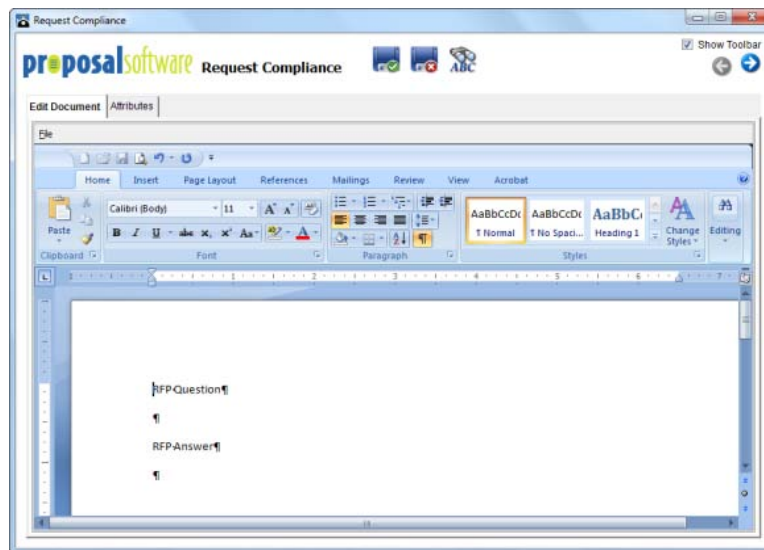

- [Request Compliance On Selected](#)  . Highlight the text you want to submit, and click this icon.

- [Request Compliance On Page](#)  . Submits the current page for compliance. Please note that for PowerPoint, it will insert the slide as an object into a Microsoft Word document.

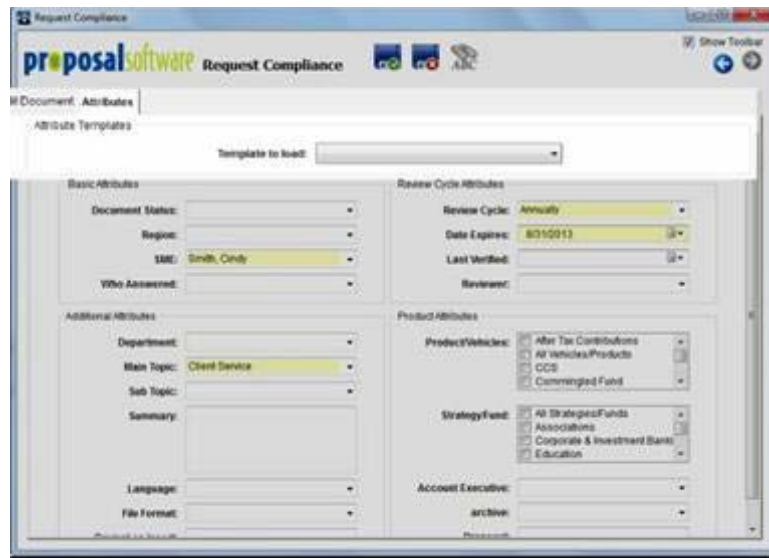

- [Request Compliance On Document](#)  . Submits the entire document for compliance. Please note that for PowerPoint, this option is not available.

Whichever method is used, the same compliance options are activated. The selected text, page, or document will be placed in a new Microsoft Word document.

4. Review the [Edit Document](#) tab and make any necessary changes or comments.

5. Click the [Attributes](#) tab or use the arrows in the upper right.

The screenshot shows the 'Request Compliance' window with the 'Attributes' tab selected. The window is divided into several sections: 'Basic Attributes' (Document Status, Region, SME, Who Answered), 'Review Cycle Attributes' (Review Cycle, Date Expires, Last Verified, Reviewer), 'Additional Attributes' (Department, Main Topic, Sub Topic, Summary, Language, File Format), and 'Product Attributes' (Product/Vehicles, Strategy/Fund, Account Executive). The 'SME' field is populated with 'Smith, Cindy', 'Date Expires' with '8/1/2013', 'Main Topic' with 'Client Service', and 'Product/Vehicles' with 'All Tax Contributions', 'All Vehicles/Products', 'CCS', and 'Commingled Fund'.

6. Apply/Edit attributes specific to the document.
7. Click [Save](#).
8. The [Request Compliance Options](#) box appears.
9. Click [Request Compliance Immediately](#).

The screenshot shows the 'Request Compliance Options' dialog box. It contains a section 'How do you wish to save?' with two radio buttons: 'Save to Smart Call' and 'Request Compliance Immediately' (which is selected). Below this is a 'Due Date' section with a date field set to '8/14/2009' and a checkbox for 'Save on iCalendar Event'. There is also a 'Notes' text area and 'Save' and 'Cancel' buttons at the bottom.

10. Enter the [Due Date](#). This field is required.
11. Enter a note. The notes are displayed, along with other information about each record, in the file that the SME receives from you. This note directs the SME how to handle each record. You can let the SME know that this is a new question that you need an answer for or that the record has expired and you need them to review it.
12. Click [Save](#).

13. The compliance document is assembled, added to the [SmartCart Sent](#) folder, emailed to the assigned SME and you are returned to the previewed document. The assigned SME receives an email with the document created as an attachment.

14. Close the active [Preview](#) and return to [Search](#) by clicking the Windows close icon .

Or

15. Toggle back to [Search](#), leaving the [Preview](#) window open.

### *Requesting Compliance—Sending from the SmartCart Pending Tab*

1. Locate the document you want to request compliance on.

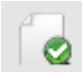

2. Click [Preview](#) mode. The following toolbar is displayed:

The third toolbar offers Compliance/SmartCart activities. Hover over each icon with your mouse to display the function of the icon.

3. Choose the Request Compliance option you want to use for this particular document.

- Request Compliance On Selected  . Highlight the text you want to submit, and click this icon.

- Request Compliance On Page  . Submits the current page for compliance. Please note that for PowerPoint, it will insert the slide as an object into a Microsoft Word document.

- Request Compliance On Document  . Submits the entire document for compliance. Please note that for PowerPoint, this option is not available.

Whichever method is used, the same compliance options are activated. The selected text, page, or document will be placed in a new Microsoft Word document.

4. Review the document and make any necessary changes or comments.

5. Click the [Attributes](#) tab or use the arrows in the upper right.

6. Apply attributes individually, or select and attribute group.

7. Click [Save](#).

8. The [Request Compliance Options](#) box appears.
9. Click [Save to Smart Cart](#). A [Notes](#) field appears.
10. Enter a note. The notes are displayed, along with other information about each record, in the file that the SME receives from you. This note directs the SME how to handle each record. You can let the SME know that this is a new question that you need an answer for or that the record has expired and you need them to review it.

11. Click [Save](#). This prepares the record to be sent from the [SmartCart Pending](#) tab later on.
- 12a. Close the active [Preview](#) and return to [Search](#) by clicking the Windows close icon .
- Or
- 12b. Toggle back to [Search](#), leaving the [Preview](#) window open.

## VERIFY

### Overview

[Verify](#) allows all users, who have permission, to select groups of documents within the database to export as follows:

1. [Internal Review Only – Create Document\(s\), but do not email or track in SmartCart.](#)

☒ [Internal Review Only - Create document\(s\), but do not email or track in Smart Cart](#)

☒ [Open Documents Using Word](#) ☐ (put all documents in one file)

☐ [Save Documents In Folder](#)

- When you choose this option, you may Open the Documents Using Word or Save them to a folder of your choice. [Do not use this option if you wish to automatically Approve these documents via the SmartCart Inbox.](#)
  - The Internal Review method is ideal if you wish to send records out to someone who will not be returning the records with updates but instead may be approving to the next review cycle (expiration date).
2. [Add to Smart Cart – Send document to SME and adds to SmartCart.](#) This process automatically bundles and emails the documents using the default email text in your system and

☒ Add to Smart Cart – Sends document to SME and adds to Smart Cart

3. [Add to SmartCart Pending Tab](#) – This option adds the selected records

☒ Add to Smart Cart Pending Tab

### **Internal Review (Documents cannot be automatically accepted back into PMAPS)**

1. Select [Search PMAPS only](#) in the search options box.
2. At this point, you may apply any filters you like to narrow down the output. Once the documents you want to export are appearing in the Search Results area continue to the next step.

3. Click the [Verify](#) icon.

4. The [Request Compliance](#) for Multiple Documents screen is displayed.

SME	Document Search ID

6. Select [Add to SmartCart Pending Tab](#) and click [Submit](#). Continue through the [SmartCart Module](#) to finish the process.

## SMARTCARD MODULE

### SmartCart Pending Tab

Any documents you previously added to the SmartCart through a Compliance Request, Verify, or have manually added are ready to be sent out. If you want to add additional documents to your SmartCart, follow the instructions for [Adding Items to the SmartCart](#). If you are ready to process the documents in your SmartCart, you can jump to [Sending SmartCart Items](#).

The Pending tab includes the following information concerning each record shown: Summary, Document ID, Proposal (if selected when user entered search to work on RFP in “cloud,” Owner, Date Added, Auto Verify, Notes, & SME.

## Sending SmartCart Items

1. Click the [SmartCart](#) icon to view items.

The [SmartCart - Compliance](#) screen appears.

View 15 Items per Page	Summary	Document	Proposal	Owner	Date Added	Auto Verify	SME

<input type="checkbox"/>	Describe your best practices workflow	859		Steven Heffler	Wed 11/4/09		He Ste

2. Click the box  in the first column heading to select all documents at one time.

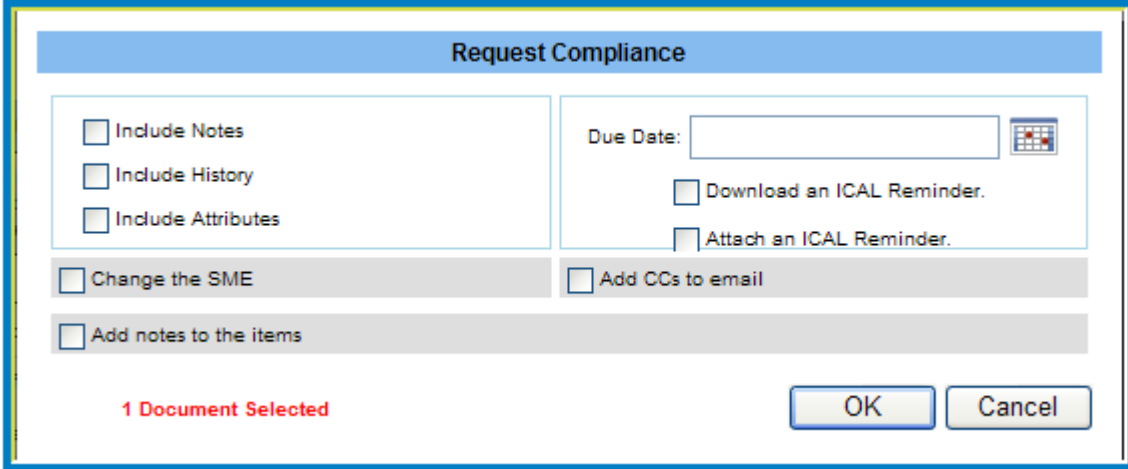

### ✓ TIPS

- ❖ Mouse over the Notes  icon on the grid to view the notes entered for that record in the Request Compliance Options window.
- ❖ Click the box ☐ at the beginning of the row on the grid to select one document at a time. While you may send the documents out one at a time. The application is designed to send the documents in batches so that the recipients receive all their documents bundled in one attachment instead of being peppered with separate emails.

3. Click [Request Compliance](#).

The following dialog box is displayed:

The image shows a 'Request Compliance' dialog box. It has a title bar with the text 'Request Compliance'. Inside, there are several sections. On the left, there are three checkboxes: 'Include Notes', 'Include History', and 'Include Attributes'. Below these are two more checkboxes: 'Change the SME' and 'Add notes to the items'. On the right, there is a 'Due Date:' label followed by a text input field and a calendar icon. Below the calendar icon are two checkboxes: 'Download an ICAL Reminder.' and 'Attach an ICAL Reminder.'. At the bottom right, there are two buttons: 'OK' and 'Cancel'. At the bottom left, there is a red text label that says '1 Document Selected'.

4. Check [Include Notes](#) to include the notes that you entered in Step 10 above.
5. **Do not** check [Include History](#) unless you want to include a report for the usage history of each record within the file you are sending to the SMEs.
6. Check [Include Attributes](#) to include important record information.
7. If you need to change the SME, click to check that box. An internal contact list is displayed allowing you to change the person to whom you are sending the email. It does not change the SME on the record.
8. Click [Add notes to the items](#) if you want to include additional notes.
9. Enter or select a [Due Date](#) from the calendar.
10. Click [Download an ICAL](#) Reminder if you want the Due Date to appear on your local email calendar.
11. Check [Attach an ICAL Reminder](#) if you'd like to send it along with the documents so that email recipients may also have a reminder on their calendar.
12. Click [Add CCs to email](#) if you'd like to send the document not only to the identified contact (SME), but also additional recipients.

## Status when in SmartCart

When any document is in the Smart Cart, a note is displayed to show the user that it is in review. This will be displayed if the person requesting compliance requested it on the entire doc, and choose to overwrite the existing document, not create a new one.

Once the document is returned, follow the process under [SmartCart Inbox](#) for updating documents within your PMAPS application. The update will be reflected automatically in the Search module.

Clicking [Edit](#) icon allows you to open the document for editing.

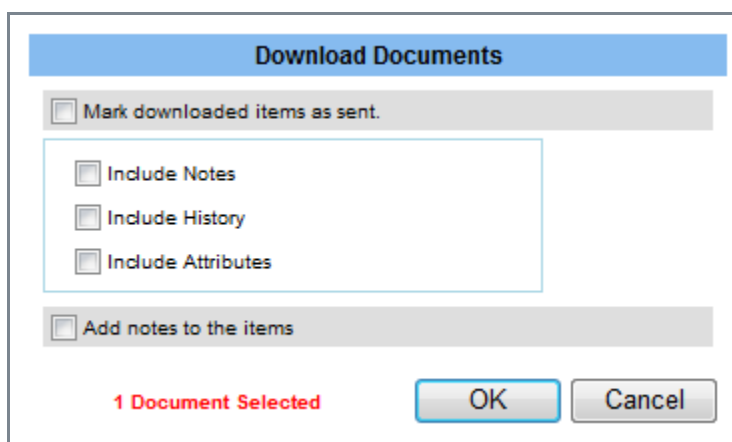

For instructions on editing documents, click this [Editing Documents](#) link.

## Download SmartCart Items

Instead of emailing your documents to the SMEs directly, you may want to download your documents to your computer and manually attach them to emails. To download your documents:

1. Click [Download](#). The following dialog box appears:

2. Click [Mark downloaded items as sent](#) to move the items from the Pending tab to the Sent tab in the SmartCart.
3. Click [Include Notes](#) to include the notes you entered in the [Request Compliance Options](#) window.

4. Do not check **Include History** unless you want to include a report for the usage history of each record within the file you are sending to the SMEs.
5. Check **Include Attributes** to include important record information.
6. Click **Add notes to the items** if you want to include additional notes.
7. Click **OK**.

## Deleting SmartCart Items

To remove items from your SmartCart:

1. Click the selection boxes for the items you want to remove from your SmartCart.
2. Click **Delete**.

## SmartCart Report Export

The Excel Export icon allows you to export a report of the current SmartCart contents. To create this report:

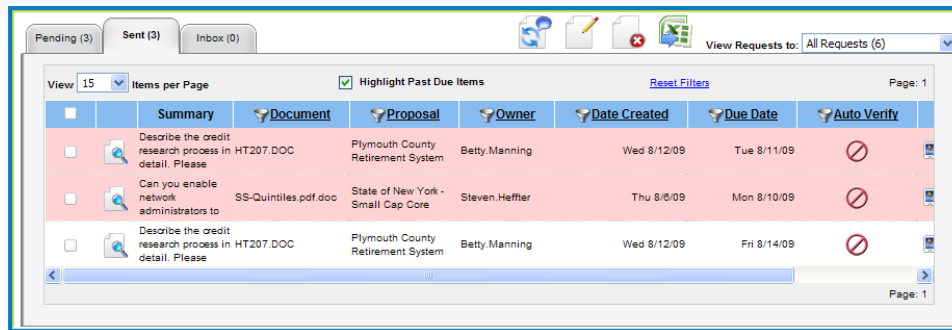

1. Click on the **SmartCart** module icon.
2. Click on the Excel **Export** icon to export the current results to Excel.
3. The report is exported and opened in Excel. The report contains the following columns: Summary, Document (name and path), Proposal Name, Owner, Date Created, Auto Verify (whether it was run on the automated schedule), SME, and Notes. SH—what the difference between the owner and sme-att tab says author—no “owner” on the record.

Summary	Document	Proposal	Owner	Date Created	Auto Verify	SME	Notes

Limited Liability Corporation.	HT101.DOC	General Search	Betty Manning	8/11/09	FALSE	Dixon, Trina	This record has expired, please review and update.

## Sent Tab

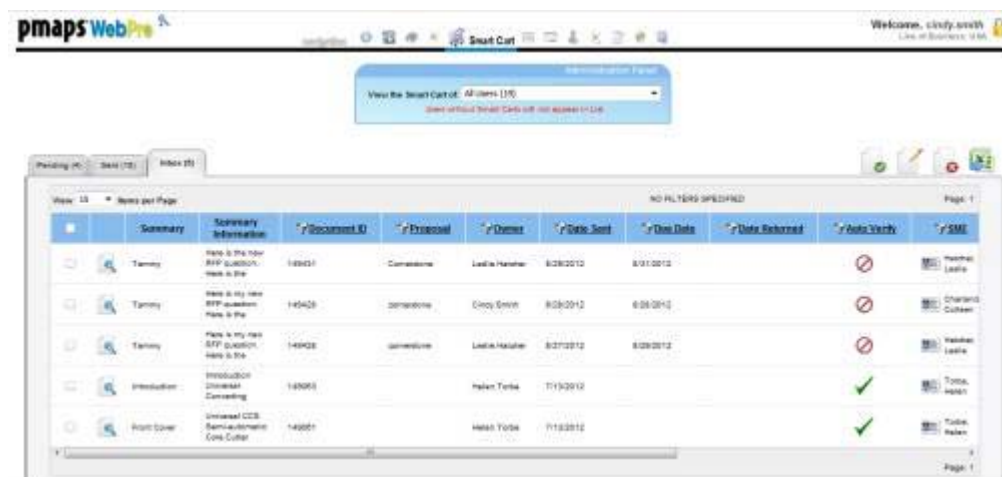

All items sent through the **SmartCart** or using a **Compliance Request** are displayed in this window. The sent tab displays the following information: Summary, Document ID, Proposal (if in “cloud” and selected when entering search, Owner, Date Created, Date Due, Auto Verify, Notes & SME.

The [Resend](#) icon  allows you to automatically send documents displaying on your Sent out to SMEs

## Inbox

All documents sent back to your designated return email address are displayed in this window. The Inbox displays the following information: Summary, Document ID, Proposal Name (if in “cloud” and selected when entering search), Owner, Date Created, Date Due, Auto Verify, Notes & SME.

To accept the documents back into the database, the Admin can:

1. Click on the [SmartCart](#) icon.
2. Click on the [Inbox](#) tab.
3. Click the box on the left of at the beginning of one of the rows of documents displayed in the Inbox.
4. Click the [Edit](#) button to review the document, make final changes and save.
5. Check the boxes for all of the documents you want to approve.

6. Click [Approve](#).

#### ✓ TIPS

- ❖ Instead of approving the documents one at a time, you may instruct your SMEs to return their updates to the DBA, Admin, or Writer to review. When the content has been approved for Re-link into the database, then forward the emails to the Inbox email so users with appropriate rights can mass Re-link them with the check of one box.

## Pitch Book Module

### Overview

The Pitch Book module allows you to assemble two types of indexed documents: Microsoft PowerPoint, and Portable Document Format (PDF). You may not mix document types in one Pitch Book.

For example, you are working on a PowerPoint presentation and use the Search module to find existing presentations to use to build this new one. You can add one or more (or all) slides to your Pitch Book from the Preview mode from as many existing presentations as needed. Once you have added all the slides desired, you can access the Pitch Book to organize the slides by moving them around or deleting. The Pitch Book stays in your queue until you delete it. Once you have incorporated all the slides and arranged them appropriately, you can checkout and develop your new presentation file, saving it to the appropriate location on your server or desktop.

Note: Refer to the Administrator manual for instructions on Indexing Documents. You must have a WebPro license to index documents. Web Essentials users do not have the ability to index documents. If you are a Web Essentials user, and would like to upgrade to WebPro, please contact your Sales Rep or Client Relationship Manager at Proposal Software, Inc. at [support@pmapswebpro.com](mailto:support@pmapswebpro.com).

### Adding Slides/Pages to the Pitch Book

To add pages or documents you must be in [Preview](#) mode. The following instructions will guide you through the process. These instructions and examples are specific to working with PowerPoint documents; however, the process is identical for PDF documents.

1. Make sure you have the [File Type](#) attribute column displaying in your [Search Results](#) grid. If it is not shown, use [Modify Columns](#) to adjust your view.
2. Search for content as outlined in the [Search Module](#).

3. Once you identify a PowerPoint document you wish to use in your [Pitch Book](#), open that document by clicking the [Preview](#) icon. 

The PMAPS [Viewer](#) toolbar opens automatically when you enter the Preview mode.

4. Once in [Preview](#) mode, several additional options are available. The second toolbar is used to add pages or the whole document to the [Pitch Book](#).

The first button  adds the selected page to your [Pitch Book](#). The second button  adds the entire document.

5. Once you have added all desired slides from the document in [Preview](#) mode, you can simply return to the current search session by clicking on the [Internet Explorer](#) icon on your Windows taskbar (leaving the Preview open), or you can close the Preview window.

Repeat Steps 1 through 4 above for additional documents until you have added all desired documents to your [Pitch Book](#).

## Pitch Book Manager

When you are ready to manage all the documents added to your Pitch Book,

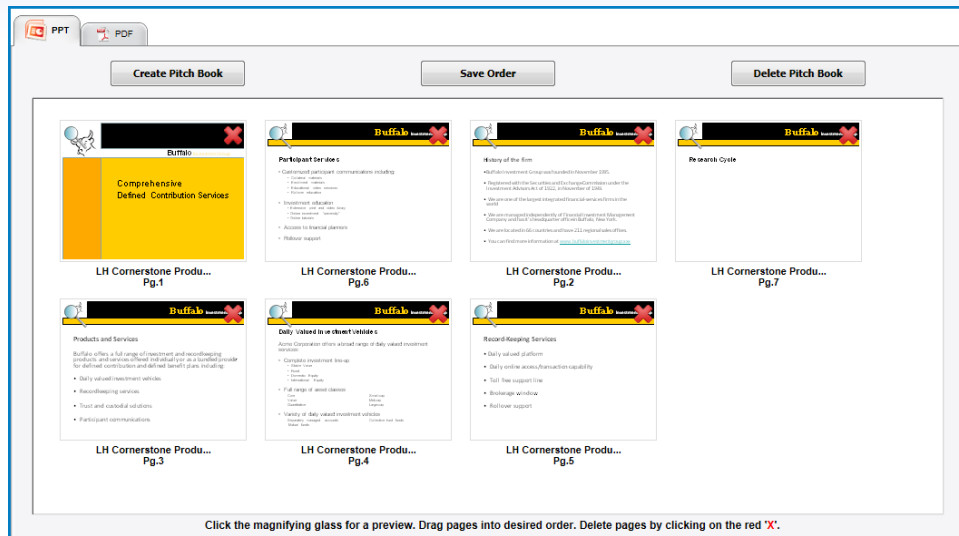

1. Click the [Pitch Book](#) icon.

This brings you to the [Pitch Book Manager](#) where you can rearrange and delete pages, as well as assemble the final Pitch Book.

2. To rearrange a page, click on the page to move and drag-and-drop it to the correct location. A large cursor indicates the new location.

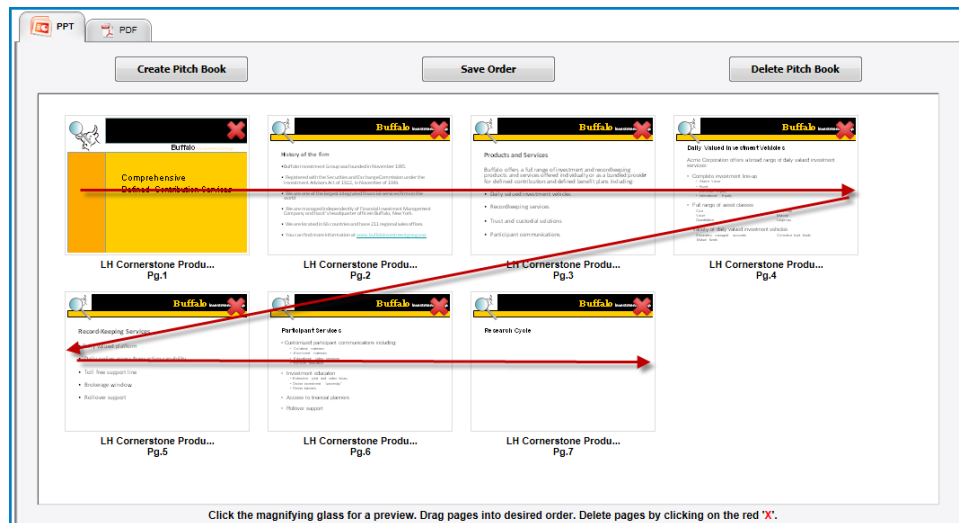

Repeat this process until you have achieved the desired order and content for your [Pitch Book](#).

3. Click the remove button  for that page, if you want to remove a page from the active Pitch Book.
4. Click the [Save Order](#) button to save any changes made to the order of the Pitch Book.

The [Pitch Book](#) assembles starting at the top from left to right, then down to the next row of documents and again from left to right.

5. When the [Pitch Book](#) is complete and you are ready to build your final document, click the [Create Pitch Book](#) (Checkout) button.

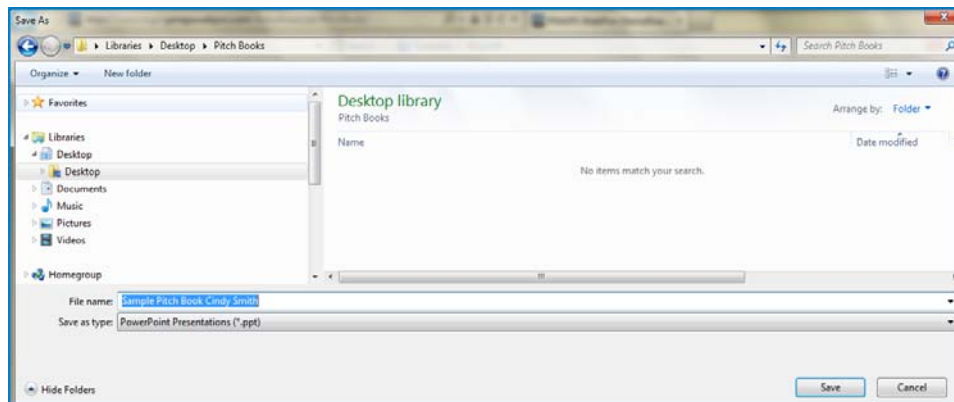

A rectangular button with a blue border and a light blue background. The text "Create Pitchbook (Checkout)" is written in a red, serif font.

6. The [Downloading Documents](#) progress bar indicates the status.

7. When you are prompted, name the [Pitch Book](#) and save it to the desired location.

8. Click [Save](#).

9. The Pitch Book remains in the Pitch Book manager in case you'd like to use it as a template or add slides to it for a future Pitch Book.

When you are ready to delete the Pitch Book, click the [Delete this Pitch Book](#) button.

#### ✓TIPS

- ❖ You may only work on one Pitch Book at a time.
- ❖ Only Pitch Books that you have created are displayed in your Pitch Book manager when you are in the PMAPS.

## CALENDAR MODULE

Admins may choose which date fields automatically populate the internal calendar. PMAPS Users, with the appropriate permissions, can view the calendar.

Please see instructions for applying that option in the Administrator Manual.

## Calendar Options

### Toolbox

- Refresh/Clear
- Add Entry
- Export to Excel
- Synch with Outlook

### Selection

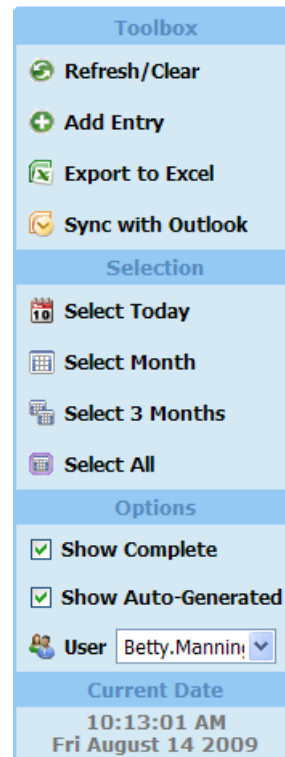

- Select Today
- Select Month
- Select 3 Months
- Select All

### Options

## Add Entry

To add a calendar event:

1. Click [Add Entry](#) under the [Toolbox](#) heading.
2. Choose whether it has been completed
3. Click the [Date](#) field and a calendar pops up.
4. Select a [Date](#).
5. Select the [Priority](#).
6. Enter the item that is due in the [What](#) field.
7. Click the Proposal Name drop down arrow to display your proposal list.
8. Select a proposal.
9. Enter the [Section](#); e.g. questionnaire, executive summary, etc.
10. Your name is automatically entered in the [Who](#) field.

## Synching with Outlook

### View Calendar Events

To view a list of all events due on a specific day, click on that day on the calendar. The lower part of the screen displays a list of the events due on that day. From this screen you can mark the event complete or change some of the previously selected options. You cannot change the Proposal Name from this screen.

Selected: August 14, 2009							Count: 1
Complete	Date	Priority	What	Proposal Name	Section	Who	
No	8/14/2009	High	Proposal Due	State of New York - Small Ca...	Questionnaire	Betty Manning	

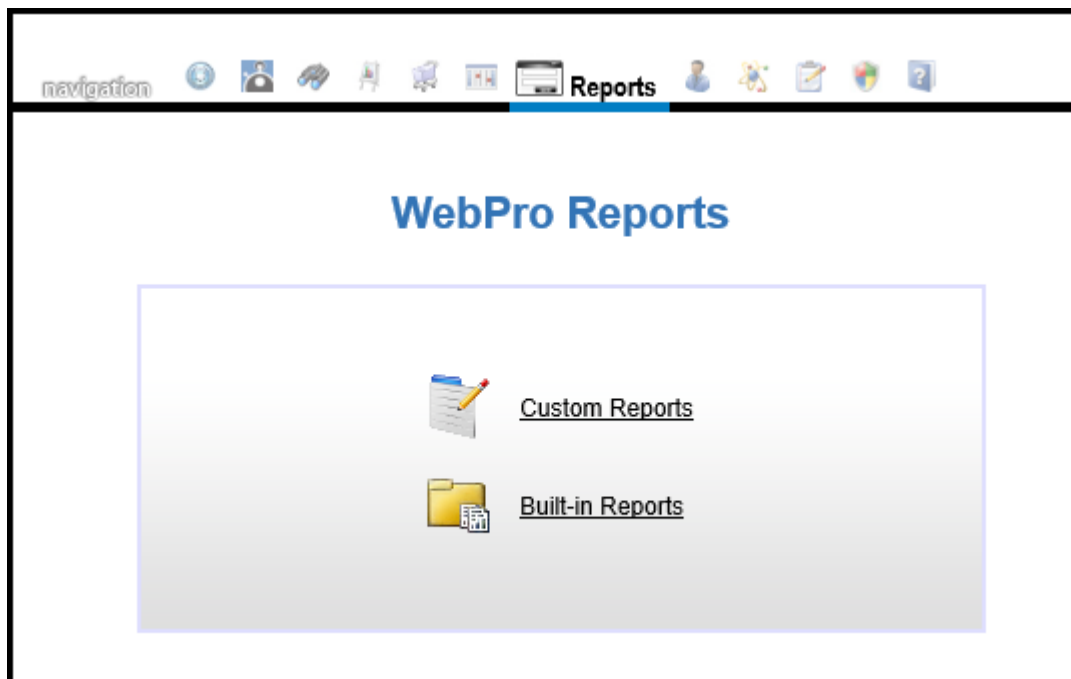

## REPORTS MODULE

### Custom Reports

1. Click on the [Reports](#) icon on the top tool bar.

2. Click on the [Custom Reports](#) option to create customized reports.

3. The next window will show a log of all reports and includes details about each report, as shown below.

A screenshot of the 'Select' window in the PMAPS WebPro application. The window has a title bar with the text 'Select'. Below the title bar, there is a table with columns for Scope, Type, Created, Creator, Last Edited, Edited By, and Name. The table contains six rows of report data. The 'Reports' icon in the top navigation bar is highlighted.

Scope	Type	Created	Creator	Last Edited	Edited By	Name
		9/4/2009 3:40 PM	Tammy.Dungan	9/9/2009 10:07 AM	Tammy.Dungan	RFP Log
		9/4/2009 1:54 PM	Tammy.Dungan	9/30/2009 2:45 PM	Tammy.Dungan	Records Not Used
		9/21/2009 10:16 PM	Administrator	9/21/2009 10:40 PM	Administrator	Most Recent RFPs
		10/16/2009 10:53 AM	Cindy.Griffin	10/16/2009 10:53 AM	Cindy.Griffin	Most Recent Revised Records
		9/2/2009 7:16 PM	Administrator	9/2/2009 7:41 PM	Steven Heffter	Proposal Log
		10/7/2009 9:40 AM	Administrator	10/7/2009 9:40 AM	Administrator	Main Topic

## Create a New Report

### Select Tab

1. To create a new report, click on the [New Report](#) icon. 
2. Select the type of report from the drop down list.
  - a. [Proposals](#) – This option will bring up all the available tracking label fields to include in your report
  - b. [Q+A Documents](#) – This option will bring up all available search attributes to include in your report
3. Type in the name of the report; for example Proposals 2012.

### ✓ TIPS

Checking the [Save as Public Report](#) option will allow all other users to see and access the report.

4. Use the scroll bar to navigate through the list of tracking fields and click on the check box in front of each of the tracking fields that you would like to be included in your report.
5. Click on the [Sort Results By](#) drop-down list to select the primary tracking field to sort the report by.
6. When finished completing the New Report main screen, click [Ok](#). The new report will now appear in the log view showing all the attributes for that report including:

- [Scope](#) – To be viewed Publicly  or Privately 
- [Type](#) – Type of Report; Proposal  or Search Record  related
- [Created](#) – Date report was created
- [Creator](#) – Who created the report
- [Last Edited](#) – Date the report was last edited
- [Edited By](#) – Who made the last edits
- [Report](#) – The name of the report

Scope 	Type	Created	Creator	Last Edited	Edited By	Name
		9/4/2009 3:40 PM	Tammy.Dungan	9/9/2009 10:07 AM	Tammy.Dungan	RFP Log
		9/4/2009 1:54 PM	Tammy.Dungan	9/30/2009 2:45 PM	Tammy.Dungan	Records Not Used
		9/21/2009 10:16 PM	Administrator	9/21/2009 10:40 PM	Administrator	Most Recent RFPs
 		10/16/2009 5:17 PM	Tammy.Dungan	10/16/2009 5:17 PM	Tammy.Dungan	Proposals 2009

## *Edit to Order Columns or Change Query*

1. Select the report to edit from the [Report Log](#) by clicking on the report.

2. Click on the [Edit Properties](#) icon
3. Notice that all the selected [Visible Fields](#) are at the top of the list.

### ✓ TIPS

- ❖ For removing or adding all fields quickly use the [Un-Check All](#) or [Check All](#) options right above the list.

4. To adjust the layout of the fields within the report, select a field and click on the up and down arrows to the left of the Visible Fields list.

The double up arrows will move the selected field to the top of the list, double down arrows will move the field to the bottom of the list. The single up or down arrow will move the selected item up or down one.

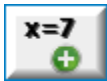

5. When finished adjusting the fields for the report, click [OK](#).

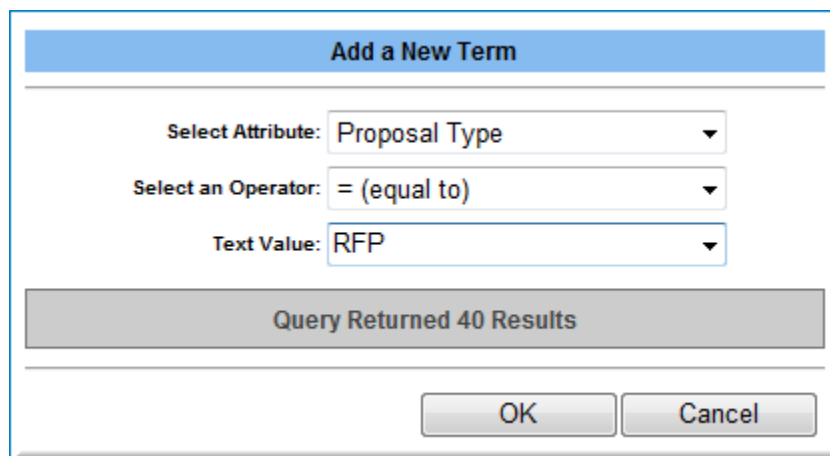

## Build Tab

To build a dynamic report with variable terms:

1. Click on the report from the [Report Log](#) that you wish to create conditions for.
2. Click on the [Build](#) tab.
3. The build screen will appear as shown below.

4. To add a term/condition to the report, click on the  [Add Term](#) icon on the upper left corner of the window.
5. Select the desired attribute from the pick-list drop down menu.
6. Select the available operation from the representative options as shown in the screen shot below:
  - Boolean: True or False
  - Date/Numeric: =(equal to), !=(not equal to), < (less than), > (greater than), <=(less than or equal to), >=(greater than or equal to), In list, or Not in list
  - Textual: =(equal to), Contains, Begins With, Doesn't Begin With, or Ends With

### ✓ TIPS

- ❖ The reporting tool provides [the Query Returned Results](#) total within the window.

7. When finished, click **OK**. The term will appear in the grid.

8. To add another term, follow steps 4 through 6 above.

#### ✓ TIPS

- ❖ To remove a term from the report/query, click on the letter in front of the term box.

9. Click the **Save**  icon when finished.
10. Click the **View** tab to see the report.

### View Tab

1. To view any the report log, simply click on the report you'd like to view.
2. Click on the **View** tab to see the full report with the labels or attributes selected.

Date Due	Lead Writer	Proposal Team	Proposal Type
3/31/2008		2	RFP
3/29/2008	Test, Jeff	0	Bank/Financial
3/28/2008	Heffter, Steven	0	Bank/Financial
10/9/2009	Torbe, Helen		Bank/Financial
7/27/2009		0	Demo
9/30/2009	Heffter, Steven		
6/22/2008	Philleo, Wendy	0	Public
6/22/2008	Wexler, Steven	0	College
6/22/2008	Heffter, Steven	0	Foundation

3. Click to the next page at the upper left corner to see additional pages of the report.

4. Click on the magnifying glass  icon to view the full report in another window.

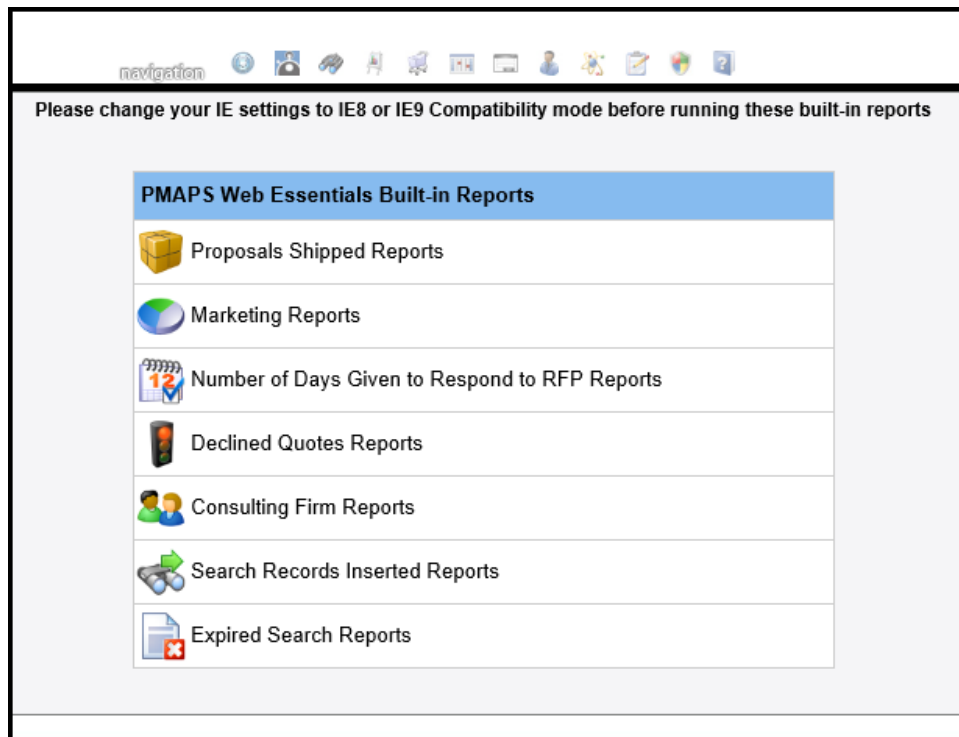

5. Click on the Excel  icon to export the report into Excel.

#### ✓ TIPS

- ❖ You may also export the report to XML or Text Delimited.

## Built-in Reports

In PMAPS WebPro and Web Essentials, there are several Built-in Reports.

For example, the first report on the list is the Proposal Shipped Reports.

1. Click on the Proposal Shipped Reports. The following screen is displayed.

**Proposal Reports**

**Date Proposal Shipped**

From    
[e.g. MM/DD/YYYY]

To    
[e.g. MM/DD/YYYY]

**Category**

☒ Asset Class ☐ Strategy

☐ Consulting Firm ☐ Vehicle

☐ Lead Writer

**Output To**

☒ Graph ☐ Tabular

2. Select the Date Proposal Shipped range.
3. Select the **Category**. The category names reflect the customized names you have assigned to the Summary tab of the Tracking module.
4. Select the **Output To**.

5. Click the  icon to run the report.

## SALESDOCBUILDER WIZARD

### Complete a Form to Generate Proposal

1. Log in to [WebPro](#).
2. Select or log in the proposal for which you want to complete a SalesDoc. If you need to log in the proposal, follow the instructions for [Add New Proposal](#).
3. Select the proposal by clicking on it on the Dashboard. The proposal will be highlighted in blue.

4. Click the [Create Sales Doc](#) icon.

5. Click the [New Sales Doc](#) icon.

6. Select the appropriate Sales Doc from the list:

7. Fill out the form:

Sales Docs Entry Working on Proposal: Acme Assignment 1079

8. Click [Save Sales Doc](#).

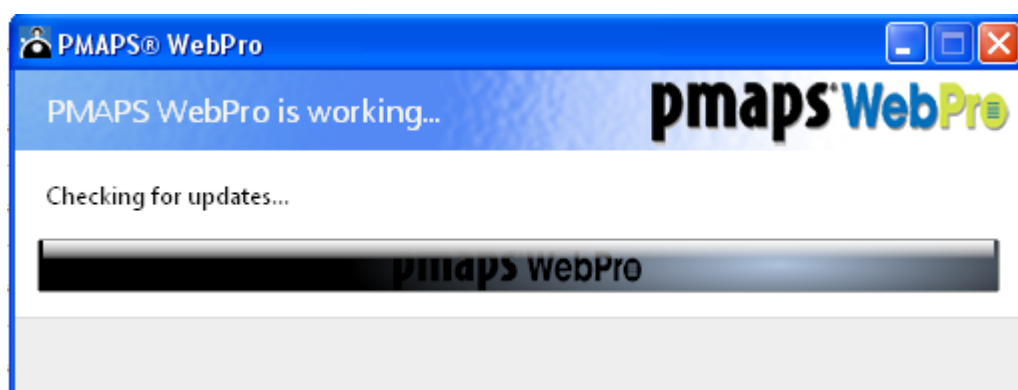

#### ✓TIPS

- ❖ If you are interrupted when filling out the form, you can also click Save Sales Doc Session (allows partial) to save what you have completed

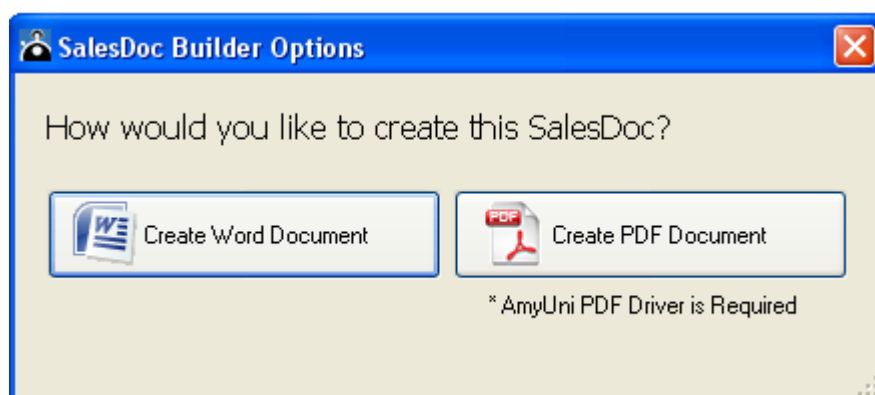

9. An error check is run and the results are displayed at the top of the form.

10. Click [Generate Proposal](#).

11. Select the format to use for generating your proposal. The administrator may restrict generation to only PDF if they wish.

12. The document is assembled in the designed order and the [Word Replacements](#) tool is run on the entire document.

## ASSEMBLY AND PROJECT MANAGEMENT CENTER WIZARD

### Overview

The [Assembly and Project Management Center](#) is a project management tool, built right into PMAPS that can provide vast control over each aspect of the proposal process.

This module can be used to create template questionnaires with standard attachments ready for printing or to create a template form document such as biographical groupings.

This feature acts as a file manager, tracking each section of the proposal. Administrators have the ability to create templates that can be automatically linked to a new proposal. Lines or sections of the template can be added or deleted depending on the details of each specific proposal's requirements.

This section covers selecting, customizing, and assembling templates. Please see the [Assembly and Project Management Center Module](#) section of the [Admin](#) manual for instructions on creating templates.

## Add or Select a Proposal

1. Begin in the [Dashboard](#) module.
2. Log in the proposal or select an existing proposal by clicking on it to highlight it. Please see [Add New Proposal](#) for instructions on entering a new proposal.

3 Proposals Found.

Working on Proposal: Acme-Follow Up

Dashboard Summary Logistics Marketing Follow-up Misc Evaluation

View 15 Items per Page [Modify Columns](#) [Reset Sort/Filter](#) Page: 1

Region	Proposal Name	Date Entered	Date Due	Proposal Type	Asset Class	Vehicle/Product	Last Modified
US	Acme-Follow Up	1/23/2010	3/5/2010	RFP	Equity - Domestic	All Vehicles	1/23/2010
USA	Acme - RFP Phase 1	11/24/2009	2/25/2010	RFP	Equity - Domestic		2/10/2010
Institutional	Acme Co RFP	11/16/2009	12/3/2009		Blend - FI & Equity		2/8/2010

3. Click the [Edit Assembly](#) icon above the proposal log.

4. The [Assembly and Project Management Center](#) screen is displayed with a blank template containing one line of data.

pmapsWebPro

Welcome, Cindy Smith  
User ID: 1000000000

Proposal: Acme Proposal 2012

Pending: 100%  
Past Due: 0%  
Finalized: 0%

Type	Description	Status	Include	Person Responsible	Section Due	Completed	Assigned	How Page
		Not Draft		[empty]				Paragraph

proposalcenter

5. In the upper right-hand corner of the screen there is a status bar that's details status in three categories.

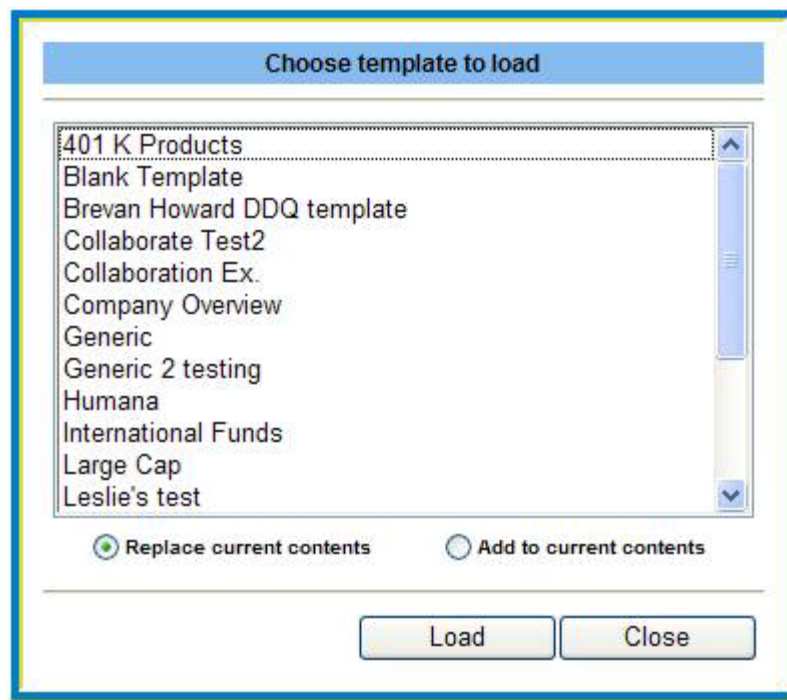

Pending	100%
Past Due	0%
Finalized	0%

## Select a Template

6. [Load Template](#):

- a. Click the [Load Template](#)  icon. The [Choose template to load](#) dialog box is displayed.

- b. Choose a template from the list. You may need to use the scroll bar on the right-hand side of the screen to view the entire list. Once you have found the template, click on it to select it.

- c. Choose Replace current contents.

✓ TIPS

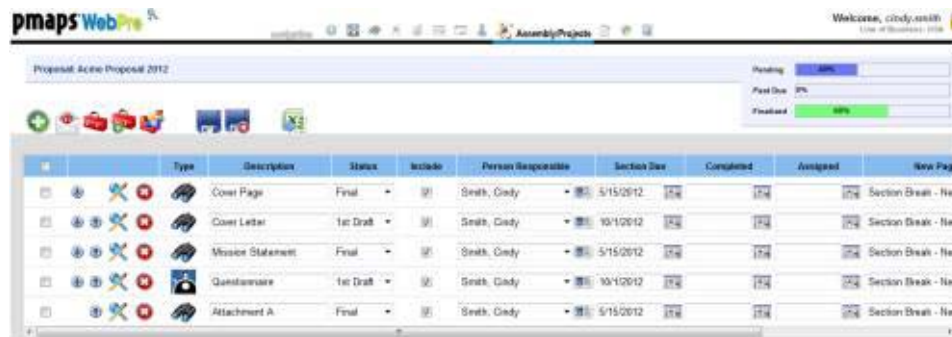

- ❖ If you want to use two different templates, choose [Replace current contents](#) then return to this screen and choose [Add to current contents](#).

- d. Click [Load](#).
- e. Click [OK](#) to confirm that you want to replace the current contents with the chosen template.

- f. Click [Close](#). You are returned to the Assembly and Project Management Center main screen. The blank line has been removed and your template has been loaded.

The status table is also updated because some of the pieces of the template are finals so they are now considered completed.

## Customize a Template

### Overview

The Admin that created the template has probably filled out some of the template options. However, you may edit those options and customize the template for the proposal you are working on.

The Type field displays the type of file that is linked to the current section. Many of the template sections will be linked to standard documents when they are created. For some sections, the files will change with every proposal—such as the questionnaire. Therefore, you will need to link some of the sections to the associated files after you select the template.

If the current section is not linked to a file, the  icon is displayed. See the [Assembly & Project Management Center Icons list](#) for examples of the available icons. To link the section to a file:

1. Click the  icon in the Type column.
2. Choose the appropriate option for the file you are linking.

- Link to the existing RFP (client questionnaire or standard questionnaire). This option automatically links to the questionnaire that has been uploaded to the “cloud.”

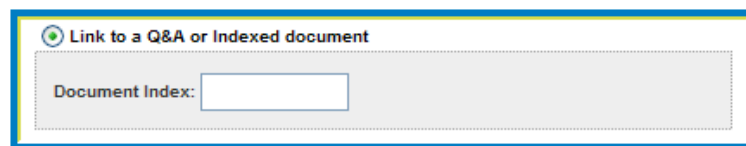

The dialog box has a title bar with a green circle icon and the text "Link to the existing RFP". Below the title bar is a light gray area with a dashed border containing the text "Selecting this will insert the RFP this assembly is linked to."

### ✓ TIPS

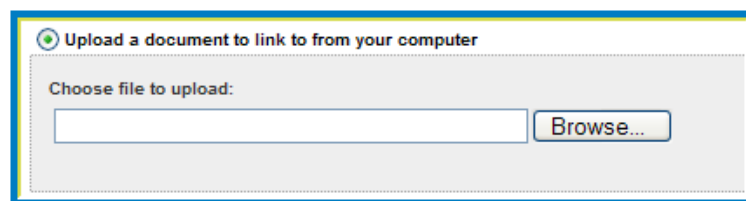

- ❖ Linking to an existing RFP ensures that your Word Replacement codes will be functional.

- Link to a Q&A or Indexed document (in PMAPS). Enter the document ID of the database record you wish to link.

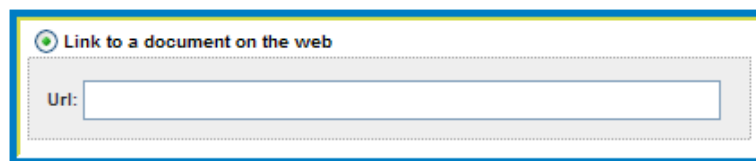

The dialog box has a title bar with a green circle icon and the text "Link to a Q&A or Indexed document". Below the title bar is a light gray area with a dashed border containing the text "Document Index:" followed by a text input field.

- Upload a document to link to from your computer. Browse your network to locate the file to link to.

The dialog box has a title bar with a green circle icon and the text "Upload a document to link to from your computer". Below the title bar is a light gray area with a dashed border containing the text "Choose file to upload:" followed by a text input field and a "Browse..." button.

- Link to a document on the web. Enter or paste the url address to complete this step.

The dialog box has a title bar with a green circle icon and the text "Link to a document on the web". Below the title bar is a light gray area with a dashed border containing the text "Url:" followed by a text input field.

3. Click OK.

### ✓ TIPS

- ❖ You may link files to the sections at any time during the process. However, you will not be able to assemble the document until you link all the sections to a file.

4. Change the [Status](#) if desired.

5. Check **Include** if you want the current item included in the assembly. This option allows you to add items to the project that you don't want or need assembled.
6. The Admin that created the template may have filled out the **Person Responsible**. However, you may change it at this time.
7. Fill in the **Section Due** date.
8. Add the **Completed** date once you have finalized the section.
9. When you are ready to email the sections out, fill out the **Assigned** date.
10. Under **New Page**, choose the section format from:
  - **Paragraph Break**
  - **Page Break**
  - **Section Break – Continuous**
  - **Section Break – Next Page**
11. Check the **Merge** box if you want documents merged together. For example, if you split up the questionnaire and assign different sections to different members of the proposal team, this feature will join the document back together during assembly.
12. The **Notes** field allows you to enter notes pertaining to the section. When you email the section out for completion, the Notes are included in the email.

13. Click the **Move Line Down**  or **Move Line Up**  icons to reorder the sections of your Assembly project.

## Add Additional Lines (Sections) to a Template

14. Click the **Add Line**  icon. A line is added to the bottom of the template. Fill in details as appropriate.

	Type	Description	Status	Include	Person Responsible	Section Due	Completed	Assigned	New Page
	Cover Page	Cover Page	Final	<input checked="" type="checkbox"/>	Smith, Cindy	5/15/2012	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Section Break - Next
	Cover Letter	Cover Letter	1st Draft	<input checked="" type="checkbox"/>	Smith, Cindy	18/1/2012	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Section Break - Next
	Mission Statement	Mission Statement	Final	<input checked="" type="checkbox"/>	Smith, Cindy	5/15/2012	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Section Break - Next
	Questionnaire	Questionnaire	1st Draft	<input checked="" type="checkbox"/>	Smith, Cindy	18/1/2012	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Section Break - Next
	Attachment A	Attachment A	Final	<input checked="" type="checkbox"/>	Smith, Cindy	5/15/2012	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Section Break - Next
			1st Draft	<input checked="" type="checkbox"/>	[ empty ]		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Paragraph

15. Repeat Step 8-15 until you have all the lines you need for your template.
16. Link the lines (sections) of the template to your documents.

17. Click the [Save Assembly](#) icon  often to save your customizations. If you move away from this screen without saving, your changes will not be saved.

## Edit or View a Linked File

You may edit or view the linked file from the template wizard screen by clicking the [Edit/View Document](#)  icon.

## Delete a Template Line

You may delete a template line or section by clicking on the Delete Line  icon.

## Email one Section of a Template to a Colleague

Click the [Email Document to Responsible Party](#)  icon to email the section to the person chosen under the [Person Responsible](#) column.

## Email Multiple Sections with One Click

Enhancements in this update allow you to send out multiple emails at one time. For PMAPS users, you may send a link to their Assembly Center assigned sections. For non-PMAPS users, you may send an Attachment.

1. Select a proposal from the Dashboard.
2. Select the Person Responsible for each section from the drop-down list.
3. Fill in the [Section Due](#) date for each section. The [Assigned](#) date is automatically filled out once the sections are emailed.
4. Check the [check all](#) checkbox.

	Type	Description	Status	Include	Person Responsible	Section Due	Completed	Assigned	View Page
<input checked="" type="checkbox"/>		Cover Page	Final	<input checked="" type="checkbox"/>	Smith, Cindy	6/15/2012	<input checked="" type="checkbox"/>	174	Section Break - New
<input checked="" type="checkbox"/>		Cover Letter	1st Draft	<input checked="" type="checkbox"/>	Smith, Cindy	10/1/2012	<input checked="" type="checkbox"/>	174	Section Break - New
<input checked="" type="checkbox"/>		Mission Statement	Final	<input checked="" type="checkbox"/>	Smith, Cindy	6/15/2012	<input checked="" type="checkbox"/>	174	Section Break - New
<input checked="" type="checkbox"/>		Questionnaire	1st Draft	<input checked="" type="checkbox"/>	Smith, Cindy	10/1/2012	<input checked="" type="checkbox"/>	174	Section Break - New
<input checked="" type="checkbox"/>		Attachment A	Final	<input checked="" type="checkbox"/>	Smith, Cindy	6/15/2012	<input checked="" type="checkbox"/>	174	Section Break - New

5. Click the [Email Selected](#)  button.

The following dialog box is displayed showing the number of sections that are being emailed and the following options:

- [Yes, Include Attachments](#) –Select this option when sending to a non-PMAPS user. This option includes a link to the Assembly Center sections and attaches the assignment to an email and sends the email to the assignee. Individual emails are sent for each assigned section.
- [No Attachments](#) –Select this option when sending to a PMAPS user. This option includes only a link to the Assembly Center sections.
- [Cancel](#) – returns you to the previous screen.

5. Once [Yes, Include Attachments](#) or [No Attachments](#) has been chosen, a confirmation message is displayed to confirm whether or not the sections were sent successfully.

6. The Assignee for each section receives an email for each assigned section.

- Example email when the No Attachments option was chosen:

The email does not include an attachment. It does include a calendar reminder (as long as the Section Due date was filled out before the section was emailed) as well as a link to the Assembly Center assigned sections area. This allows the PMAPS user to make changes directly in the Assembly Center and reduces the risk of the latest document not being uploaded. The subject line displays the name of the assigned section. The email message displays the name of the proposal the assignment is for.

- Example email when the Yes, Include Attachments was chosen. Use this option for non-PMAPS users:

The email includes an attachment as well as a link to the Assembly Center assigned sections area. It also includes a calendar reminder (as long as the Section Due date was filled out before the section was emailed) The subject line displays the name of the assigned section. The email message displays the name of the proposal the assignment is for.

Back in the [Assembly Center](#), the system:

- Auto-populates the [Assigned](#) date with date emailed out.
- Attaches an iCal for all outgoing emails (Microsoft Outlook 2007 & later only) with the subject/message and due date.

In addition:

- Users may use the [Export](#) button on the main [Assembly Center](#) screen to send to Excel

## Combine (Assemble) the Proposal

13. Click the Combine  icon to run the assembly. This process:

- Combines all documents into one file in Word or PDF format.
- Replaces all Word codes with the appropriate text as defined by the Admin.

## Assembly & Project Management Center Icons

	Add <a href="#">Line</a> to template.
	Load Template is used in the Assembly Wizard to choose a template to associate with a proposal and load it.
	Allows you to open an existing template, add additional lines, and save it as a new template.
	Allows you to combine and run the assembly project. This process automatically replaces all Codes with their Word Replacements, and allows you to run the file in Word or .PDF format.
	Once you have loaded a template and customized it, you need to save it so it keeps your changes.
	Allows you to revert back to the last time you saved your assembly using the Save Assembly icon.
	These icons allow you to reorder the lines on your template.
	Allows you to email the document linked to this line to the <a href="#">Person Responsible</a>
	Allows you to view and edit the document linked to this line.
	Allows you to delete the current line.
	Document type icon: <a href="#">Document located on your local computer or network.</a>
	Document type icon: <a href="#">PMAPS record.</a>
	Document type icon: <a href="#">PMAPS Proposal uploaded to the “cloud.”</a>
<p>Template Name: Generic 2 testing</p> <p>Pending  57%</p> <p>Past Due  0%</p> <p>Finalized  43%</p>	Completion status of template.

## RFP ASSIGNMENTS MODULE

### Overview

The RFP Assignments feature allows the Proposal/Bid Manager (Lead Writer field) to assign individual questions or sections of a proposal to a contributor (PMAPS user) for completion, email links to contributors for completion using the database content or outside materials, and then merge the updated individual sections into one document with the [Re-link All Assignments](#)

icon.

The [RFP Assignments](#) module  tracks the assignments that are made for every proposal added to PMAPS. The link is displayed on the [Navigation](#) bar at the top of the screen. The link is highlighted if the current user has any open or not yet completed assignments. By clicking this link, the user can see all their own assignments for all proposals, but only their own assignments. If the user is the proposal/bid manager or an administrator, they see all assignments for all proposals and can filter the list based on a single user.

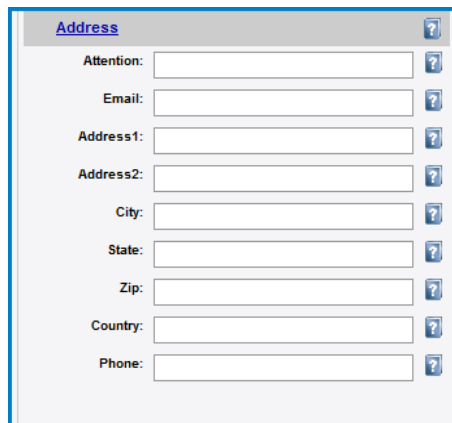

If assignments need to be made to non-PMAPS users, those assignments must be made and managed through the, [SmartCart](#), [Assembly Center](#) and email.

Note: In these instructions, we are using the term contributors for section assignees. You may assign sections to any registered PMAPS user.

### Logging in a New Proposal

1. Click the [New Proposal](#) icon to enter the proposal details in the Dashboard/Tracking module (see Add New Proposal in the WebPro user manual for detailed instructions).
2. Upload the proposal:
  - a. Select the [Start with Uploaded Document](#) option
  - b. Locate and select your file from your network files
  - c. Upload the questionnaire or document for assignments. The questionnaire may be uploaded when the proposal is originally logged in or at a later time. However, the questionnaire must be uploaded before you can begin assigning sections.
3. Fill out the [Summary](#) tab with [at least](#) all mandatory fields. Mandatory fields are highlighted in yellow. Keep in mind that the information you enter into the dashboard area can automatically flow into your finished document to customize it.

4. If you are including a cover letter and you have entered the Client's address information in the Client Name table<sup>1</sup> of the application, click the [Address](#) link to pull the Client's address into the current proposal. If you have an attention line on your cover letter, be sure to enter the contact name for this proposal in the [Attention](#) field.

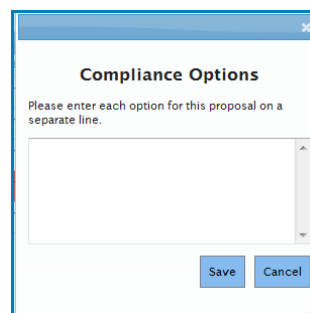

The screenshot shows a form titled "Address" with a question mark icon in the top right corner. The form contains the following fields, each with a question mark icon to its right: Attention, Email, Address1, Address2, City, State, Zip, Country, and Phone. All fields are currently empty.

The screenshot shows the same "Address" form, but with the following information entered: Address1: 123 Main Street, City: New York, State: NY, and Zip: 12345. The other fields (Attention, Email, Address2, Country, and Phone) remain empty.

5. Define the [Compliance Options](#). The [Compliance Options](#) may be defined or customized for each proposal. The [Compliance Options](#) appear as a drop-down list at the top of the [Proposal Section Assignment Editor](#) page. This page is launched when a contributor clicks on a [Section](#) link in the [Assignments](#) tab or in the [RFP Assignments](#) module. To define the [Compliance Options](#):

- a. On the [Assignments](#) tab, click the [Compliance](#)  button. The [Compliance Options](#) screen is displayed.

The screenshot shows a dialog box titled "Compliance Options". Inside, it says "Please enter each option for this proposal on a separate line." Below this is a large text area with a vertical scrollbar. At the bottom right of the dialog are "Save" and "Cancel" buttons.

- b. Click in the box and type in your first term.
- c. Press enter on your keyboard to move to the next line.
- d. Type in the second term and so on.

---

<sup>1</sup> The [Client Name](#) table is the area you are taken to when you click on the ? icon to the right of the [Client Name](#) drop down list and click [Edit Values](#).

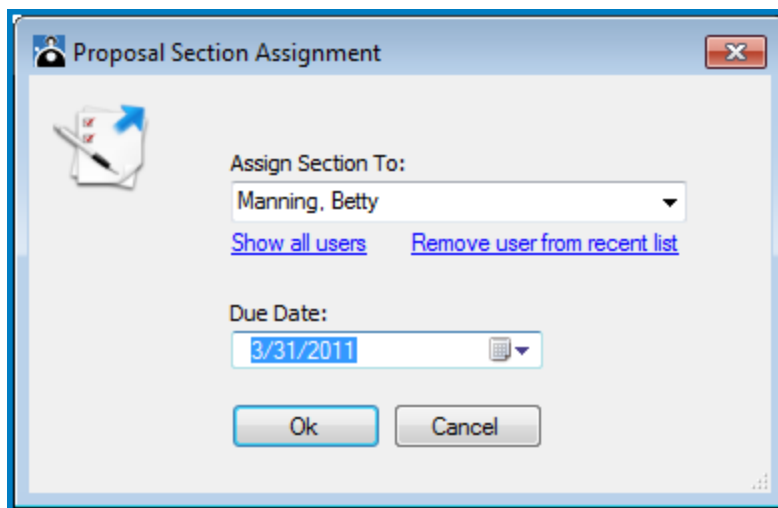

- e. Click [Save](#).
6. Go back to the [Dashboard](#) tab, and click [Save](#).

## Assign Sections (Proposal/Bid Manager)

1. Once the questionnaire has been uploaded, click [Edit Proposal](#) to open the questionnaire or document to be assigned.

2. Highlight a question or section of the RFP and click the  [Assign Section to User](#) button. The [Assign](#) button is only visible when the current PMAPS user has been designated as the Proposal/Bid Manager for that proposal.

3. This action copies the text and opens a new window with the following fields to be filled out:

[Assign Section To](#): this list initially displays a list of recently selected contributors. This list is specific to the proposal manager that is assigned to the current proposal.

- To assign a section to a contributor that is not on the [Assign Section To](#) list, click on the [Show all users](#) link. The [Assign Section To](#) list now displays all PMAPS users. Select the contributor from the list. This new name will appear on the short list until removed.
- To remove a writer from the short list, click on the name on the list, then press delete on your keyboard.

**Due Date:** the date when this answer should be completed by. When you select the Due Date for the first assignment, that date is automatically populated for the remaining sections. However, you may choose a different date for each section.

4. The system inserts a bookmark around the selected text in the proposal that will later be used to merge the completed sections together. This is similar to how the Q&A bookmark is formatted.
5. The system creates a comment to the right of the section displaying the following information:
  - Assigned to
  - On (Date and Time)
  - By
  - Due.

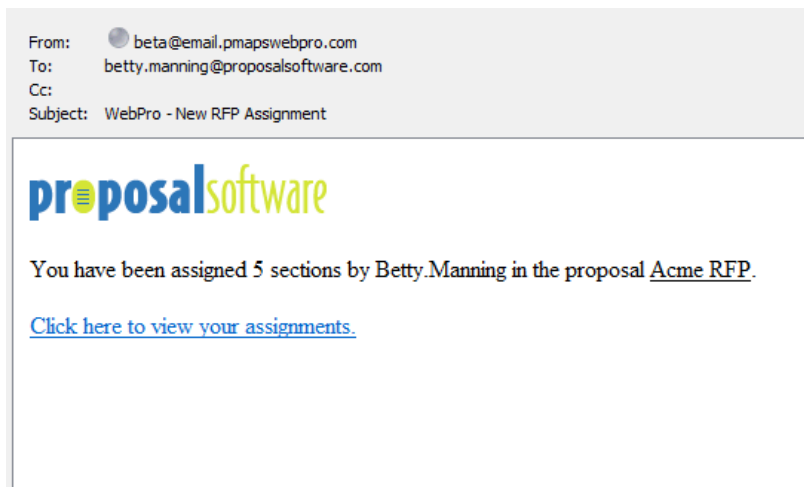

6. Continue through the document, assigning all sections. To increase your speed for this task, try this:
  - a. Click on the [Assign Section To](#) field.
  - b. Begin typing the last name of the contributor into the field until the system lands on the correct name.
  - c. Press [Tab](#) on your key board twice, which will land you on the OK button. (if you need to change the date, tab only once, and change the date and then tab again).
  - d. Press [Enter](#) on your keyboard to save and return to your questionnaire.

**Sample Questionnaire**

Part I: Background

1. → Please provide us with a company overview. Comment [BAM1]: Assigned to: Manning, Betty on 2/17/2011 8:48:30 AM By: Betty.Manning Due: 3/31/2011
2. → Are there any potential conflicts of interest that may be created by awarding the investment management contract to your firm? If yes, please explain. Comment [BAM2]: Assigned to: Heffner, Steven on 2/17/2011 8:59:20 AM By: Betty.Manning Due: 3/31/2011
3. → Has the firm, its parent organization, subsidiaries, affiliates or any key personnel been subject to any litigation or legal proceedings related to investment operations during the past five years? If yes, please explain. Comment [BAM3]: Assigned to: Manning, Betty on 2/17/2011 9:04:53 AM By: Betty.Manning Due: 3/31/2011
4. → Briefly describe the philosophy and methodology of your security selection for equities and fixed income. If you feel any of the more common "investment styles" apply to your philosophy, please so indicate. Comment [BAM4]: Assigned to: Heffner, Steven on 2/17/2011 9:27:00 AM By: Betty.Manning Due: 3/31/2011
4. → Briefly describe the philosophy and methodology of your security selection for equities and fixed income. If you feel any of the more common "investment styles" apply to your philosophy, please so indicate. Comment [BAM5]: Assigned to: Manning, Betty on 2/17/2011 9:27:15 AM By: Betty.Manning Due: 3/31/2011
5. → What are your Firms marketing objectives? Comment [BAM6]: Assigned to: Manning, Betty on 2/17/2011 9:27:31 AM By: Betty.Manning Due: 3/31/2011
6. → Describe your issue selection process. Please indicate your capabilities to analyze spread products.
7. → How can potential clients expect this product to perform in down markets? What is it about your investment philosophy that would make you respond in this way?
8. → Describe your investment philosophy for the product.
9. → Do you plan to close out this product to new investors at a given amount of assets? If yes, please explain. Comment [BAM7]: Assigned to: Manning, Betty on 2/17/2011 9:27:55 AM By: Betty.Manning Due: 3/31/2011

9. When all the assignments have been made, click [Save to PMAPS](#)  and close your proposal. The minute you save, WebPro sends Outlook emails to all contributors informing them that an individual question, section, or multiple sections from an RFP were assigned to them. The email includes the number of assignments, the name of the proposal, and a hyperlink to the Assignments area where they can view and complete their assignments.

For each proposal assigned, the assignees only receive one email that displays a count of the number of assignments along with a link to the assignments.

## Completing Assignments

### Contributors

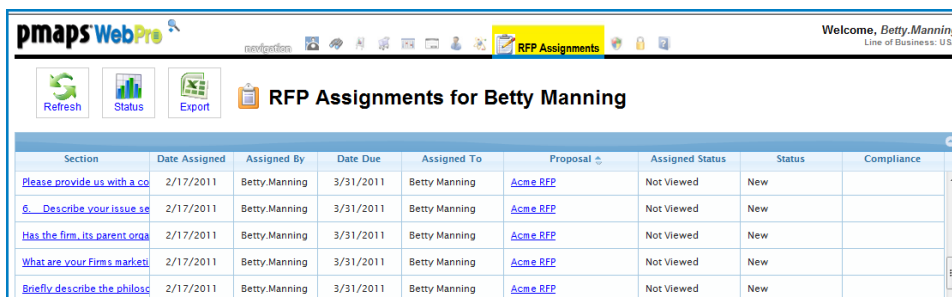

To view and work on assignments, contributors may:

1. Click the link in the email to go directly to the RFP Assignments module.

You have been assigned 5 sections by Betty Manning in the proposal Acme RFP.

[Click here to view your assignments.](#)

2. The [RFP Assignments](#) module shows only the current PMAPS user's assignments for all proposals they are contributing to, unless the contributor is also the Proposal/Bid Manager (Lead Writer) or has an Administrator role. In that case, the Proposal Manager would see all assignments for all proposals they are associated with. If the current PMAPS users is an [Administrator](#), they would see all assignments for all proposals.

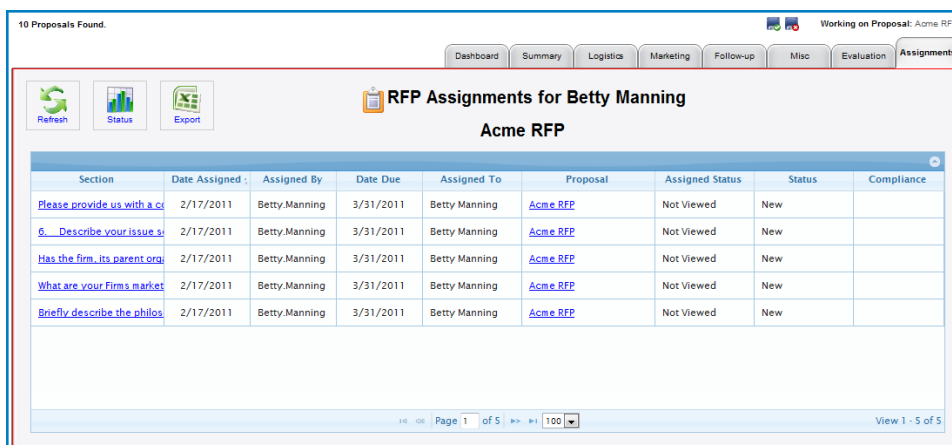

The screenshot shows the 'RFP Assignments for Betty Manning' dashboard. It features a table with columns: Section, Date Assigned, Assigned By, Date Due, Assigned To, Proposal, Assigned Status, Status, and Compliance. There are five rows of assignments, all for the 'Acme RFP' proposal, with a status of 'Not Viewed' and 'New'.

Section	Date Assigned	Assigned By	Date Due	Assigned To	Proposal	Assigned Status	Status	Compliance
<a href="#">Please provide us with a co</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">6. Describe your issue s</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Has the firm, its parent org</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">What are your Firm's market</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Briefly describe the philos</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	

To see all assignments for one specific proposal:

1. Select the proposal from the dashboard.
2. Click on the [Assignments](#) tab.

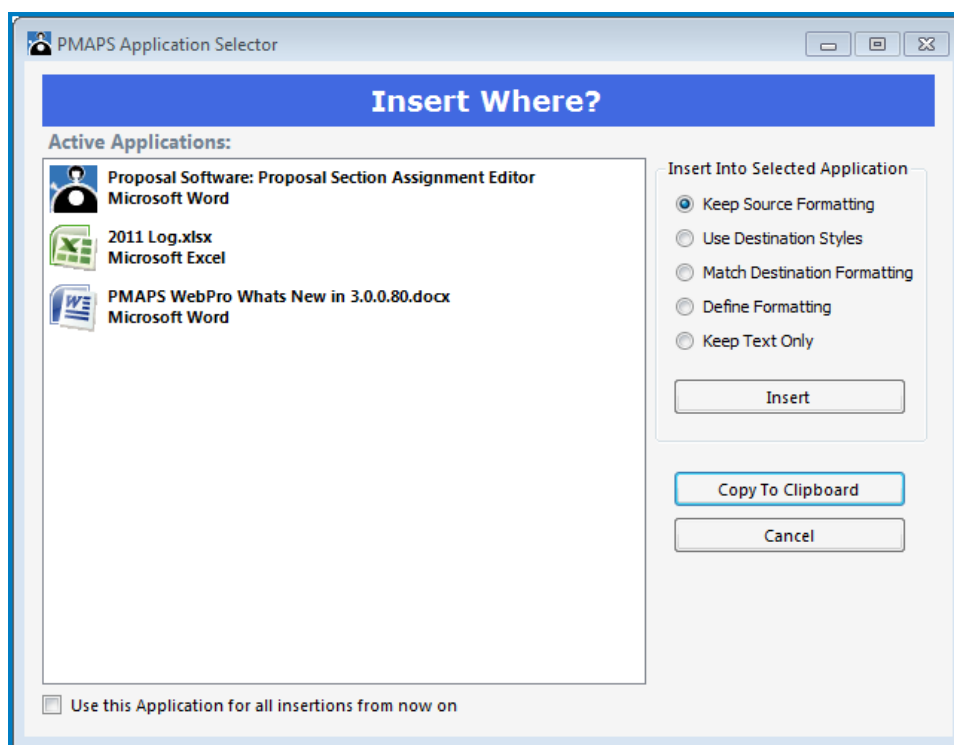

The screenshot shows the 'RFP Assignments for Betty Manning' dashboard filtered for the 'Acme RFP' proposal. The 'Assignments' tab is selected. The table shows the same five assignments as the previous screenshot, all for the 'Acme RFP' proposal, with a status of 'Not Viewed' and 'New'.

Section	Date Assigned	Assigned By	Date Due	Assigned To	Proposal	Assigned Status	Status	Compliance
<a href="#">Please provide us with a co</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">6. Describe your issue s</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Has the firm, its parent org</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">What are your Firm's market</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Briefly describe the philos</a>	2/17/2011	Betty Manning	3/31/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	

3. Click on the underlined link in the [Section](#) column to open the assignment.

4. Complete the assigned section. You may manually enter your response, OR [Search for an answer in the PMAPS content library](#).
  - a. Enter a blank line in the section for the answer to be inserted. You can simply click at the end of the question and press enter on your keyboard once or twice to make room in the document for inserting the content from the library.
  - b. Go back to the question and select (highlight) the word(s) to search for.
  - c. Click the search binoculars on the [PMAPS Viewer](#).
  - d. Locate the information to insert into your proposal.
  - e. Click the [Insert Full](#) button.
  - f. Choose the document to insert into: [Proposal Software: Proposal Section Assignment Editor Microsoft Word](#).

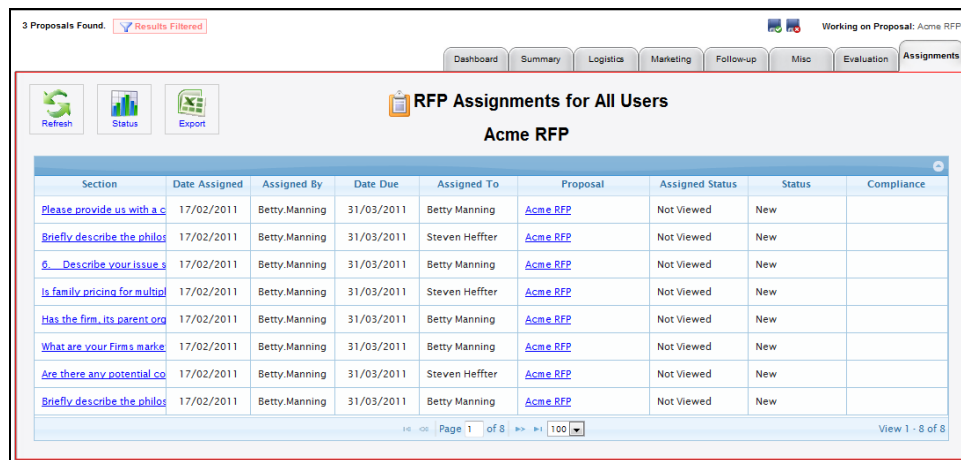

## Proposal/Bid Managers or Administrators

All [Assignments](#) that have been made are displayed on the [Assignments](#) tab of the current proposal or on the [RFP Assignments](#) screen from the [Navigation](#) bar. The [RFP Assignments module](#) icon is displayed at the top of the screen. The icon is highlighted if the current user has any open or not yet completed assignments. If the user is an administrator, they will be able to filter the list based on a single user.

When the user clicks on the link, they see a list of all assignments that are assigned to them.

Section	Date Assigned	Assigned By	Date Due	Assigned To	Proposal	Assigned Status	Status	Compliance
<a href="#">Please provide us with a c</a>	17/02/2011	Betty.Manning	31/03/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Briefly describe the philos</a>	17/02/2011	Betty.Manning	31/03/2011	Steven Heffter	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">6. Describe your issue s</a>	17/02/2011	Betty.Manning	31/03/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Is family pricing for multi</a>	17/02/2011	Betty.Manning	31/03/2011	Steven Heffter	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Has the firm its parent or</a>	17/02/2011	Betty.Manning	31/03/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">What are your Firms marke</a>	17/02/2011	Betty.Manning	31/03/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Are there any potential co</a>	17/02/2011	Betty.Manning	31/03/2011	Steven Heffter	<a href="#">Acme RFP</a>	Not Viewed	New	
<a href="#">Briefly describe the philos</a>	17/02/2011	Betty.Manning	31/03/2011	Betty Manning	<a href="#">Acme RFP</a>	Not Viewed	New	

The list consists of a grid with the following columns:

- [Section](#) – the first 100 characters of the section to be edited
- [Date Assigned](#) – automatically populated when the assignment is made
- [Assigned By](#) – automatically entered when the assigner makes the assignment)
- [Date Due](#) – highlights past due dates in a different color if the section is not marked complete.
- [Assigned To](#) – person assigned to the task
- [Proposal \(name\)](#)
- [Assigned Status](#) – values are Accepted, Rejected, Reassigned, Not Viewed)
- [Status](#) – values are New, In progress, and Completed
- [Compliance](#) – the compliance variables entered by clicking the Compliance [Options](#) button on the [Assignments](#) tab for each proposal.

1. Click on the proposal name in the proposal name column to open the RFP in the PMAPS WebPro Viewer or download the proposal if the Viewer is not installed. Note: If the Viewer is not installed, the user will receive a JavaScript error.

2. Click the link in the Section column to view the assigned sections.
3. When brought up in this mode, the user will also see a new set of buttons at the top of the Assignment Word window:
  - Accept
  - Reject
  - Reassign
  - a. If the user clicks [Accept](#) or [Reject](#), the status of the document changes.
  - b. If the user clicks [Reassign](#), a drop down list of all WebPro users comes up and the user can select a user. Once the document is reassigned, it is closed and it will no longer appear in the user's queue. The new user receives an email indicating the document is assigned to them and that it was reassigned from the current user. The new status of the document is [Reassigned](#).
4. The user can edit the document and save at any time. When saving, they will be prompted that [Saving will confirm that you accept this document](#) if the user has not already accepted. The document will be saved in its current state.
5. The user may also change the compliance status of the document according to selections on a drop down.
6. When the new [Completed](#) button is clicked the status of the section changes to completed. The view is exportable to Excel.

## Viewing Assignments

Assignments tab -- In the Dashboard/Tracking module, a new [Assignments](#) tab shows all assignments for the selected proposal. This tab displays the same columns listed above, but are filtered by proposal instead of user. When a contributor clicks on the [Assignments](#) tab, only their assignments for that proposal are displayed.

When the proposal manager of the current proposal or any administrator views the [Assignments](#) tab, they see all the assignments for that proposal.

## Re-link All Assignments

The [Re-link All Assignments](#) button  allows the any contributor to import completed sections into the existing RFP. Upon clicking this button the Viewer opens each assigned section and imports each section back into the current RFP. The user has the option to save – just as they would if they were editing the RFP from scratch.

If not all sections of the RFP are completed, a warning is presented to the user indicating that all sections are not marked complete, and the outstanding sections are highlighted in the screen.

The assignments list may be exported to Excel. Note: This report addresses the creation of a Compliance Grid requested by some PMAPS users.

Using the Assembly Center, you may then wrap other documents (cover pages, cover letters, exhibits, etc.) around the questionnaire and export to Word or PDF format for delivery to customers.

## Removing Comments

Once all sections have been completed, contributors or proposal/bid managers may remove all

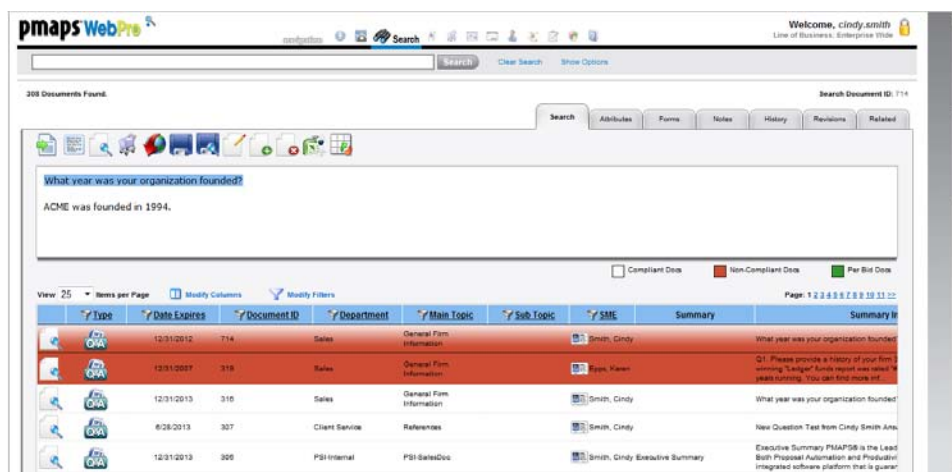

comments in the proposal by clicking the [Remove WebPro Comments](#)  button from the toolbar on the Proposal Editor document they opened from the Dashboard.

## APPENDIX

### Search Module Components

#### Search Tab

When you enter the [Search module](#) you will land on the [Search tab](#) initially. The Navigation bar at the top of the screen, as well as the Search bar, will be visible regardless of which tab you have selected.

## TIPS:

- ❖ If you have any [Filters](#) in place, you will also see a “Results Filtered” icon next to the number of Documents found.
- ❖ The hypertext view will not reveal any formatting, graphics or other non-text elements. To view the whole record, simply click the [View Document](#) icon for the record you wish to view and the record will open in Word.
- ❖ Double-click when selecting a record in the Search results grid and be taken directly to the [Attribute tab](#).

Just below the Search bar you will see:

- The total number of [Documents Found](#) on the left
- The [Search Document ID](#) of the record you have selected in the results grid below on the right.

308 Documents Found.

Search Document ID: 714

Note that you are on the [Search](#) tab. The other tabs store information about your database records and will be activated when you select a record from the results.

Then, below the tabs you will see the row of Search functions. Depending on your level of access the icons shown here will vary. Below the function icons, a hypertext view of the record you have selected below in the results grid will be displayed.

The color key for the results grid is always displayed. Non-Compliant Docs are records which are past their expiration date. Per Bid is an option when selecting the review cycle attribute for each record.

## Attributes Tab

The [Attributes](#) tab captures and displays all of the ownership and categorization information covering the current record.

<b>Status</b>	<b>Compliance</b>
Document Status: <input type="text" value="Active"/>	Review Cycle: <input type="text" value="Annually"/>

## Forms or Short Answer

The [Forms](#) tab (may be called [Short Answer](#) in your application) allows you to capture an abbreviated answer for insertion into Excel or Web Forms.

There is also a field for stipulations, comments, or notes pertaining to the short answer.

## Notes Tab

The [Notes](#) tab captures and display an unlimited amount of notes for the current record in your database.

To apply notes, just type directly into the Notes field. Once saved, the Notes tab will become highlighted in yellow as shown.

## History Tab

The [History](#) tab displays the usage history of the current record. It shows the Date inserted, Who inserted it, the Proposal Name (if the document is uploaded to the cloud), the Method of insertion, and whether or not it has been Re-linked. The fields Last Insertion and Times Inserted can be added to the Search Results grid using Modify Columns.

Search Attributes Forms Notes History Revisions Related

### TIPS:

- ❖ The Last Revision is the last time that any part of the record was edited. The Date Edited is last date that the content itself was edited, meaning a user opened the record using the Edit button or sent and updated the record via the SmartCart.

## Related Tab

Please also see our Appendix for complete details on [Building Parent/Child Links](#).

The **Related** tab allows you to link documents to each other and displays documents that are linked to the current record. This feature is available only to users who have permission to **Edit** search documents.

**Parent/Child Configuration**

Each document can be a parent or a child. If you make this document a child, you may pick a single parent document for it. If you make this document a parent, you may pick one or more children for it.

Relation Type: Normal Document

Document ID:

Add Related Document Add Child Document Add Parent Document

No related documents

Some reasons why you may want to link documents are when you want to allow easy access to documents that would be attachments or additional information for a record in your database or when you have several versions of one record in different languages.

To set up a related link:

1. Click the [Search](#) module icon on the Navigation toolbar:
2. Identify two documents that you'd like to link to each other and note the Search Document ID number for each.

Type	Region	Main Topic	Sub Topic	Summary Text	Document ID	Strategy	Date Expires	Last Verified
		Japan	General Firm Info	History	brief history of company	418	12/31/2010	10/17/2008
		France	General Firm Info	History	brief history of company	140022	12/31/2010	10/18/2008
		USA	General Firm Info	History	brief history of company	1155	12/30/2010	8/28/2009

3. Select one of the records you wish to relate by clicking on it in the Search Results grid.
4. Click on the [Related](#) tab. You can choose to relate the documents only, or create a Parent/Child relationship.
5. Enter the [Document ID](#) to link to.
6. Decide the relationship of the records and choose the appropriate option, either [Add Related Document](#), [Add Parent Document](#) or [Add Child Document](#). The Related tab will now be highlighted yellow, to indicate to users that related records exist. The related document will now be listed as shown below and you can click the View Document icon to preview the record.

Parent/Child Configuration

Each document can be a parent or a child. If you make this document a child, you may pick a single parent document for it. If you make this document a parent, you may pick one or more children for it.

## Building Parent/Child Relationships

### Overview

The [Parent/Child](#) feature allows administrators and content managers to manage documents that have parent documents in one language and child documents in one or more additional languages.

Following is the [Parent/Child](#) relationships best practices workflow:

1. Gather all or singular parent documents using the [Verify](#) module for export/email to content experts. This emails the documents in batches instead of by the individual document.
2. Receive updated parent documents back from content experts, review, and use preferred method to move the updates to the SmartCart Inbox .
3. Once all parent documents are available in the SmartCart Inbox, approve all documents at once to PMAPS. The approval process automatically checks the “[Needs Translation](#)” box and enters the approved date as the “[Needs Translation Date](#)” for all child documents associated with only the parent records that had actual edits to the document contents. If just an attribute is changed, the box is not checked.

The next time a Sales Doc is generated using the newly approved documents; the new information is pulled into the Sales Doc.

5. Content managers for each child language filters by the language and the [Needs Translation](#) field. They use the [Download All](#)  option to download the documents as individual files to send to the translation services team. If there are minor changes to a child document and the content manager determines the document can be edited locally and not sent to translation services, the content manager may manually update the document using the [Edit Document](#) function.
6. Once the updated child documents are received from the translation services team, the content managers save the files to a folder and use the [Upload Documents](#) feature to import the updates back into the system. This action will un-check the [Needs Translation](#) box and will also remove the [Needs Translation Date](#).

There are two permissions related to this functionality: [Multiple Doc Download](#) and [Multiple Doc Upload](#). Any user may manage these documents provided the administrator grants permissions to these two features.

User or Group	Add Documents	Add Proposals	Assembly Ctr Admin	Basic Editing	Build Sales Docs	Calendar Admin	Custom Report Admin	Dashboard Admin	Delete Documents	Delete Proposals	Edit Documents	Edit Proposals	Fill Out Sales Docs	Multiple Doc Download	Multiple Doc Upload	Multiple Global Attribute	Run Verify Process	Sales Docs In Word	Smart Cart Admin	Unlock Proposals

Following are sections detailing instructions on setting up and using the [Parent/Child](#) feature.

## Set Up Templates for Parent/Child Documents

1. Determine which languages are required and add the names of the languages to the [Language](#) drop-down list. This field is located in the [Search](#) module on the [Attributes](#) tab.

- a. Click on the [?](#) icon. The following screen is displayed.

- b. Click [Edit Values](#) to build the pick list.
- c. Click the [+](#) icon to add a new language to the pick list.

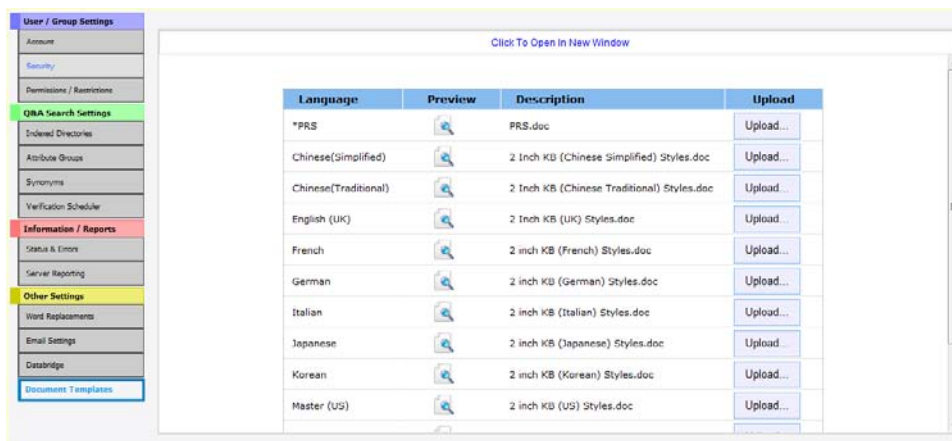

d. [Save](#).

e. Repeat [a-d](#) to add the remaining languages to the list.

## Create/Upload Templates for Each Language

You may create a separate template for each language.

1. Select the [Administration](#) icon  from the [Navigation](#) toolbar. (You must be assigned an [Administrator](#) license in order to perform this step.)
2. On the left-hand navigation bar, select the last option [Document Templates](#). The following screen is displayed.

3. Select the language you wish for which you would like to upload the template.
4. Click [Upload](#). Windows Explorer opens to allow you to choose the appropriate template from your network. The uploaded file must end in .doc or .docx only.

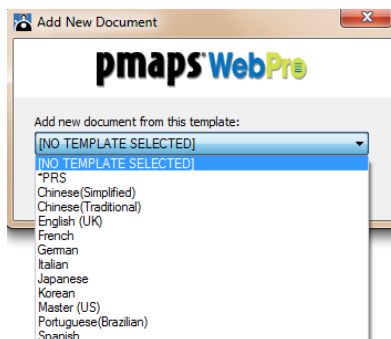

5. The file name is displayed in the [Description](#) column.

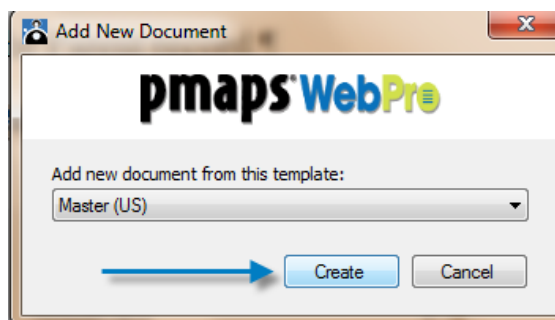

## Add New Document with Parent/Child Relationships

1. Click [New Document](#) to add the parent record. This selection determines which document is the parent. Even if you do not have the parent version of the document but have the content for one of the child documents, proceed and select the parent template. The text in the parent document is always sent out on all the child documents for translation. Be sure to make your selection with that in mind.

2. Select the parent record language from the list.

3. Click [Create](#). The new, blank Q&A record is displayed.
4. Enter or copy and paste the text into the document. If you do not yet have the parent record content, you may use the [Edit Document](#) function to paste the content you do have into the appropriate child document. Just be sure to go back and enter the content in the parent document before you send the parent documents out for update.
5. Click on the [Attributes](#) tab to fill in the attributes or select an attribute group from the drop-down list. See [Create an Attribute Group](#) in the user manual for more information on creating attribute groups.

6. Click [Save](#). The following screen displays.

7. If you need to send the new content out for review, choose [Save to SmartCart](#) or [Save to SmartCart](#) and [Request Compliance Immediately \(SME will be notified\)](#). The Due Date is mandatory if you choose the last option. You may also enter notes at this point.

Since we have the parent record content, in this example, choose [Save Without Requesting Compliance](#).

8. Under the [Options](#) section, check [Create Child Relationships](#). A drop-down list is displayed with all languages automatically checked. If you wish to omit one or more child documents for any of the listed languages, uncheck the box(es) and click [Save](#). This automatically adds an additional empty Q&A record for each selected language.

9. Once refreshed, the search results screen displays all child documents successfully added. Only the parent document includes content at this point. The child documents are still empty. The documents will contain content once they go through the translation process.

10. Click on the [Related](#) tab to show the relationships of all 12 documents to each other.

Parent/Child Configuration

Each document can be a parent or a child. If you make this document a child, you may pick a single parent document for it. If you make this document a parent, you may pick one or more children for it.

Relation Type: Parent with 12 children

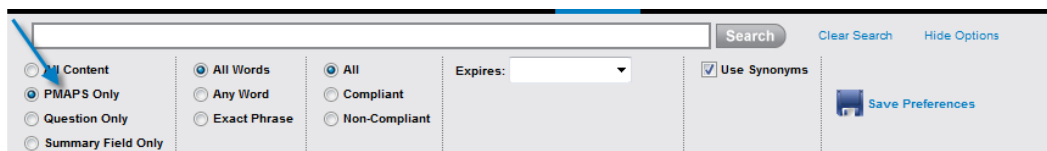

Document ID:

<a href="#">10174</a>	Sample Question Number 1	Child	English (UK)	
<a href="#">10172</a>	Sample Question Number 1	Child	Chinese(Simplified)	

## Send Parent documents out for update

1. Filter for all or a portion of the parent documents.
  - a. Make sure your search options are set to PMAPS only. For Parent/Child documents only Q&A document types may be sent out through the system for update. If you have just changed this from any other option, be sure to click [Save Preferences](#) to save your choice as your default.

- b. There are three options for filtering parent documents:
      - i) Filter under [Is Parent](#) using quick filter for single choice (right-click):

Right mouse click on a [True](#) value in the [Is Parent](#) column.

	 <a href="#">Is Parent</a>	 <a href="#">Is Child</a>	 <a href="#">Language</a>
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)

- ii) Filter by [Is Parent](#) using quick filter for multiple choice (funnel):
        - (1) Select the funnel icon in the column header of the [Is Parent](#) column.

	 <a href="#">Is Parent</a>	 <a href="#">Is Child</a>	 <a href="#">Language</a>
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)
	<a href="#">True</a>	False	Master (US)

- (2) Check the [True](#) box.

(3) Click **Apply**.

- iii) Filter by **Language** column if a specific language is always the parent using quick filter for single choice (right-click):

Right-mouse click on a **Master (US)** value in the **Language** column.

	<b>Is Parent</b>	<b>Is Child</b>	<b>Language</b>
	True	False	Master (US)
	True	False	Master (US)
	True	False	Master (US)
	True	False	Master (US)
	True	False	Master (US)

- iv) Filter by **Language** column if a specific language is always the parent using quick filter for multiple choice (funnel):

- (1) Select the funnel icon in the column header of the **Language** column.

	<b>Is Parent</b>	<b>Is Child</b>	<b>Language</b>
	True	False	Master (US)
	True	False	Master (US)
	True	False	Master (US)
	True	False	Master (US)
	True	False	Master (US)

- (2) Check **Master (US)** or value that is your language master.

(3) Click [Apply](#).

At this point, you may process all of the parent documents or further filter by any other [Attribute](#) to select fewer documents.

If your database is segmented by [Sales Docs](#) documents versus the Q&A Records, be sure to select that filter as well.

2. Use the [Verify](#) module to put the parent documents in the [Smart Cart](#) for emailing to the SMEs:

a. Click the [Verify](#) icon.

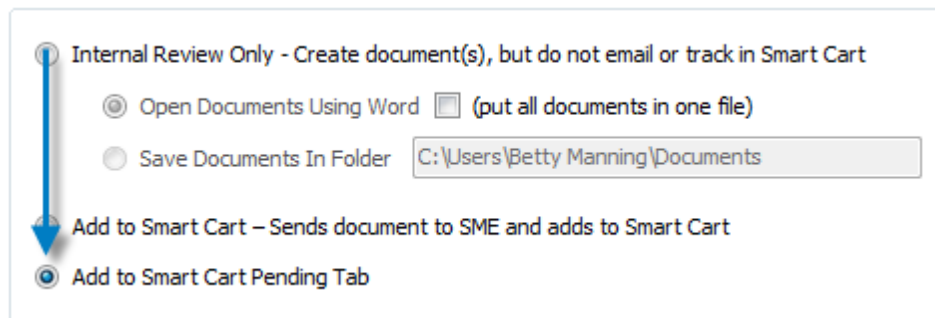

b. Click [OK](#) to confirm.

c. Your selected documents are displayed in a table.

d. Choose [Add to SmartCart Pending Tab](#).

e. Click [Submit](#).

3. Use the [SmartCart](#) module to email or download the documents for sending to the SMEs:

- a. Click on the [SmartCart](#) icon on the [Navigation](#) toolbar.

- b. The [SmartCart - Compliance](#) screen appears.

Pending (15) Sent (15) Inbox (5)

Any documents you previously added to the [Smart Cart](#) through a compliance request, verification request, or have manually added are ready to be sent.

- c. Click the box  in the first column heading to select all documents at one time (or manually check selected documents if desired).
- d. Click [Request Compliance](#) (emails the documents directly to the SME of record using a generic email template)

- i) To [Request Compliance](#) the following dialog box is displayed:

**Request Compliance**

☐ Include Notes
 ☐ Include History
 ☐ Include Attributes

☐ Change the SME
 ☐ Add CCs to email

☐ Add notes to the items

Due Date: 

☐ Download an ICAL Reminder.
 ☐ Attach an ICAL Reminder.

1 Document Selected

- ii) Do not check [Include History](#) unless you want to include a report for the usage history of each record within the file you are sending to the SMEs.
- iii). Check [Include Attributes](#) to include important record information.

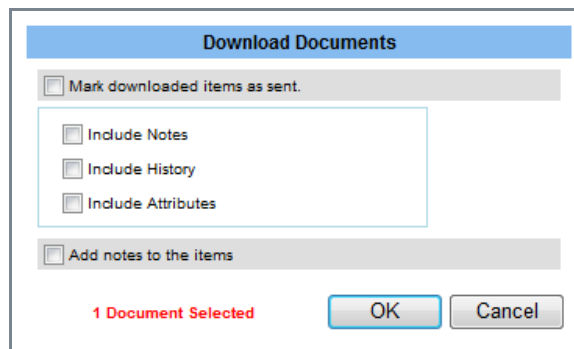

- iv) If you need to change the SME, click to check that box. An internal contact list is displayed allowing you to change the person to whom you are sending the email. It does not change the SME on the document.
- v) Click [Add notes to the items](#) if you want to include additional notes.
- vi) Enter or select a [Due Date](#) from the calendar.
- vii) Click [Download an ICAL Reminder](#) if you want the [Due Date](#) to appear on your local email calendar.
- viii) Check [Attach an ICAL Reminder](#) if you would like to send it along with the documents so that email recipients may also have a reminder on their calendar.
- ix) Click [Add CCs to email](#) if you would like to send the document not only to the identified contact (SME), but also additional recipients.

### *Download SmartCart Items*

Instead of emailing your documents to the SMEs directly, you may want to download your documents to your computer and manually attach them to emails. To download your documents:

1. Click [Download](#). The following dialog box appears:

2. Click [Mark downloaded items as sent](#) to move the items from the [Pending](#) tab to the [Sent](#) tab in the SmartCart.
3. Click [Include Notes](#) to include the notes you entered in the [Request Compliance Options](#) window.
4. Do not check [Include History](#) unless you want to include a report for the usage history of each record within the file you are sending to the SMEs.
5. Check [Include Attributes](#) to include important record information.

6. Click [Add notes to the items](#) if you want to include additional notes.
7. Click [OK](#).
8. A confirmation of the number of documents you are downloading is displayed. Click [OK](#) to continue.

9. Click [OK](#) to continue and open the downloaded document to your computer.
10. Attach the downloaded file to an email, add the desired message, and send to the document(s) expert.
11. Once the content expert returns the updated documents file to you, use the email or shared folder method to return the file to the system via the [Indexer](#).

#### ✓ TIPS

- ❖ Before you approve the updates into the system, you may want to go to the sales doc that is going to be refreshed and generate a copy to save.
  - ❖ Instead of over overwriting the existing sales doc, go to the [Sales Doc](#) module (on the [Navigation](#) toolbar), make a copy of the current sales doc, and change the sales doc name to include the new version number.
12. Once all the outstanding parent records are all returned to the [Inbox](#), approve the documents back into the system. If your documents are linked to sales docs, it is very important to approve all the documents at the same time so that the sales docs linked to the new content is all refreshed at the same time to prevent mixed versions in the same document.

### *Status when in SmartCart*

When any document is in the [Smart Cart](#), a note is displayed to show the user that it is in review. This will be displayed if the person requesting compliance requested it on the entire doc, and choose to overwrite the existing document, not create a new one.

Once the document is returned, follow the [SmartCart Inbox](#) process updating documents within your PMAPS application. The update will be reflected automatically in the Search module. Click the [Edit Document](#) icon to open the document and edit from within the SmartCart.

## Send Child Documents for Update

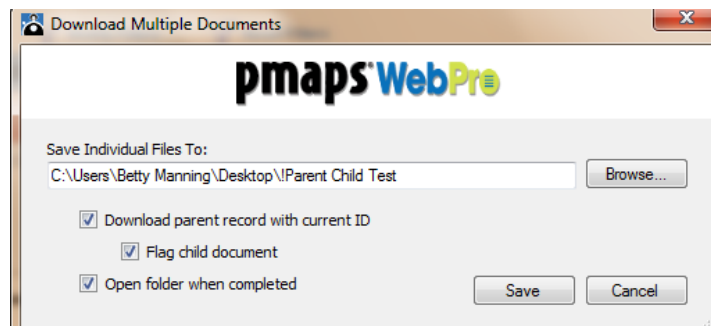

As part of the Parent document approval process described in the previous section, every associated Child document, which is returned with content edits, is automatically flagged in two ways. The [Needs Translation](#) box is checked and the [Needs Translation Date](#) is populated with the date the parent record was approved back into the system. To send child documents out for update:

1. Create a folder on your computer to download the child documents.
2. Content managers for each child language filter by the language and the [Needs Translation](#) field.
3. Use the [Download All](#)  option to download the documents as individual files to the folder you created in Step 1. This method better facilitates the process of sending documents to the translation services team.
4. Check the [Download parent record with current ID](#) to send the parent version of the record for each associated child document.

The child document that is downloaded is actually the parent version of the document, but it is linked to the child version. For example, if your parent documents are English (US), and you are downloading the French documents to be translated, the French document is downloaded and overwritten with the English (Parent) version of the record for translation purposes only. The document being downloaded is a copy of the French (Child) document. The French (Child) document is still available for use during the update process.

### ✓ TIPS

- ❖ If there are minor changes to a child document and the content manager deems the document can be edited locally and not sent to translation services, the content manager may manually update the document using the [Edit Document](#) function.
5. Check the [Flag child document](#) to capture the [Date Downloaded](#) and [Downloaded By](#) information on the Attributes tab of all the child documents being downloaded.

6. Email or otherwise deliver the downloaded documents to the translation services team.

7. Once all the updated child documents are received back from the translation services team, content manager save the files to the folder created in Step 1. If you would like to save the original file that went out for translation, move them to another folder.

#### ✓ TIPS

- ❖ Before you approve the updates into the system, you may want to go to the Sales Doc that is going to be refreshed and generate a copy to save.
- ❖ Instead of over overwriting the existing sales doc, go to the [Sales Doc](#) module (on the [Navigation](#) toolbar), make a copy of the current sales doc, and change the sales doc name to include the new version number.

8. Click on [Upload Docs](#) to process the updates back into the system. This action will un-check the [Needs Translation](#) box and will remove the [Needs Translation Date](#).

## WebPro Fields and Functionality Overview

Your database administrator (Admin) controls every field in the database. The admin accesses the field options by clicking the  icon. To learn about the customization tools available to Admins, refer to the Administrator Manual. [If you have questions about database customization, please contact your designated Admin.](#)

The Admin also controls user permissions within WebPro. If you select an option, and you do not have permission to work with that option, a message is displayed to notify you.

Therefore, even though there are instructions in the User Manual for adding and deleting proposals; adding, editing, and deleting documents; using the SmartCart to send documents to your SMEs for updates or new answers; etc., you may not have permission to complete these tasks.

If this is the first time you have logged into PMAPS, you may want to take a few minutes to familiarize yourself with the functionality of the database fields.

#### ✓ TIPS

- ❖ If you're not a first-time user, you may proceed directly to the [Dashboard Module](#) section.

## Capturing Data in WebPro

Whether you are logging in a new proposal or adding a new record to your database, you are required to fill out certain fields.

<b>Basic Information</b> Client Name: London Borough of Brent Proposal Name: London Borough of Brent	<b>Consultant Information</b> Consultant: Contact:
<b>Detailed Information</b> Client: Asset Class: Equity - Domestic Stage: RFP Anticipated Revenue: 150 Priority: Taxable Proposal Type: Public Region: USA	<b>Relevant Dates</b> Date Received: 5/14/2009 <input type="checkbox"/> Declined Date Declined: Date Due: 5/29/2009 Sales Received: 5/28/2009 Extension: Who Extended: Reason Extended: Date Completed: 5/29/2009 Date Shipped: 5/29/2009
<b>People</b> Sales Manager: Philleo, Wendy AE/AM: Wexler, Steven Lead Writer: Business Analyst: Jones, Karen Retiree Specialist:	<b>Other Information</b> Vehicle/Product: <input type="checkbox"/> All <input type="checkbox"/> All Vehicles <input type="checkbox"/> Behavioral Health <input type="checkbox"/> Commingled Fund Comments:

Some of the fields are required by PMAPS and some of the fields are required by your Admin. We refer to required fields as mandatory. You can easily identify mandatory fields because they have a light yellow background.

Client Name:	
--------------	--

Following is a list of the types of fields in alphabetical order by entry type along with instructions for filling out each type of field:

### *Data Entry Fields*

1. Click in the blank field.
2. Type directly into the field.

Summary Notes for Reporting:	
------------------------------	--

## *Date Fields*

Date fields in PMAPS not only track proposal and record milestones within the application, but they can be displayed on an individual or group calendar for project management and planning purposes.

There are several ways to enter date fields in WebPro:

- The easiest way to enter a date is by clicking on the calendar icon next to any date field and selecting the date.

- The current day is highlighted. Click on the highlighted day or select Today at the bottom of the screen to fill in today's date.

- Click on any day to fill in that day's date.
- Use the arrows to the right and left of the month to go forward or backward a month at a time.
- Click on the Month/Year field for a drop-down list of the months for the current year.
- Click on the left arrow next to the year to view the 12 months of the previous year.
- Click the right arrow next to the year to view the 12 months of the next year.

## *Enter Date Manually*

- Click on the field you want to fill out.
- Type in the date.

## Pick List (Drop-down list) Fields: Single Selection

This type of pick list is most easily identifiable by the down pointing arrow to the right of the field. Admins can customize the items on each pick list. Each field has its own pick list. The easiest way to make a selection is:

1. Tab to or click on the field you want to complete.
2. Start typing directly into the field. As you type, you are automatically taken to the options matching the letters you enter.
3. Once you have landed on the selection you wish to choose, tab or click off of the field to save it and move to the next field to complete.

Or, if you are unfamiliar with the available options, you may:

1. Click the down-pointing arrow to display the available choices.
2. Click on an item from the list to select it.
3. Tab off of the field to the next field to select the name you are on and move to the next field.

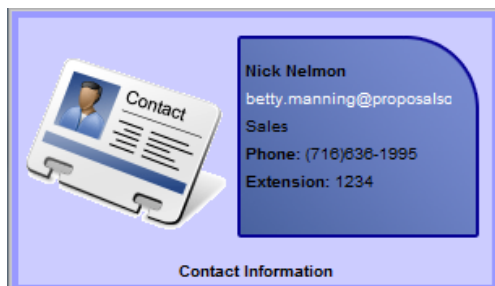

## Pick List Fields: Single Selection - Internal Contact Master

This is also a single selection pick list. However, all internal contact lists, with the exception of the Consulting Firm/Broker contact on the Summary tab, point to one master contact list. Even though you may have field labels that display roles like Sales Rep, Proposal Writer, Client Services Rep, Underwriter, Portfolio Manager, etc., everyone on your internal contact list is displayed when you select an internal contact pick list to choose from.

Use the Single Selection Pick List method for choosing a contact name.

You may view the contact information for the person chosen for any internal contact field by clicking on the card  icon to the right of the field.

## Multiple-Selection Pick List

The multiple-selection pick lists allow you to make one or more selections. To use this field:

1. Use the vertical scroll bar to scroll down to see all of your options.
2. Check the box to the left of the item to select it.
3. Continue checking the boxes until you have made all your selections.

## Edit Values: Edit/Add to Pick Lists

### *Add a New Client Name*

If your database administrator has given you permission to edit or add to a pick list:

1. Click on the icon to the right of the field for which you want to edit the pick list.

The following [Label Definition](#) screen is displayed.

A screenshot of the 'Label Definition for: Type of Bid' screen. The title bar is blue and says 'Label Definition for: Type of Bid'. Below the title bar, there are two text boxes: 'Label for Screen:' and 'Label Description:'. Both contain the text 'Type of Bid'. There are green double-headed arrows between the two boxes. Below these boxes is a list of checkboxes with labels: 'User must complete field before saving', 'User must complete field after Ship Date', 'Administrator editing only', 'Administrator adding or editing of Pick-Lists' (which is checked), 'Update Calendar', 'Default Value 'Yes'' (which is unchecked), 'Disable Field', and 'Required on Ad Hoc Sales Doc'. At the bottom of the screen are four buttons: 'More Info', 'Edit Values', 'Save', and 'Cancel'.

2. Go to the bottom of the screen and select [Edit Values](#).

Edit Values

3. An [Edit Options](#) screen will appear. The screen will vary somewhat based on the type of field you are editing. For example, the Client Name field on the Dashboard and all contact name fields contain additional fields within the Edit Values and allow you to store more information such as title, email, phone and more.
3. Click the [Add](#) button on the bottom of the screen.

State:

Zip:

4. Enter the value you want to add to the list.
5. Click the [Save](#) button to save the new name.
6. Click [Close](#) to exit the screen.

### *Add an Internal Contact*

1. Select any proposal from the Dashboard.
2. Click on the [Summary](#) tab.
3. Scroll down to the bottom of the page to the [People](#) area.
4. Choose any field displaying the Rolodex icon.

The 'People' window contains several dropdown menus for selecting contacts. The 'Internal Contact 2' dropdown is highlighted with a red arrow pointing to its '?' icon. The 'Bid Manager' dropdown is currently set to 'Manning, Betty'.

- Click on the ? icon. The Label Definition screen is displayed.

The 'Label Definition for: Bid Manager' dialog box shows options for how the 'Bid Manager' label is used. A blue arrow points to the 'Edit Values' button. A red text annotation states: 'Must keep the same meaning of field!'.

- Click [Edit Values](#).
- Click [Add](#)

The 'Edit Options for: Bid Manager' dialog box shows a list of users on the left and a 'Contact Information' form on the right. A blue arrow points to the 'Add' button at the bottom of the 'Contact Information' section.

- Fill in the contact information. Be sure to fill in [at least](#) the name and email-address.
- Click [Save](#).
- Click [Close](#).

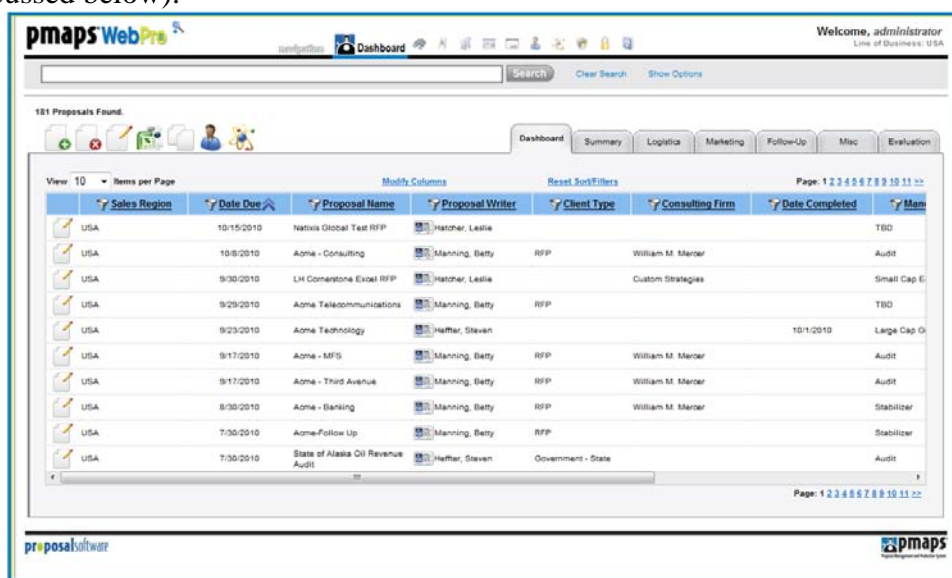

## Choose User Preferences

The WebPro application is designed to allow each user to make changes to two primary screens according to their individual preferences. Those two screens are the home page, or what we refer to as the [Dashboard](#) and the first screen you land on when you enter the [Search](#) module.

Understanding your options and choosing your preferences before you start using the application for completing proposals may save you time and confusion.

## Dashboard View

The [Dashboard](#) displays an inventory of proposals entered into PMAPS' Tracking module. Each user can customize their Dashboard columns and order by choosing any of the over tracking fields (discussed below).

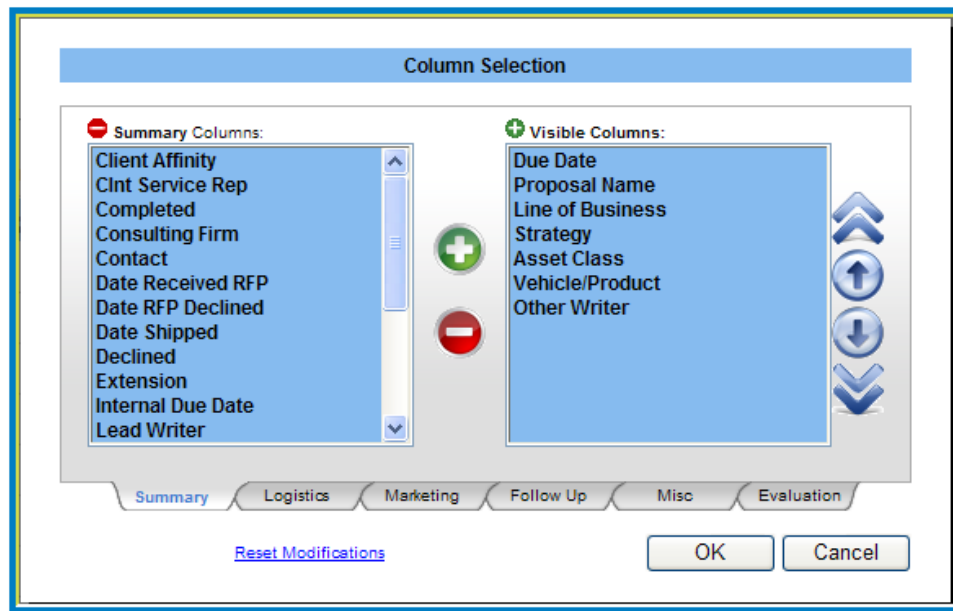

## Modifying Dashboard Columns

1. Locate and click on [Modify Columns](#) on the Dashboard.

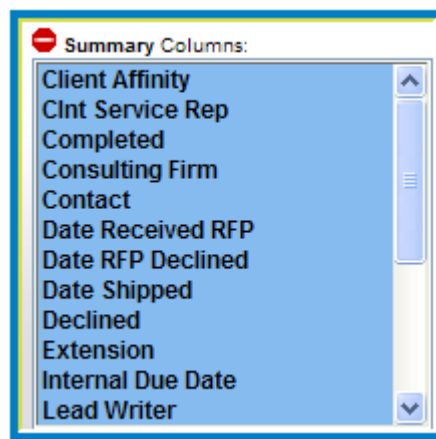

The [Column Selection](#) screen is displayed.

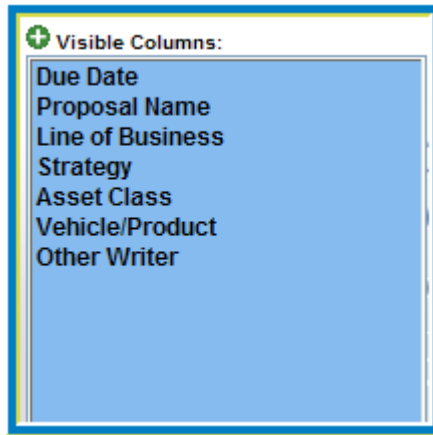

The **Column Selection** area contains six tabs—replicating the names of the **Tracking** tabs—and listing the available fields from that tab.

The left-hand side of the screen includes a heading which displays the name of the tab (e.g. **Summary Columns**;) and lists the names of the available fields from that tab.

The right-hand side of the screen heading is entitled **Visible Columns** and it lists all of the names of the fields that have been chosen to display in the **Dashboard** from any of the tabs.

The right-hand column displays the same information regardless of which tab you click on. In this example, we have chosen Due Date as the first column on the Dashboard, Proposal Name as the second column, Line of Business as the third, etc.

### *Adding Columns*

2. Click on one of the tabs to select one or more fields from that tab. You will probably begin with the [Summary](#) tab.
3. Review the list of fields that you have already chosen or were entered by default under [Visible Columns](#):
4. Click the item that you want the new field to precede.
5. On the [Summary Columns](#) list, click the item you to add it to your view.
6. Click the add  icon.
7. Add additional fields from the Summary tab by repeating steps 3-7.
8. If you are finished adding columns to your Dashboard, click [OK](#) .
9. If you are not finished, choose another tab from which to select fields, and repeat steps 3-7 to add the remainder of your desired fields.

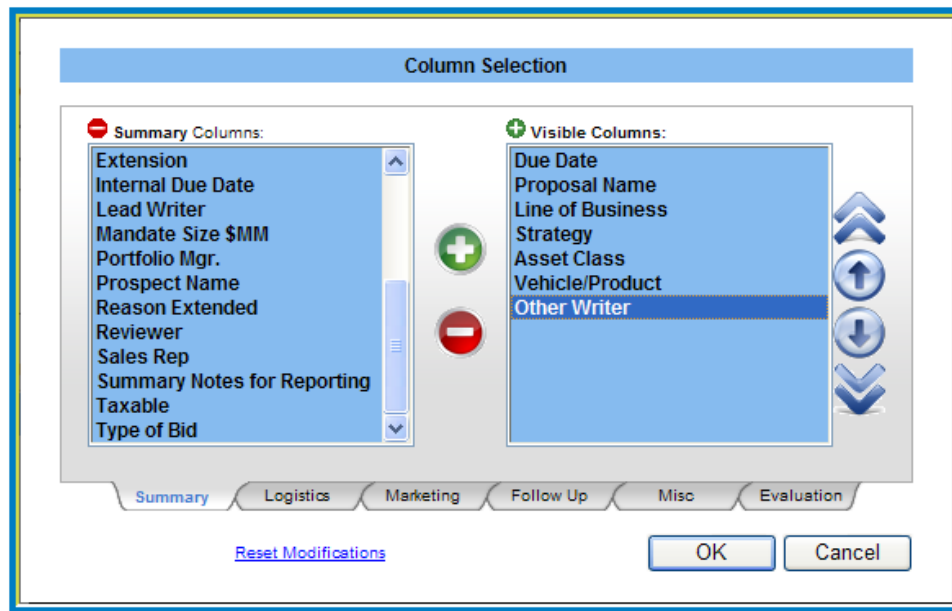

### *Removing Columns*

1. Click [Modify Columns](#) on the Search screen.

The [Select Columns](#) screen is displayed.

2. In the [Visible Columns](#) area, click the item you want to remove.

3. Click the Remove  icon.
4. The item is moved from the **Visible Columns** to the Column on the tab where it is displayed in the application.
5. Click Ok .

### *Move Columns to the Left on the Dashboard*

1. Click on the field name that you want to reorder.
2. Click the Up arrow  to move the item up. Each time you click, it moves the item one row up.

### *Move Columns to the Right on the Dashboard*

1. Click on the field name that you want to reorder.
2. Click the Down arrow  to move the item down on the list. Each time you click, it moves the item one row up.

### ✓ TIPS

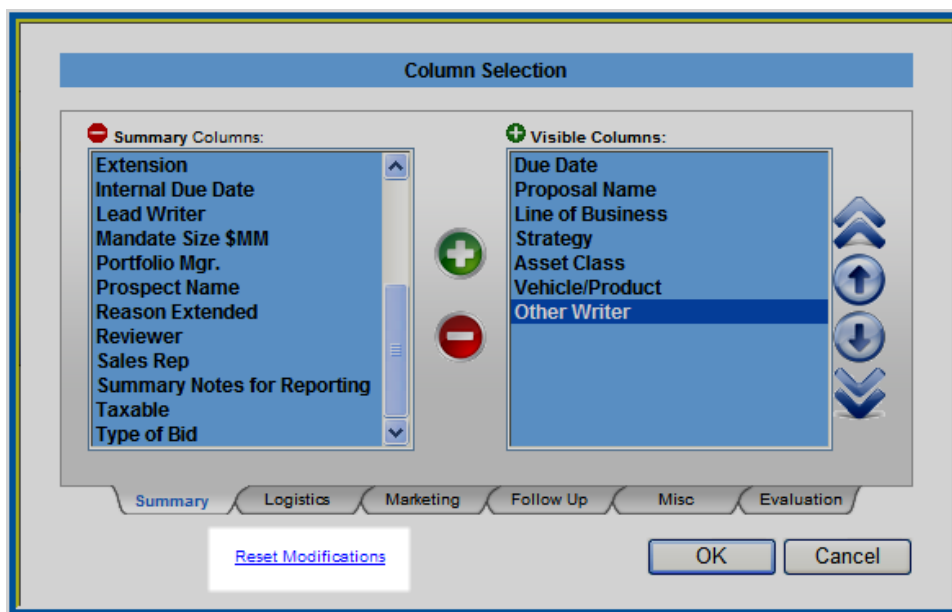

- ❖ If you choose more fields than can display on the Dashboard, use the horizontal scroll bar to view all of your columns.

- ❖ You may add or remove more than one item at a time by selecting a group of files. To select more than one adjacent field, clicking the 1st items in the group, hold down your shift key, and selecting the last item in the group.
- ❖ You may add more or remove more than one item at a time by holding down your Ctrl key and then clicking on as many items as you like.

## Reset Modifications

You may reset your field selections to the default view as follows:

1. From the Dashboard, select [Modify Columns](#).
2. Click [Reset Modifications](#).

## Search Results View

Every record that is imported into or added to your database must have various attributes assigned to it. Attributes act as Meta Tags for your data. Some of the attributes are Subject Matter Export/Contact, Main Topic, Vehicles/Products, Review Cycle, Date Expires, etc. These attributes aid in data categorization, content location, and record updating.

Following is an example of an attributes screen for one record:

<b>Basic Attributes</b> Publishing Rights: Internet Region: USA Content Owner: Heffter, Steven N. Who Answered:	<b>Extended Attributes</b> Review Cycle: Annually Date Expires: 12/29/2010 Last Verified: 8/27/2009 Reviewer: Richards, Kim
<b>Additional Attributes</b> Department: Marketing Main Topic: General Firm Info Sub Topic: History Summary Text: brief history of company Language: English Source: Prompt on Insert: Type: Q&A Document	<b>Other Attributes</b> Vehicle: <input type="checkbox"/> All <input type="checkbox"/> Euro Bond <input type="checkbox"/> Firm Information <input type="checkbox"/> Fund A Strategy: <input type="checkbox"/> Equity <input type="checkbox"/> Firm Information <input type="checkbox"/> Fixed Income <input type="checkbox"/> Global Fixed Income Account Executive: Consulting Firm: Proposal: Date Added: 11/19/2009

Just as you set up your Dashboard view, you also need to set up your [Search Results view/grid](#). When you click on the [Search](#) tab, the following screen is displayed.

## Search Results Grid

The [Search Results](#) grid is the lower portion of the screen.

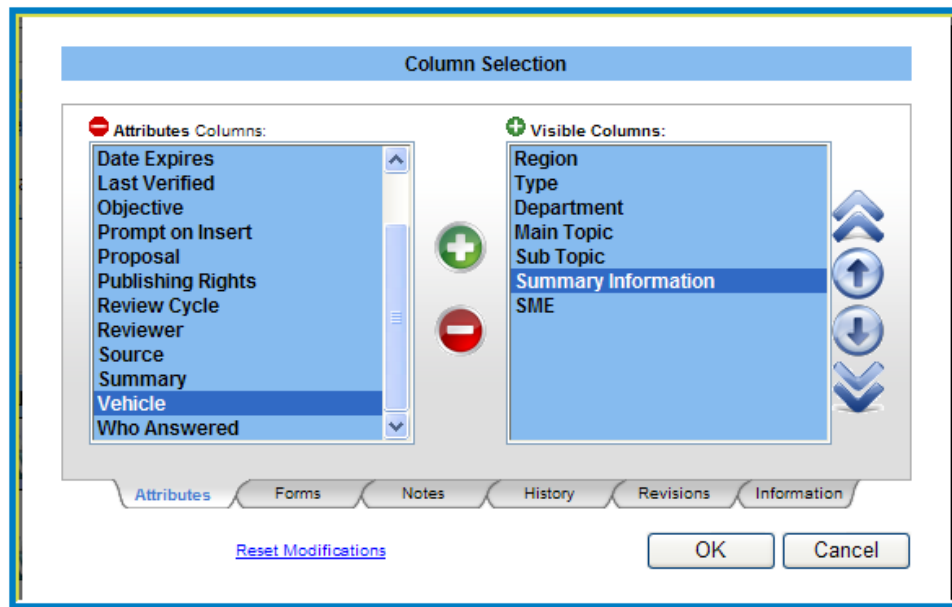

Region	Type	Department	Main Topic	Sub Topic	SME	Summary Information
USA	Q&A	Sales/Marketing	General Firm Info	History - Firm	Wexler, Steven	What is the history of your company? Provide a brief overview and history of your firm. Please describe any parent/subsidiary relationships. Buffalo Investment Group was...
USA	Q&A	Sales	General Firm Info		Heffter, Steven	History of company あなたの会社の歴史は何であるか。あなた様があなたの会社の歴史を提供しなさい。親が子会社または関係会社の子会社である場合は、その関係性を説明してください。パタファローの投資のグループは1935年11月に創設され...

## Modifying Columns

1. Click [Modify Columns](#) on the Search screen.

View 15 Items per Page	<a href="#">Modify Columns</a>	<a href="#">Reset Filters</a>	Page: 1
------------------------	--------------------------------	-------------------------------	---------

The [Select Columns](#) screen is displayed.

The Column Selection area contains six tabs—replicating the names of the Search tabs—and listing the available fields from that tab.

The Region, Type, Department, Main Topic, Sub Topic, and Summary and are probably already selected.

The left-hand side of the screen includes a heading which displays the name of the tab (e.g. [Attributes](#), [Forms](#), [Notes](#), [History](#), [Revisions](#), and [Information](#)) and lists the names of the available fields from that tab.

## Adding Columns

2. Make sure you are on the Attributes tab.
3. You are going to add [Vehicle/Products](#) to your search results. Decide what position you want the new field in on your list (column on the right).
4. Click the item that you want the new field to precede.
5. Click Products in the column on the left to add it to your view.
6. Click the add  icon.
7. Click OK  to save your changes.

## Removing Columns

1. Click [Modify Columns](#) on the Search screen. The [Select Columns](#) screen is displayed.

2. In the [Visible Columns](#) area, click the item you want to remove.
3. Click the [Remove](#)  icon. The item is moved from the [Visible Columns](#) to the Column on the tab where it is displayed in the application.
4. Click .

## *Reset Modifications*

You may reset your field selections to the default view as follows:

1. In the Search Results View, select [Modify Columns](#).
2. Click [Reset Modifications](#).

## *Select International Date Format*

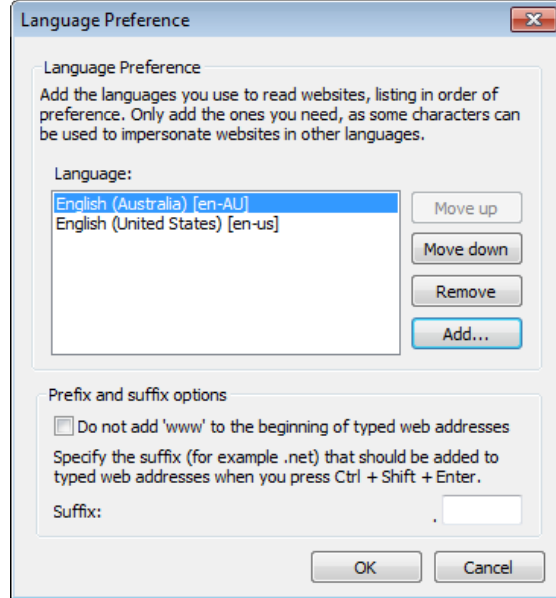

This International Date format is controlled in the PMAPS user's Internet Explorer settings.

1. Go to the [Tools](#) option on your menu bar.
2. Choose Internet Options.

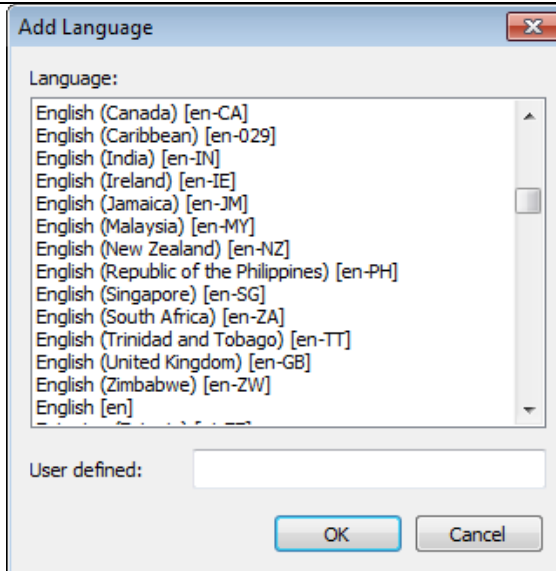

3. Click on [Languages](#) under Appearance.

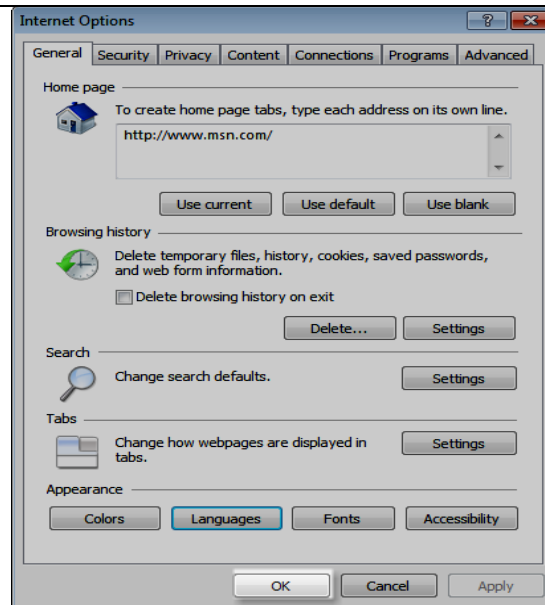

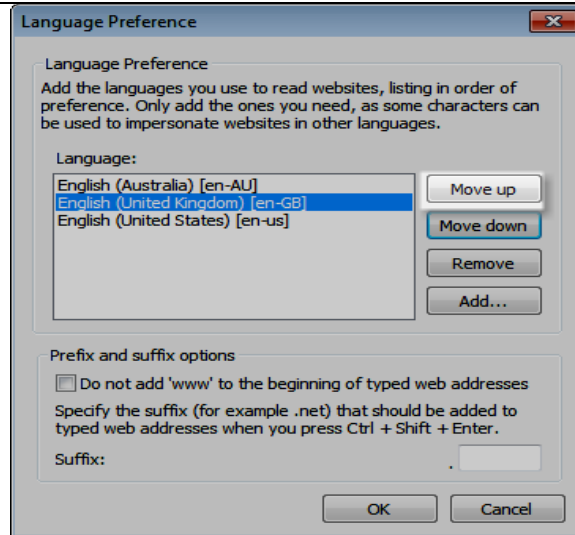

4. If your country's language is not on the list, click Add to choose it.

5. If there are more than one languages on the list, move your preference to the top of the list.

6. Use the Move up or Move down buttons to move your Language Preference to the top of the list. Whatever date format is used in the country you select, controls the format in your date fields.
